Hi Nick,

three easy identifications for your italian unids of June 16th.

87.5: Radio Maria (a commentary of the Director, Padre Livio)
89.6: Radio Planagia (local adv and local news about Bosa area)
88.2: Radio Deejay (Linus and Nicola Savino speaking)

Best 73's

Franco

39933. Band 2 Es Thursday 30th June 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-03 19:55:00 UTC
From: Jim Smith G0OFE
Topic: 39933 Message: 39933

At last, a proper opening to Scandinavia and by far the best one I've had in my 4 seasons on Band 2. My normal openings in that direction are usually short teases and usually unloggable due to multiple same stations listed on the same frequency. Not this time.

Lasted more than 2 hours and some very low power stations came in.

I was at work, however, but managed to 'remote in' record streams to go through later, including further up the band for a short time.

Map and logs: http://www.fmlist.org/fm_logmap.php?datum=2016-06-30 <http://www.fmlist.org/fm_logmap.php?datum=2016-06-30&omid=2748> &omid=2748

==========

Jim, Bournemouth, Dorset. IO90BR.

Elad FDM-S2, Perseus/FM+, SDRPlay and Funcube Dongle SDR Recievers

8-element OP-DES for Band 2, 12-ele ZL Special for 2m, plus wideband vertical.

Wellbrook 1530 Loop for LF

39938. First Ever FM Meteor Scatter Logging

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-05 15:08:46 UTC
From: Les Rayburn
Topic: 39938 Message: 39938

First of all, a big “Thank You” to everyone who has helped me tackle the use of RDS Spy and offered advice on how to improve things on the FM DXing front.

With that help, I was able to get RDS Spy running along with RDS Data Logger software on the Airspy SDR. It also works fine with the Elad SDR.

RDS Spy is much more sensitive than RDS Data Logger, producing about 3 to 1 in number of loggings with very few bogus decodes. After optimizing that operation for a few days, I decided to tackle antenna issues.

Over the holiday weekend, I relocated the Antennacraft FM6 to an outdoor location. Only mounted about 12 feet above ground, but in free space now and out of the attic. Also added a choke balun made from RG-6 and three snap-on ferrite beads. Hopefully, the trees keep it out of sight from neighbors and the HOA.

Opted not to use the pre-amp initially, and have a run of about 75 feet of RG-6 quad-shield coax back to the shack. A splitter then sends the signal in three directions. The Airspy SDR, Elad SDR, and the Sonly XDR-F1HD. I may opt to add an antenna pre-amp later. Certainly will upgrade to RG-11.

Rewarded with the first ever meteor scatter logging of KRZU-FM 90.7 via RDS Spy. Signal was rated "outstanding" by the software, with a clear decode of "KRZU-FM”. RDS Data Logger software had a partial decode, catching only "ZU".

Their ERP is 100kw at a distance of 810 miles. I'm sure this will quickly become a "pest" via MS but very exciting for me. Can’t wait to see what the next few days, and the upcoming Perseids meteor shower might bring.

I’ve been making 6 Meter and 2 Meter scatter contacts for years, but this is my first FM broadcast logging. Happy to finally have the system optimized and working.

This network Helmiradio still does not appear in the FMLIST.
Actually, I do not mind as I know this Sanoma Corp's affiliates,
subsidiaries have a habit of forcing employees work 24/7, then
leaving people unpaid for the work ordered.

Hi Paul,

Within the 12-mile radius I mentioned, there currently are 23 channels//stations, taking up as many frequencies. And, this is just for the population of some 120.000. Talking about the utterly ridiculous. Stretching the radius, within 30 miles there are 50 channels//stations, 35 per cent of them russian [I live just some 8 miles to the russian border].

Over here in my QTH, one can forget about the RDS code. The dial is so stuck, 80 kHz IF is far too wide. Furthermore, very few receivers can cope with the local field, the front-end just collapses.

I got informed today, the FMLIST section FIN had recently been
updated for frequencies up to 93 MHz.

By the way, the finnish broadcasting scene this summer, is propably
more active than ever, there are plenty of temporary broadcasters.
For instance, the annual Suviseuraradio occupies 60 frequencies and
transmitters, with transmitter power up to 3 kW.

The most comprehensive up-to-date database on the finnish
broadcasters, one finds under these links:

https://www.viestintavirasto.fi/en/tvradio/broadcastingandreception.html

[search engine, finnish language site only, unfortunately]
https://www.mediamonitori.fi/index.php/tietosivut/taajuuslista

[list of temporary broadcasters]
https://www.mediamonitori.fi/index.php/tietosivut/lyhytaikaiset

Hi Paul and Ilkka,

I think you are VERY lucky in front of the Italian situation; I'm living in a small but hilly town (populations it's just 200,000, around 230,000 with the province, the smallest in Italy) and there are 70 frequencies in use in 10 miles radius.
But I'm also on the border with Slovenia and quite close to Croatia so in 30 miles radius more then 150 frequencies are occupied; quite hard to do FM DXing here, don't you think so?

From: Jim Smith G0OFE
Topic: 39953 Message: 39953

Just realised I didn't post these.

Here we are, 8th July and just one opening this month so far, and only 2 reasonably decent days since mid June.

This season is moving firmly into the "very poor" category now and it's going to take a series of good openings to change that. There seems little sign of that, however.

The stats on http://www.mmmonvhf.de/eseval.php?sum=1 are a pretty fair reflection of where we are.

Anyway, a brief opening to Iberia and North Africa on the 5th is all I have to show for the first 8 days of the month assuming nothing happens today.

39959. Sporadic E Loggings for 9 July 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-09 20:54:38 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39959

Hi All,

A Band II Sporadic E opening at last! Which even made it to the top of the band for a short while. Here's hoping this will be the start of a stunning second half of the DX season.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

Saturday 9 July 2016

Well done - but with a 3 way splitter and 75 ft of coax you definitely need the a low noise pre-amp at the aerial end. Have a look on k6sti's web-site as there is interesting info regarding the improvement in system noise.

Then compare the actual cable loss for RG-6 vs RG-11 - I think you will find you can keep the RG-6 and save the expense. From what I hear the Elad will certainly benefit from the pre-amp.

David

39969. Sporadic E Loggings for 10 July 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-10 20:23:29 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 39969

Hi All,

Several Band II DX openings made this a pretty big DX day, with 12 countries on E skip making it to my location. The first big day for me this season while being at home.
Things started off in a chaotic way, with some decent long haul tropo towards France and Spain, coinciding with E skip from the same direction. In the early afternoon a very good opening started into Tunesia, Libya and Malta. In fact, this turned into the best I have seen into Libya. Later on, things evolved into a classic, top of the band opening into Italy.
After the obvious OIRT Band opening, the day was topped off with some attempts into Spain in the evening. Nothing spectacular though.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands.

39970. 87.5 UNID Middle East (?)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-11 00:32:31 UTC
From: John Faulkner
Topic: 39970 Message: 39970

87.5 unid 1449 10-07-16
https://app.box.com/s/2i1zdkm2vmhwup7ikjvl9x0ltlqn1bp9

Does anybody know who might play this kind of music on 87.5? It sounds quite distinctive and, I suspect, religious. There are two separate pieces of music in the clip and I assume these are the same station.

The signal was probably strong enough for RDS but none appeared.

Romania and Bulgaria were received around this time. This may not help too much, but it could point to the second hop landing somewhere in Syria or Saudi Arabia. Italy was also received not far from this time so, if the first hop landed in the Mediterranean, just off the south-east coast of Italy, Egypt could be a possibility - but I don't think Egypt use 87.5.

Thanks if anybody can help.

John

Does anybody know who might play this kind of music on 87.5? It sounds quite distinctive and, I suspect, religious. There are two separate pieces of music in the clip and I assume these are the same station.

The signal was probably strong enough for RDS but none appeared.

Romania and Bulgaria were received around this time. This may not help too much, but it could point to the second hop landing somewhere in Syria or Saudi Arabia. Italy was also received not far from this time so, if the first hop landed in the Mediterranean, just off the south-east coast of Italy, Egypt could be a possibility - but I don't think Egypt use 87.5.

Thanks if anybody can help.

John

Good day, this - some nice tropo to southern France and northern Spain during the day, and finished off with Es to the Balkans late on.

Wasn't able to dedicate as much time as I would have liked - trying to get decorating completed at home to a deadline!

Date: 2016-07-11 08:46:02 UTC
From: Jim Smith G0OFE
Topic: 39975 Message: 39975

One of the more productive days for Es with the band open from before 0645 to Iberia and North Africa, followed by an early afternoon opening to (mostly) Italy. The easterly openings enjoyed by some during the afternoon didn't really make it here. Finally, an opening to Spain and Portugal mid-evening.

As with Saturday, was not able to give as much time as I would like due to decorating duties.

Map and logs: http://www.fmlist.org/fm_logmap.php?datum=2016-07-09 <http://www.fmlist.org/fm_logmap.php?datum=2016-07-09&omid=2748> &omid=2748

Thanks Nick.

Thanos also confirmed this was Greek music. Apparently two Athens pirates, namely Radio Blackman and Kriti FM.

39988. Very strange log with program in Singhalese on 87.9 MHz

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-12 14:01:31 UTC
From: Guido Schotmans
Topic: 39988 Message: 39988

Hello,

I'm now searching for some time where this very strange log might originate from. I was listening on Saturday 9/7 at 1933 UTC on 87.9 MHz. There was an opening first to the Adriatic coast of Croatia and Bosnia and later turning to Italy.

I heard this program.
https://www.dropbox.com/s/hxkmydvhyz2a4d4/UNID%2087.9%20MHz%202016-07-09%201933%20UTC.mp3?dl=0

RDS didn't work.

While the language sounded like something from the Indian sub-continent, I posted the audio link at the DX-India Facebook page. There they told me that is was probably Singhalese and that there was some talk about the leader of the communist party of Sri Lanka. So I contacted Victor Goonetilleke in Sri Lanka. He confirmed that it was indeed Singhalese. He also pointed me to the station TNL Radio from Colombo on 87.9 MHz but I don't now yet if he came to this conclusion only because the frequency is matching.

Here you can see a picture of the recording in SDR File Analyser. All popping up signals are Italian. I have marked the Singhalese broadcast.
https://www.dropbox.com/s/4brnw1agg1e50ep/Shingala%20on%2087.9%20MHz.png?dl=0

I have also searched if there are Italian stations with this kind of programming or relays but couldn't find one. Direct reception from Sri Lanka can be excluded. Furthermore, if it is a multi-hop reception, Sri Lanka is still not in the extend of the path to Italy.

73,

Guido.

Now, this was interesting reading.

What I am curios about is, how are the lowest transmitter powers logged with RDSspy, via MS. Furthermore, how are the lowest transmitter powers logged with these SDR gadgets, via MS?

By live monitoring, If I recall it right, 0.2 kW is the lowest transmitter power, my non-amplified 8-element yagi 40 ft. agl, and my modified [IF filters 53//80 kHz, sensitivity improvement] Yamaha tuner have been able to pick up. These 0.2 kW transmitters via MS have been possible in early, late winter, while Es BEGINNING to FORM on 50 Mhz, not while Es happening on 50 MHz.

If I recall it right, a couple of years ago there was a 30-watt transmitter reported been received via MS, on CCIR-FM

This is more than likely Inka Stereo from Madrid as suggested already. The scrolling RDS matches the interval message heard in the clip, "Por excelencia". Also the accents & music are of latin American origin.

Hi,
on June 30 I received during an Es opening in Hungary some unknown stations resp. frequencies from Russia. Help is very appreciated.
An orientation could be my reception of Vesti FM on 87.5 from Tolyatti and Radio Dacha on 88.0 from Gelendzhik during that time.
Unknown/UNIDs:
88.9 perhaps ID, sounded like R. Nesta
90.3 Retro FM
91.9 russian rock mx
98.7 jingle sounded like R. Relax, maybe Yelets? This QRG is listed as planned in Yelets

Hi,
thanks Victor for the hint. The reception of Simferopol is more likely than the assumed locations. At the same time period I received other QRGs, which should be located in this area too.
88.6 russian pop -> tent. Radio Vanya
88.3 spoken word / story -> tent. Radio Zvezda, Sevastopol
88.9 phone-report, pop, jingle sounded like R. Nesta -> may be R. Zvezda too?
89.0 word / story
90.3 Retro FM
98.3 word / talk
98.7 ID sounded like Radio S / Relax (see previous mail)
101.7 russ. pop -> tent. Yumor FM
103.1 news -> tent. Lubimoe Radio Krym
103.6 news -> tent. Radio Mayak
105.9 news, russ. dance-pop -> tent. Avtoradio
106.3 news, sounded Ukrainian -> tent. Radio Melodiya

https://app.box.com/s/f2lw55nyyfibyp419ovb65n38nk3pv7x

Via Es
Highest power on this frequency is 1kW.
At the beginning they interview English speaking tourists. There is a fade then it gets stronger at 50 seconds.

Might be more than one station.

Thanks

Peter

Hi Peter,

around 50 seconds YL gives a weather report; from my poor knowledge of Croatian I understand it's a general report for all Croatia.
From 1 min 13 sec some names of producers of the news and wrp; I suspect you have received a national program, so it could be HRT1 even if with just 100 W from Limski Kanal, not too far away from here.

Thanks Alessandro. It does sound like Albanian on 90.0 so if religious then yes presumably it is Radio Maria.
 Good DX.

Hi Pedro,

Yes, this is JFK Radio. Obviously a new frequency, the exact tx site I do not know.

Yes, this is Hrvatski Radio HR 1, the news every full hour, about Ultra music festival in Split - they interviewed the visitors, then the weather forecast for Croatia.. nice catchIII
Best regards!

88,0 mix of different stations from Balkan, but I recognized pop music from Serbia (2.00), and then Serbian folk music (greetings and wishes from listener), later the woman voice tells City lights - City Radio, but it's not Slavic language... In music wish on Serbian she mentioned city/place PADINE, Google find this: https://sh.wikipedia.org/wiki/Padine located on Kosovo... Hope that I helped somethnig.

Best regards

Rudolf

90,0 Balkan unids

after hearing all, there are minimum 3 stations in recording, first they are speaking about victims in Bosnian war in year 1992, but this is Serbian part of Bosnia, then comes voice on Albanian which I don't understand, some Serbian folk music I also hear, and then again on Bosnian the news from agriculture, and they mentioned city/place ZVORNIK, I searched the base on Bosian web sites and can find different braodcasters on this frequency... Regionaly it is Radio tuzlanskog kantona on 90,0. Hope that this helps something,.

Regards!

107,5 Catolic radio program, mainly the news from Bosnia, I searched Radio Marija on web in Bosnia, but this frequency is not listed, only 105,7... Also searched Croatian Catolic Radio (HRK) on web, also no 107,50, so I don't know. The language is Croatian, not Bosnian version.

Best regards from rainy Osijek in Croatia, now receiving the station from Turkey and Greece (first time) - yeeeesss!

Hi all,

Hungarian for sure.
I think your tape starts with "uth Radio..."
The usual station ID is Kossuth Radio and not Radio Kossuth.

Hello nick.
Really, 87.5 is Dynamis Radio. The male voice is the same in a few podcasts heard here:
http://www.dynamisradio.org/podcast.php
I can't find the exact podcast because there are a lot of them.
Regards

Hi All,

Another Band II Sporadic E opening today. The opening lasted 1.5 hours, with the MUF reaching 100 MHz. Despite of that, not much was coming through. And the signals that made it were generally painstaking weak with very short lived signals. This season is broke.

I made a change to the formatting, I hope this will show okay.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Well your name and QTH are not very useful to diagnose this…

How about some details of:

(1) Your email client

(2) Your platform: PC/Mac/smartphone

(3) OS version

(4) Anti-virus in use

(5) Your email provider

Hi,

I'm down near Falmouth with a variety of SDRs and a nice 8 element Yagi.
Looking at the way the tropo is building up, can anyone suggest a strong NA
station I should listen for?

Hello

Thanks.
It is just an ordinary UHF yagi. Nothing special.
There are eleven UHF aerials on the chimney, which is shared by two houses. No space for my own aerials.

Same here, started a month two ago (or close). Most yahoo (group) mails go straight to spam box. That did not happen last year/winter. Just maybe 1-4/40 before, now more straight to spam as towards inbox. Haven't changed anything. I have a specific yahoo.mail which I "use there, as a recipient and account"..
Not an big issue for me, but just wondering..

yes, I use Win7..

40051. RE: [SkywavesDX] re spam mail Edward

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-19 01:34:14 UTC
From: Paul R
Topic: 40051 Message: 40051

If you are logging in to Yahoo mail on the website and finding the messages in your spam folder select all the messages then press the not spam button. The messages will then go to your inbox. By clicking on the not spam button you’re ‘educating’ the spam filter so that future messages will go straight to your inbox.

40052. Re: [SkywavesDX] Help please with recent UNIDs

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-18 18:52:41 UTC
From: Juan Antonio Arranz
Topic: 40015 Message: 40052

Hello!Great log indeed!
88,2 UNID103.9 UNID, I think on RNE Radio 3. Accent is Spanish American but I don't know from where.105,7 Not identification but they were praying the Holy Rosary, almost certainly it is Radio Maria.104,9 At 1:06 of your recording there are an id "Radio Castilla la Mancha", but it isn't station with good signal you recorded. Two stations on this frq!
 Radio Castilla la Mancha is in Molinicos, province of Albacete.106,8 Radio Jerez. At 1:40 there are a clear identification.

From: julian@...
Topic: 40079 Message: 40082

I recall in the late 70s or early 80s there were Japanese imports of 'long range mobile phones' which ran about 50W on low-band. The kit included an outdoor antenna for the home base and a magmount whip for the car. The UK authorities soon found them and there were prosecutions.
Tim Bucknall wrote on 24 Jul 16:18

fwiw I used to hear Russian 31mhz cordless Phones via F2 circa 2000

I clearly remember hearing a female british expat with a strong upper
class accent talking to a local "oh, can you do that for me? .. oh
Thank you Olga you're a lifesaver!"

40085. Band II Sporadic E Loggings for 27 July 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-27 20:48:54 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40085

Hi All,

Today seemed to become a typical Sporadic E day as we have seen too many this season.With a slow start to the propagation, then a gradual increase of the intensity until the MUF hits the bottom of Band II. Followed by a de-intensifying of the conditions.Fortunately nature decided to make an exception though, as things started to pick-up again around mid-afternoon.

But when the MUF managed to reach 95 MHz, the propagation was extremely chaotic. With the skip area constantly on the move, covering a large area and with very unstable and weak signals. When I concluded that this was going to be another no-fun session, the skip area settled over Eastern Spain and the MUF got to the top of the band for a long time. Making this hands down the best opening into Spain this season.

Here’s hoping for some more like this, before the season is over.

Note: Things that require some attention from the FMLIST editors are showing in red .

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

40086. Utility stations @86 MHz today.

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-27 22:22:24 UTC
From: Mauricio Molano Sánchez
Topic: 40086 Message: 40086
Attachments: 2 described; binary payloads are missing from this source WARC

I have had a long opening this afternoon to Germany but with lowlevel signals and on the lower part of the FM only (to @92). Not so
many stations identified:1507 88.30 D Nordwestradio, Bremen-Walle (bre)
1509 88.10 D MDR Sachsen-Anhalt, Wittenberg/Gallunberg
I was receiving with my Perseus/FM+ as usual. In a certain moment
when centered on 87.5 I observed some little peaks appearing and
disappearing in the range of 86.x so I decide to "force" the machine
and explore that area. With a little trick you can tune with your FM+
from 86.7 to 108.8 MHz. And you can record from 85.9 to 87.5 andfrom 108 to 109.6 extra areas. There was several signals in the range
of 86.3-87.1 MHz. I explored this recordings with Perseus v5 for usingFM narrow mode. I have discovered until now a voice on 86.415'6
soundind to me more Dutch than German... anyway I have no idea
about what is he saying. The sequence was: 15'37'00 several burst
of "chirps" (data, sel-call?)... 15 seconds of silence and short speech.Attached are screenshot and mp3 audio.
Some idea about the origin of this signal?...

40088. Re: Band II Sporadic E Loggings for 27 July 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-28 08:21:01 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40088

Hi All,

I have to make two corrections to my loggings for yesterday.
102.0 MHz Onda Cero Radio is not from Coslada (MAD), but from Petrer/Sierra del Cid (VAL-A) instead. The PI code in FMLIST should be changed to E2EE.
104.1 MHz, my UNID with the PYCCKOE_ PS appears to be Radio Smile from Torrent/Perentxissa=Calicanto (VAL-V), which relais several Russian programs.

Onderwerp: Band II Sporadic E Loggings for 27 July 2016

Hi All,

Today seemed to become a typical Sporadic E day as we have seen too many this season.With a slow start to the propagation, then a gradual increase of the intensity until the MUF hits the bottom of Band II. Followed by a de-intensifying of the conditions.Fortunately nature decided to make an exception though, as things started to pick-up again around mid-afternoon.

But when the MUF managed to reach 95 MHz, the propagation was extremely chaotic. With the skip area constantly on the move, covering a large area and with very unstable and weak signals. When I concluded that this was going to be another no-fun session, the skip area settled over Eastern Spain and the MUF got to the top of the band for a long time. Making this hands down the best opening into Spain this season.

Here’s hoping for some more like this, before the season is over.

Note: Things that require some attention from the FMLIST editors are showing in red .

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

40090. Meteor stuff, Perseids expected very active

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-28 10:53:32 UTC
From: ilkka suni
Topic: 40090 Message: 40090

Hi folks,

Around noon today, noticed some very decent meteor bursts, of duration up to 30....60 seconds.

The major shower of the year, the Perseids, is on the rise. The visual peak is expected on August 11-12th. This year, the Perseids is predicted to be the most active since 2009, reaching rates as high as 150 to 200 ZHR.

No Es for me in past two weeks thus being, could use some rock.

73, ilkka

40091. E444 Europa FM (Spain) on 87.7

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-28 14:25:11 UTC
From: pe1etr@...
Topic: 40091 Message: 40091

Which site uses E444 as a PI?

There are three sites listed for Europa FM on 87.7
I have had E444 several times this Es season.
Yesterday I had E444 and E2ED on 87.7 but not at the same time. Anyone know which site is showing the rogue PI?

Thanks
Peter
Blackpool UK

40092. Re: [SkywavesDX] E444 Europa FM (Spain) on 87.7

Yahoo group: SkywavesDX (2016 — 2017)

From: Janpeter van Dijk
Topic: 40091 Message: 40092

Hi Peter,

What else did you get around the same time? This should provide an accurate pointer towards the location for the E444 Europa FM. I have it tentatively for Valverde de Alcalá (MAD), but I am not sure.

Hello Janpeter,

I checked my IQ WAV file and these four stations were in at exactly the same time:

87.700
E
Europa FM
EUROPAFM
E444

87.900
E
Cambil/Sierra Almaden
RNE Radio 5 Todo Noticias Jaen
E215

88.000
E
Cieza
SER Radio Murcia
E839

88.700
E
Mijas
Aire Radio
__AIRE__
5004

This would seem to indicate 87.7 Europa FM E444 is from the Priego transmitter, unless there is a new outlet on 87.7

Madrid is too far away, and the Aire FM I received on 88.7 had the PI 5004 which is Mijas.

I would agree that it is not Madrid Peter. But Chinchilla is also a possibility, based on Murcia coming in at the same time.
I am not aware of any new Europa FM outlets on 87.7 MHz. This tx has been received a good number of times by a good number of DX-ers, so likely it is high powered and not some illegal self-help tx. I guess we need to wait for a confirmation by one of the Spanish FMLIST editors. I know that some of them are on Skywaves, so we may be getting an answer soon.

40100. Re: [SkywavesDX] Band II Sporadic E Loggings for 29 July 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-30 10:19:49 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40100

You are quite right Niels. I can only hope that they will install a proper PI and PS soon, so we can get a clue about the station name.

And maybe someone in the area can make a new bandscan? There's too many unknowns from stations in and around Tripoli.

Yes, I think he is still active. Not sure if he is a DX-er though.

Did you take any receiving equipment with you to Funtana?

40103. Lowpass filters for the FM band (88-108 MHz)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-30 12:55:48 UTC
From: Les Rayburn
Topic: 40103 Message: 40103

My house is located in the midst of a tightly-packed subdivision, with my nearest neighbors only a few meters away on the sides, and in the back of my home. Our homeowners association (HOA) forbids outdoor antennas, but I did receive an exception for my FM antenna (a Korner 9.2) with the stipulation that it's height be limited to a few meters.

With the proliferation of consumer electronics, my antenna is bombarded with a whole range of interference. I suspect these degrade the receiver (SDR) performance for FM DXing. I'd like to install a low pass VHF filter, that would pass signals below 108 MHz, while blocking signals above that frequency.

The alternative would be a band-pass filter that would pass 87-108 MHz (the FM broadcast band) with the exclusion of all others.

Is anyone aware of filters that foot the bill that they could recommend? Have other DX'ers installed these on their systems, and seen any improvement?

Always grateful for the advice. So new to all this.

73,

Les Rayburn, N1LF

Hi Les,
I am using a FM/TV wallsocket. FM output highpass 87 to 108 MHz, reducing frequencies below and above.

Do you mean something like this?

http://www.fastlec.co.uk/mk-tv-fm-dab-sat-triplexer-euro-module-k5853dabwhi?gclid=CjwKEAjwoPG8BRCSi5uu6d6N5WcSJABHzD8Fvsw-of6urrD2Oi9shTVoXP1X6b8Z2luac6ufppsYrBoC0Abw_wcB

I didn't know these sockets contained such filtering. If this is the
case then I guess it could be worth investing on one.

Not exactly. The one shown is FM+DAB = Band 2 + 3.
You should try to find an old one with FM only.
I am using my wallsocket since mor than 10 years against high level FM
stations here in Istanbul.
The Sat output has a highpass filter above Band 5.

40110. Band II Sporadic E Loggings for 30 July 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-07-30 21:49:22 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40110

Hi All,

A mini Band II Es opening into Italy. It’s a shame that this did not develop into something decent, as the skip area was towards the northern half of the country, which is unusual for me.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Frank,

Libyan station presumably, sounds like ‘Radio Zwef FM’ to me from Wamadar/Wamadan ? (site ?). No trace of it on the web seemingly at first glance.

Also heard during tropo from GRC to LBY in 2014 :

40122. Sporadic E Loggings for 2 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-02 19:38:39 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40122

Hi All,

Sporadic E conditions were gradually building today in the afternoon. But when the MUF reached Band II, the opening was almost completely unworkable.Despite of the band being saturated with DX signals, everything was extremely weak and unstable.Add to that a skip area constantly on the move between Belarus, Ukraine, through Turkey, the Balkans and into Italy and find yourselves a recepy for very little DX catches.

This lasted for one hour, when all of a sudden Finland became audible. Which appeared to be the start of a very intense opening towards the North East, the best for this season so far.

As before, things marked in red in my logbook should be looked at by the FMLIST editors.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Hola Pedro,

Yes, this is 100% sure the Spanish Europa FM. As stated, received several times by several DX-ers.

El 29/07/2016 a las 22:01, Janpeter van Dijk janpeter_van_dijk@... [SkywavesDX] escribió:

I would agree that it is not Madrid Peter. But Chinchilla is also a possibility, based on Murcia coming in at the same time.
I am not aware of any new Europa FM outlets on 87.7 MHz. This tx has been received a good number of times by a good number of DX-ers, so likely it is high powered and not some illegal self-help tx. I guess we need to wait for a confirmation by one of the Spanish FMLIST editors. I know that some of them are on Skywaves, so we may be getting an answer soon.

Hello,

Yesterday evening there was a nice opening to Finland. I received YLE Puhe on 92.2 MHz at 1600 with ID, PI 6207 and partly PS, but I can't find a location for this frequency. Not in FMList and not on http://yle.fi/radio/ylepuhe/yle_puheen_taajuudet/7047956. Has anybody an idea where this is coming from ?

BTW Finnish is really an incredible language. Who would ever imagine that "Frequency" is "taajuudet" in Finnish ;-)

73,

Guido.

Hi Guido,

This is a brand new one, location Perho/Limakonkallio, 24E2719 63N1210, 3 kW, v-pol.

Nice catch!

40127. Unid Swedish 90.2

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-03 19:50:24 UTC
From: Guido Schotmans
Topic: 40127 Message: 40127

Hello,

Yesterday I heard this station on 90.2 MHz

https://www.dropbox.com/s/vybckojx02wtntj/UNID%2090.2%20MHz%202016-08-02%201622%20UTC.mp3?dl=0

The only one with decent power on FMList is SR P2, Hudiksvall / Forsa-Storberget TM
but I thought that P2 was a classic mx channel, so is there anybody that can ID this station ?

I also heard lengthy Swedish Maritime weather observations on 93.1 and 90.2 MHz but RDS didn't catch on and no ID was heard. Any suggestions ?

73,

Guido.

I have received PI:E444 PS:EUROPAFM 87.7 several times this year last time on the 5 th July at 15:31 then at 15:37 I had Europa FM 87.7 E2ED now I haven't seen E5ED this year so far. At 15:28 Radio Castilla La Mancha 87.6 was in and they are not far apart so either Madrid or Chinchilla and of course the possibility of a new TX.
Andy

A correction to my last post I have received E5ED ON 31/05/16 but not since that date.
Andy

On Thursday, 4 August 2016, 16:17, "Andrew Webster radioredcat@... [SkywavesDX]" <SkywavesDX@...> wrote:

I have received PI:E444 PS:EUROPAFM 87.7 several times this year last time on the 5 th July at 15:31 then at 15:37 I had Europa FM 87.7 E2ED now I haven't seen E5ED this year so far.
At 15:28 Radio Castilla La Mancha 87.6 was in and they are not far apart so either Madrid or Chinchilla and of course the possibility of a new TX.

Hola Pedro,

Yes, this is 100% sure the Spanish Europa FM. As stated, received several times by several DX-ers.

Ese PI es totalmente inusual en la cadena, ¿seguro que se trata de una emisora española?

El 29/07/2016 a las 22:01, Janpeter van Dijk janpeter_van_dijk@... [SkywavesDX] escribió:

I would agree that it is not Madrid Peter. But Chinchilla is also a possibility, based on Murcia coming in at the same time. I am not aware of any new Europa FM outlets on 87.7 MHz. This tx has been received a good number of times by a good number of DX-ers, so likely it is high powered and not some illegal self-help tx. I guess we need to wait for a confirmation by one of the Spanish FMLIST editors. I know that some of them are on Skywaves, so we may be getting an answer soon.

Two unids from E Eu

First with an ID and a mention of Ukraine (might be two stations)
Second mentions Belorussia or similar

From: John Faulkner
Topic: 40137 Message: 40137

COME ON YAHOO - THIRD ATTEMPT!!!

In the interests of speed (something Yahoo known nothing about) I just had a PI of A201 on 89.0. The station was playing Arabic music and was NOT in // with the OE1 web stream.

Bulgaria and Hungary, plus others, were received at the time.

Pull your finger out Yahoo!

John

40139. Sporadic E Loggings for 4 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-05 15:34:49 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40139

Hi All,

For the first time this season I am running behind with the processing of loggings. A good sign!

Sporadic E conditions yesterday were not impressive with just some light and short lived Band II flurries.But at sunset, when it was about time to call it a DX day, things started to intensify.Opening up Band II again, this time for many hours lasting until 2am local time the next morning. Such a thing is rare, I have even never seen this happening in August.

Things were difficult to work though, as the propagation was very unstable with the skip area jumping from one country to another. Similar to like it has been many times this season.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

From: Janpeter van Dijk
Topic: 38927 Message: 40140

Hi All,

The increased Sporadic E activity that started late yesterday evening continued for many hours today. It took a long time though, before the MUF reached Band II. When it did, it was mainly Italy coming in, which has not happened a lot this season. Per the trend of the past months, the eastern parts of Europe got the better of the DX.

There is some nice bits of short skip in the logbook.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Hello all,
Yesterday I heard a station on 92.30mhz at 12.59utc. The PI is 5657 but and don't understood the ID.
Has anybody an idea what the ID is, please?

40150. Yesterday's UNID Middle East (Post attempt two)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-06 17:15:01 UTC
From: notmyregularemailaddress@...
Topic: 40150 Message: 40150

After checking through my 1409 05-08-16 file from yesterday, I discovered lots of unidentified stations which I presume are from the Middle East. Damla FM 87.5, Istanbul FM 88.6 and Slowtime 91.2 were all audible, Istanbul FM with RDS.

This file lasted only 36 seconds as I had pressed record when I realised that something more exotic was coming through. The file is only 36 seconds long, but there were two definite peaks, one at the beginning (Istanbul) and one possibly further afield half way through the file. All unidentified stations were very weak and brief. Some had speech and one or two sounded quite exotic.

Here are the recordings:

88.0 unid 1409 05-08-16 https://app.box.com/s/6dceq5hkiczm052qdbdsms71qfclkmsu

Nick,

87.5 (presumed) could well be Dynamis Radio from Madrid. It is a religious station & the subject spoken in the recording matches the format of the station.

88.2 (presumed) sounds like RNE Radio Nacional also from Madrid. The person doing most of the talking sounds more of Latin American origin & he is going on about the theatre scene in Spain. The presenter of the program has an accent from Spain.

104.9 (presumed) might also be RNE Radio Nacional from Madrid judging from the style of the program. They seem to be reciting some sort of children's book about a bear & the moon.

106.8 (confirmed) is Cadena SER from Jerez. There is the name of the program "A Vivir Que Son Dos Dias" @ 1:36 & the website for Cadena SER Jerez @ 1:47.

87.7 (confirmed) Spain is Europa FM. There is a mention of Juan Sanchez @ 4:09 who is presenter for the station. I would say this is from southern Spain as there is also a relay for the Madrid region.

sleeper77, Southampton

Sorry - I have your other message now. Will write directly to you shortly.

Lots of problems with Yahoo mail again.

Thanks Kurt.

John

40157. Band I Sporadic E Loggings for 6 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-06 19:52:12 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40157

Hi All,

A nice OIRT Band opening this evening. Producing a good handful of lower powered Russian stations.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Saturday 6 August 2016

40159. UNID PI A201 - NOT Austria

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-05 12:04:19 UTC
From: notmyregularemailaddress@...
Topic: 40159 Message: 40159

Posting again as first mail held up.

UNID PI of A201 on 89.0 with station playing Arabic music. Nothing listed.

This wasn't Austria as I checked their stream. The band was open to Hungary and Bulgaria at the time, plus others no doubt. It's been a mad morning.

Thanks

John

I suppose it could be Lebanon - as the pi codes I received from there all began with A2 - you didn't mention what time you received it.

David

BTW I can't get onto the phbb - it's returning a SQL server error when I rey to acces posts - I've notified the board admin - are you able to get on there?

Iceland and Gibraltar another options.

but with arabian music are Lebanon more likely

Members trying to post to skywavesdx.org have been seeing a page about "SQL ERROR" since yesterday afternoon
This has been reported to the hosting company and I will post again when I have any news
Meanwhile yahoogroups neo seems to be having its own problems, slowing down access and posting, but please keep trying, there are interesting condx at present!

Thank you Dave and John.

The A201 PI was received at 11:42 on 5th August. I guess this must be Lebanon but there is no way to be certain as nothing is listed on the frequency with this code.

Istanbul was received across the bottom third of the band (and probably higher - I didn't check) at 14:09.

Regards.

John

Vamos a ver,
lo que yo entiendo despu?s de escucharlo 3 veces es:
"Amor, es amor, la radio me ha comprado"
lo cual para mi, sinceramente, no tiene sentido
Adem?s, el acento es algo extra?o, parece un extranjero hablando
castellano...
Imposible adivinar de qu? emisora se trata...
Lo siento, es lo que hay
Saludos
Pedro

Hola Pedro y Ilkka,

el acento es "extra?o" por que no es Castellano!
La emisora grabada por Ilkka en 89,7 MHz es SRR Radio Romania Cultural,
Alexandria (TR) 10 kW.

I clearly hear "Radio Mia Cultural" - not "Radio Romania Cultural" - before that I hear "Amor" and something like "solo"

"voulez vous couchez avec moi ce soir" is definitely not the sort of song that RRCultural would play!

If this is Mia FM - then identification might be difficult as "google " Mia FM and there are stations in Spain (Cordoba, Cadiz), Guatemala, Argentina ......

I hope you can get a good identification - my guess would favour Spain - as there was lots of multi-hop about during the morning of the 5th. I've got confirmed RDS from Israel, Jordan and Lebanon around 0900 UTC and other UK DXers had the Middle East.

Regards

David

Sorry about my OT, folks.

For the last two years or so, I have been using the box.com, to share DX files [i.e., to enclose audio files with my reception reports].

Unfortunately, the box.com no longer appears to work for me. I have tried with a variety of browser versions, for Win XP and Win 7: at box.com a blank page only, loads to me. My notorious "Radio Romania Cultural" was the last audio file, after severe efforts I was able to upload to box.com.

Is there any other site, you can suggest let alone recommend? A site, working for Win XP and Win 7, too.

Thgank you.

Thank you Dave and John.

The A201 PI was received at 11:42 on 5th August. I guess this must be Lebanon but there is no way to be certain as nothing is listed on the frequency with this code.

Istanbul was received across the bottom third of the band (and probably higher - I didn't check) at 14:09.

Regards.

40186. Yesterday's UNIDs - Possible Middle East

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-06 17:09:47 UTC
From: John Faulkner
Topic: 40186 Message: 40186

After checking through my 1409 05-08-16 file from yesterday, I discovered lots of unidentified stations which I presume are from the Middle East. Damla FM 87.5, Istanbul FM 88.6 and Slowtime 91.2 were all audible, Istanbul FM with RDS.

This file lasted only 36 seconds as I had pressed record when I realised that something more exotic was coming through. The file is only 36 seconds long, but there were two definite peaks, one at the beginning (Istanbul) and one possibly further afield half way through the file. All unidentified stations were very weak and brief. Some had speech and one or two sounded quite exotic.

Here are the recordings:

88.0 unid 1409 05-08-16
https://app.box.com/s/6dceq5hkiczm052qdbdsms71qfclkmsu

88.2 unid 1409 05-08-16

Hi All,

A mixed bag today, nicely filled with both tropo and Sporadic E DX. Like many days this season, the Es made many hours, without reaching any intensity of significance. The Amman tx was very strong for a while.

The tropo DX brought some stations from deep into France.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Apart from delays in Yahoo - I certainly couldn't hear the word "Romania" - only "Mia". And Abba wouldn't have struck me as something RRCulture would play.

Well you learn something new every day - and I've also discovered "playlists"! At 1:20 pm RRCulture broadcast "Amor sound. Abba".

Abba is culture - sheeesh!

Topic: 40190 Message: 40190

Hi,

I've got quite a few recordings of what are almost certainly Middle Eastern stations that appeared at the same time as reception from Israel, Lebanon and Jordan - but I'll just post the ones that intrigue me the most.

These I just can't get a 'handle' on the languages. The one with the male voice is 3 minutes long but the main action is at the beginning where there appears to be an id and the word Salaam (or Salaam) is said twice. Then R Deejay fades in again and the unidentified station only appears intermittently for the rest of the time

https://app.box.com/s/fmlii7a02iafs8e4n9v5ookm4v0sdlzb
https://app.box.com/s/fmlii7a02iafs8e4n9v5ookm4v0sdlzb the music sounds vaguely Indian as does the voice - and there is a Radio Salaam in the UAE - broadcasting in Tamil. Frequency 90.4 MHz. The station faded up at the same time as HRV faded up on other frequencies - but I don't think it is the same language.

This one on 89.7 MHz is close to when Israel and Jordan were logged - a woman is translating from another language (male voice). So it could be a double-hop exotic

https://app.box.com/s/2kywqxtkzyp1py8tol49svysw8wabn0h
https://app.box.com/s/2kywqxtkzyp1py8tol49svysw8wabn0h

Just identifying the languages would be interesting

Thanks for listening (and hope it posts in a timely manner)

David

Hi Dave.
90.4 is actually Albania FM. I recognise the OM announcer and style. It's a Muslim radio station hence some words of Arabic are often spoken. Here's my recording of this station from June this year. Listen to the OM who starts at 1 min 25; it's the same as the one at the start of your clip:
https://app.box.com/s/uxbhutecu6vicisy46omkj3rypc29sfr

89.7 sounds like Hungarian. Probably Mária Rádió Erdély from Gheorghieni in Romania.
Sorry these aren't double-hop exotics.
 Good DX.

Nick, Whitchurch, Hampshire.

Hi Nick,

You must have a good memory for what you've recorded. It sounds like the same OM - but the giveaway is the haunting melody just before. So that fits in with the fact it faded in at the same time as other Balkan stations.

Strangely the Alabanian stations sound a bit Italian to me.

Dvid

I am on the Lincolnshire coast (Mablethorpe) I have been getting weak E's 87.9 and 88.0 over most of the afternoon on the car radio. Language sound Sounds like Eastern Europe. Not strong enough to RDS though.

Some scatter mainly from the west about too. Surprised to hear Ireland RTE Mount Leinister 89.6 and 94.0. Bleanpwlf 95.3 also audible under these flat conditions. I am taking advantage of this clear band location. Going to try Huttoft car terrace over looking the sea tonight.

40197. Band II Sporadic E Loggings for 8 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-08 19:57:58 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40197

Hi All,

Another day with a prolonged Sporadic E opening. Today with the MUF more easily reaching Band II, the skip area mainly towards the Iberian peninsula. In the interbellum between the somewhat bigger openings into Portugal and Spain, Algeria was audible from just one or two locations for almost an hour. With the propagation behaving more like tropo than Es.

Regarding the Es propagation, August seems to be trying to make-up for what June and July have failed to do.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi - "Salaam" was a red herring - it turns out that it was an Albanian Radio station - see Nick Gilly's post/recording.

It's nice to know that there is a DXer in the UAE - you will probably be able to provide infor about quite a few stations within that part of the world.

Thanks

David

Thank you Kurt.

Are there any in here not from Istanbul I should be concentrating on?

Thanks if you can let me know.

John

40202. PI Code 1313 - 90.40mhz

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-09 07:36:47 UTC
From: BEAVEN SIMON
Topic: 40202 Message: 40202

Does anybody know which station (probably in the Valencia area) is using PI 1313 on 90.40mhz ?

Heard last night when everything else around was from Valencia at 18:35 with what sounded to me like East European rock music (I could be wrong on that though).

thanks

Simon

40203. Re: [SkywavesDX] Skywavesdx.org down ?

Further to the hosting problems:

Nothing has been changed by ourselves. http://skywavesdx.org/ has now collapsed completely. Our hands are tied. There have been php version issues with the hosts for some time and they seem unwilling to offer any solution, so new hosting options are now being considered. We hope to have the forum online again in the next few days.

A full database backup has been taken and so we anticipate the forum will resume exactly as it was prior to the failure.

Seems to be Radyo Mehtap transmitter from Edirne. This network was closed
by authorities in July.
regards from Istanbul

From: Hannu Piirainen
Topic: 40141 Message: 40210

Moi. I _clearly_ hear "amor" RadioRomania Cultural audio ID. They had a px
that time called
which started 13:20local time (=1020z-till 1100z) "Amor sonor. Abba cu
Monica Gurău-Mihalache".
They play AdultContemporary mx as their format says, they are not anymore
in Ceausescu
time. 5th of Aug, we had two paths condx, one towards south-west and one
almost the same time towards south, that time BUL, ROU, MDA, TUR were
audible. I was on that time listening too, ROU was going, no sign of Spain
here.

my two cents,
Hannu

From: ilkka suni
Topic: 40141 Message: 40211

Hi David,

Thanks a lot, for commenting. And thanks to Alessandro, I forgot to thank him.

Now, this just might be the major blunder of my 40 years in FM-DX. In Lahti, Finland, a few guys had a big laugh over the weekend. Then again, I am a linguist, I used to study languages in university. Then again, yo hablo solamente muy poco espanol.

Listening to the man's intonation, to me he is spanish and he says either "Amor, sonor, la radio mi a cultural" or "Amor, sonor, la radio unica cultural", or something like that. I cannot get "Radio Romania Cultural", out of the clip.

I had the recording listened to, by a person born in Spain, though lived in Finland since late '70s. He was willing to admit, he is not sure what the man says, whether it is Spanish at all, yet he did not dispute my interpretation "amor... la radio unica cultural". Then again, he is not a DXer.

The time I received the station, my 8-ele yagi was pointing in my some 230...240 degrees, and I had no reception on other frequencies whatsoever, that is why I returned to 89.7 with its Abba [the only frequency audible, in those 4 minutes]. After this very reception, my band was totally dead. Less than 10 minutes earlier, I had been receiving 88.8 RNE 5 Zamora, coming in more or less steady, for 5 minutes or more, from the very same azimuth my suspected spanyard operates [in my 242 deg.].

I have received Radio Romania Cultural, if not hundreds or thousands of times, both on AM and FM. I cannot recall them playing two Abba [most triumphant pop-group from Sweeden] songs in a row.

I suppose, Alessandro is right. I got spaced out, big time, just being exhausted, tired.

In last few years I have noticed, my ears no more co-operate with me, there is a major loss of higher frequencies. In say last two yeras or so, I also have noticed my ears get blocked when listening to DX constantly for hours and hours. With all this FM white noise, I have noticed, I tend to lose just about every crucial notes. It takes hours before my hearing recovers, after having spent hours with FM noise in the headphones.

I suppose, I have to listen to Radio Romania Cultural, next Friday between 10 and 11 a.m. Z, to find out what kind of programming they are airing on Fridays. Only, just came to think of it, I have "a

friend" at Romania Foreign Service, I just might deliver the clip to him.

73, ilkka

40212. Band II Sporadic E Loggings for 10 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-10 19:47:47 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40212

Hi All,

Yet another good day for Band II Sporadic E DX. Again towards Spain and Portugal, plus some from Morocco. August is in a better shape than June and Juli have been.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

40214. K6STI 5-el Yagi - is this ok without a rotator

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-11 11:04:31 UTC
From: alex_cator_mmi@...
Topic: 40214 Message: 40214

I've asked this question on skywavesdx.org, but as that's down at the moment I thought I'd ask here too.
My Triax FM3 is now quite old and tired and I'm not getting the signal strengths I used to get from it (maybe water damage?). I'd like something with more gain (and F/B maybe?) to replace it and my parents won't let me get a rotator, so I shouldn't have something with beamwidth too narrow that I'll miss DX just slightly off the beam.

I really like the sound of the 5-el K6STI Yagi from HS Publications, but would the beamwidth be too narrow to be used without a rotator?

40219. overnight classical music. From where?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-12 15:50:00 UTC
From: pe1etr@...
Topic: 40219 Message: 40219

At 00:11 UTC , today Friday 12-08-2016, I received classical music in parallel on:
87.6
87.7
87.9
88.2
88.4
Via meteor scatter (Perseids)
I suspect Finland, Norway or Sweden.
Anyone know which one?
I use a mobile phone for internet so it is difficult for me to check schedules and podcasts.

Thanks
Peter Wilson Blackpool UK

Hi Peter. Very likely YLE Yksi from Finland as AFAIK this is the only network that would play classical overnight. There are high-powered txes on all those frequencies.
 Good DX.

Nick, Whitchurch, Hampshire.

Slightly harsh, perhaps.

I thought Nick’s answer in offering an opinion was well reasoned.

Without actually hearing the clips, I don’t know how useful anyone else’s input would have been….

40223. Two new / unidentified Slovakian Stations?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-12 19:33:18 UTC
From: John Faulkner
Topic: 40223 Message: 40223

Received today via the Perseids:

103.0 PI = 5201. Received several times, but the language was not Italian. It was more like a central European language and I suspect Slovakian. Presume a new SRo1 outlet.

105.8 PI = 5208. Again, heard with a central European language, guessing at Slovakian. Nothing comes up. A new Slovakian station?

Good DX!

John

40225. Questions to the FMLIST UK editors, and all other UK members

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-12 22:05:00 UTC
From: Günter Lorenz (FMLIST)
Topic: 40225 Message: 40225

I've made a lot of updates today to FMLIST from the latest OFCOM file,
including name changes for CR and other stations, e.g. "More Radio".

These two stations do not appear in the OFCOM file:

Leith (North Edinburgh) 98.8 Castle FM
Reading 95.6 1Ummah FM

But I haven't found any indication elsewhere that they are not active.
Any pointers are welcome!

Thanks + 73,
Günter

August's Communication magazine from BDXC reports:

"Ummah FM has closed The Muslim community station in Reading on
95.6 MHz announced on its Facebook page that it was closing on 31
July after nearly five years on the air. It started out as a temporary
Ramadan RSL, but in recent months has struggled to produce enough
local programming for a full-time community station."

Regards

Stuart

40229. Re:: OIRT waterfall lat night during Perseids

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-12 23:26:52 UTC
From: davebunyan@...
Topic: 40218 Message: 40229

Two very fascinating pictures - I note quite a number of reflections lasting 3 minutes. Unfortunately for me I have managed to achieve nothing in the last two nights on the 88-108 MHz band. It is completely different to the previous year. Tonight at around 2045 UTC I actually saw ONE meteor in twenty minutes with clear skies and one man-made satellite at 2055UTC - very disappointing. Four years ago we saw twenty or more in one hour.

David

Topic: 40214 Message: 40230

Hi Alex,

I saw your orignal post and would have replied if the site hadn't gone down - and too many not-radio things going on to reply now.

One question that will help me make suggestions - where is your FM3 currently mounted - roof?, side of house? pole in the garden ? - there are ways of getting round not having a rotator - it depends where you can mount the aerial.

What is the objection to a rotator?

When I see your reply I go into detail

David

From: Andy Pritchard
Topic: 40232 Message: 40232

Hi All

A very active shower this year:

http://www.fmlist.org/fm_logmap.php?datum=2016-08-11&omid=1419&band=MS
http://www.fmlist.org/fm_logmap.php?datum=2016-08-12&omid=1419&band=MS

Waterfall example:

http://www.apritch.co.uk/PerseidMeteorScatter.png

I also managed to photograph a Perseid meteor

Very good to hear Andy.

It's been an interesting shower here this year and with mixed results, but the peak was very good and may have produced my largest single day meteor logbook ever.

Sky visibility was zero overnight on the 11th 1nd 12th. We had clear blue skies and excellent visibility during the daytime yesterday, but it had clouded over come late evening, so very disappointing in that respect. We were looking forward to going down by The Wash yesterday around midnight to get a good sky view, but the cloud stopped that.

The sunrise period, often the best period for meteor scatter DX, was disappointing on both the 11th and the 12th. The peak of activity came during the mid to late evenings.

I still have a few recordings to check through. Hopefully I will post a log soon.

Cheers

John

From: John Faulkner
Topic: 40234 Message: 40234

New servers have been found to host the SkywavesDX forum, so we anticipate this will up and running in the next few days. We're just waiting on the domain transfer now, which is taking longer than we had expected.

John

From: davebunyan@...
Topic: 40232 Message: 40236

This year it is my turn to be disappointed - I don't think there is anything wrong with my asetup which is unchanged from last year. After all IRN, IRQ, ISR, JOR, LBN on SpE must say something. But the Perseids were practically dead. I don't mean that I couldn't resolve RDS - I mean there were practically no meteors traces on the recordings. I do have a problem with the evenings as some street light is causing interference as soon as dusk falls - but I thought I was OK at the upper end of the FM Band as tropo signals don't appear to be adversely affected.

The skies were clear at my daughter's house so we spent 20 minutes watching - just one 'feeble' meteor was spotted. About four years ago when on holiday we saw loads and heard them on my Techsun PL-390.

Oh well - I think as a lat ditch effort I'll record the OIRT band for a while this evening.

David.

40237. Band II Sporadic E Loggings for 13 August 2016

Hi All,

A nice Band II Sporadic E opening towards Italy this morning. Fading was slow and the skip area was confined and stationary. Very much unlike all other openings towards Italy this season. A shame things didn’t last a bit longer.

The Es activity in August is unusually high.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Greek stations general appear to give a pi code with a relatively weak signal.I've a few more files to check - and I'm falling behind with logging the recordings.

So far August has been quite good - but the signals are not as strong as earlier in the season - which might not be a bad thing.

David

Hi Dave, folks,

EVEN THOUGH THE Perseids are the most visual yearly meteor shower over here in Finland, it never struck me as the ultimate chance for radio monitoring. There are a couple of showers I prefer better.

The massive logs pretty much demonstrate how fruitless MS monitoring with an old-fashioned stereo tuner, a single frequency at a time, is. Still, as a DX-listener I am quite satisfied with just the four voical ID's I caught, so far. There is plenty more to expect in the aftermath, after the actual shower peak. Some meteor showers almost die to them locally peaking, yet with the Perseids I am expecting some big rocks and major slides in the aftermath.
.

IN FINLAND, us listeners every now and then have discussed the propability of meteor dust forming Es clouds.

I usually have my antenna pointing at the very direction I am wishing to receive, while doing MS monitoring. Yesterday noon, Saturday the 13th, my 8-ele horisontal was beaming at my south-east, as I was looking for the OIRT-Es to reach CCIR-FM. At 0926z, there was this huge blast lasting for some four minutes, carrying stations from D, CZE and SVK with strong, durable Es-like signals, even though my antenna was pointing at a wrong direction.

I believe, the meteoroids at that time were mostly hitting the Earth's atmosphere in the region, the OIRT Es cloud supposedly was floating. A pity though, I did not take a screen shot of the current DXmaps situation.
,

JUST FOR AN anecdote, I seem to have this curse with 88.3 Nordwestradio. Along with PR 1 Poland, the most regular MS pinger for the frequency, yet rather seldom via Es to me [Es usually carries the Bavaria region germans to me].

Yesterday, the curse hit me once again. What a nice long slide, a beautiful ID with promos, and I just cannot figure what happened: the ID was not on my cassette tape [a cassette tape deck, yes, yes, I know, I know...]. I kept winding and rewinding the tape, no Nordwestradio. The tape deck I currently use is a quick reverse model, so I figured at some stage I must have pressed the tape direction button, by accident. I removed the cassette from the tape deck, to later listen to the tape's both sides.

This morning, I set the tape in another tape deck, to listen to while also live monitoring MS. First, the tape got stuck, then entangled around the deck's direct-drive capstan. The next phase of course was, while trying to solve the tape I dropped the cassette on the floor, with multiple feet of tape mess lying around. As a result, I ended up with the tape tightly twisted around itself, while I was trying to reel the tape back in the cassette [a pen, a screw driver, and just a hand or two too few, to hold the cassette shell itself].

As a result, having gotten hundreds if not thousands of pings by Nordwestradio, I still don't have a decent MS-ID safe, if one is not on my tape disaster. In the last four years, similar mishaps occured with the very Nordwestradio, every time I noticed meteors carrying me a complete ID. I had the audio cable to the laptop disconnected, I had the cassette tape deck recording on pause, the cassette tape had just run to its end, and so on...

Anyhow, I am pleased I got finally this neat MS-ID by 103.0 BFBS Bielefeld:
https://app.box.com/s/vxh54vuqoxu961pgntkwnqqr8ceb0e73
.

OTHER ISSUES. I recently enquired for an alternative audio file storage, to box.com.

I have the box.com working, finally. It seems, they have changed the platform rules. One's browser must accept pop-up windows, as well as every single 3rd-party cookie, for the site to function. This gives me enough reason to quit using the box.com. Then again, nothing comes for free, in this world. Anyway, you change your basic browser settings, and it's just a matter of time your PC eats up the malicious script.

I believe, the box.com is just another platform for advertiser, to find ways to get through to people blocking banners, scripts etc. Otherwise, the very site would not be free for users.

Don't forget that multiple German classical networks may carry the same overnight classical concerts. To confuse things even more, classical networks in other countries can also carry that programme. I have heard the same overnight concert aired simultaneously by the UK (BBC R3), Germany and Norway!

Hi Peter, folks,

As a reminder only, these broadcasters are the ARD affiliates:

Bayerischer Rundfunk
Hessischer Rundfunk
Mitteldeutscher Rundfunk
Norddeutscher Rundfunk
Radio Bremen
Rundfunk Berlin-Brandenburg
Saarländischer Rundfunk
Südwestrundfunk
Westdeutscher Rundfunk
Deutsche Welle
Deutschlandradio

I considered Nick's recent response quite
adequate. He was right, in Finland there are 30
kW Yle transmitters on the frequencies mentioned,
casting the programme Yle Yksi.

I believe, Sveriges Radio SR P2 of Sweden still
carries Nattklassik of classical music, or have they quit the very programme?

40246. Re: [SkywavesDX] Re:: K6STI 5-el Yagi - is this ok without a rotator

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-14 13:05:21 UTC
From: ilkka suni
Topic: 40214 Message: 40246

Hi Dave, Alex,

I am not sure how wide the 5-ele beam is, even
though the Triax FM5 I bought four years ago, in
horisontal appeared to cover just about 360
degrees with no gain in any direction [Triax FM5,
the biggest joke for an FM antenna I ever
encountered, the very antenna even exceeding my
8-ele Visi of the 80's, in lousiness].

For horisontal, my 8-ele yagi [VKN of the 80's
Finland] efficiently covers a spread of say 30
degrees. The efficient coverage somewhat depends on the propagation mode:
Single-hop Es allows the antenna to be even some
30 degrees mispointing. Horisontal tropo
reception excuses say some 15...20 degrees only.
For vertical, the 8-ele is even more strict, even
though my 8-ele vertical still is down after storms past.

I suggest, Alex negotiates a rotary outcome. Some
30 years ago I realised, fixed mounting for an
8-ele yagi is a no-go: the antenna, the pole, has to be rotary.

I'm a new member of the group, but have been following the group for a number of months now and enjoyed everything from all members far and near. So hello to everyone! So here is my one-an-tuppence worth.

Receiving BBC2 on 88.1 most days here from my location of Tipperary town from N. Hessary Sometimes conditions are favourable and I get very strong signals particularly on August 11th after midnight it was very strong but most days there is weak signal just about resolved by de-tuning to 88.05 to ward off adjacent interference from RTE1

I use a 2m preamp that I de-tuned for band 1 and it seems pretty good and a very simple piece of wire outside at an angle of about 45 degrees to a galvanised steel shed. Perhaps the steel shed is helping me a bit?

As this is my first post I expect it will be a few days before it reaches the group.
Regards to everyone from ROI
Liam

The Triax FM5 is a decent antenna for the price and compactness. If yours is not showing any directivity, then there is an installation problem.

Subject: Re: [SkywavesDX] Re:: K6STI 5-el Yagi - is this ok without a rotator

Hi Dave, Alex,

I am not sure how wide the 5-ele beam is, even though the Triax FM5 I bought four years ago, in horisontal appeared to cover just about 360 degrees with no gain in any direction [Triax FM5, the biggest joke for an FM antenna I ever encountered, the very antenna even exceeding my 8-ele Visi of the 80's, in lousiness].

For horisontal, my 8-ele yagi [VKN of the 80's Finland] efficiently covers a spread of say 30 degrees. The efficient coverage somewhat depends on the propagation mode:
Single-hop Es allows the antenna to be even some 30 degrees mispointing. Horisontal tropo reception excuses say some 15...20 degrees only. For vertical, the 8-ele is even more strict, even though my 8-ele vertical still is down after storms past.

I suggest, Alex negotiates a rotary outcome. Some 30 years ago I realised, fixed mounting for an 8-ele yagi is a no-go: the antenna, the pole, has to be rotary.

At 02:31 13.8.2016, you wrote:

Hi Alex,

I saw your orignal post and would have replied if the site hadn't gone down - and too many not-radio things going on to reply now.

One question that will help me make suggestions - where is your FM3 currently mounted - roof?, side of house? pole in the garden ? - there are ways of getting round not having a rotator - it depends where you can mount the aerial.

What is the objection to a rotator?

When I see your reply I go into detail

David

Hi Stuart,

The topic is slipping to OT, especially as the Triax FM5 is no more available.

I am not sure I get what you mean by installtion problem. I have been
installing my FM antennas starting from the 70's, experienced a few
of them and quit in the 80's after comparing four 8-ele yagis with
each other noticing, the 8-ele VKN was the best a man could get for an 8-ele..

The Triax FM5, I have been positioning in different places both
horisontal and vertical, up to 40 ft. agl, ending up with the same
result: a piece of junk.

Well I have two in H and V orientation and there are other lads who have FM5s which work well. QED - you must have installation problems.

Stating there is no directivity means you have an issue - the FM5 has a reflector and three driven elements. Mine shows directivity - must do otherwise we are defying the laws of physics.

Stuart

Hi Liam,
North Hessary Tor brings back memories for me! Years ago when I lived in Stroud, Goucestershire I was interested in TVDX and besides all the multi standard TVs I had I kept an old 405 lines TV to monitor "local" conditions and could receive BBC1 from NHT all the time on just a band 1 dipole.

40253. Band I Sporadic E Loggings for 14 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-14 18:46:22 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40253

Hi All,

A run of the mill Band I Sporadic E opening today. How different compared to what went on in South East Europe. Again! The number and magnitude of Es openings in that region is mind boggling. Which brings me to the question if this year is just another year or is this year exceptionally good?

I know there are some DX-ers from Hungary on this list, maybe they can tell a bit more?

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Hello Liam
Welcome to the group. I live in county Waterford on the R672 road about halfways between Clonmel and Dungarvan. If you are getting BBC R2 on 88.1 you may also be able to receive BBC R3 on 90.3, BBC R4 on 92.5, BBC R1 on 97.7 and BBC R Devon on 103.4 as all these stations transmit from North Hessary Tor.

Topic: 40214 Message: 40256

Hi Dave, Ilkka and Stuart,

Thanks for your help. My FM3 is mounted on what was the washing line pole (I'd guess about 1.5 m tall) in the garden. I can easily loosen the bracket and rotate the aerial by hand to any direction.

I only have enough money to buy the new aerial itself and coax, therefore I can't afford a rotator.

I've had no problems using the FM3 without a rotator, which makes me think that its beamwidth (apparently around 35 degrees) is fine. The Triax FM5 and Antiference 1085 (the latter still available) have 27 and 28 degree beamwidth respectively, which are slightly narrower than that of my FM3. Is the K6STI Yagi more directive than the FM5/1085 or about the same?

Alex

Ikka - A small Yagi like the FM5 has only moderate directivity when mounted vertical, though it is quite useful at >90°. Mounted horizontal it has all the directivity you would expect from an 'entry level' dx antenna, including the normal deep nulls at ±90°. "No directivity" means you have a connection problem, most likely the braid of the co-ax is not making contact ;-)

The simulated performance data is available in the Files section of this Group, including Peter Körner's suggested modifications to optimise the gain flatness and directivity, if you want to check what performance you should be getting
I have used Triax FM5s for the past 15 years or so, as well as Triax 3, 4 and 8, but I am sure the HS Pubs Small 5 would be better for Alex because of its exceptional F/B ratio across the band.

In the 89.7 clip at 0:20 a man says "Koje iskustvo..." in Croatian or Serbian, then the woman probably simultaneously translates into Hungarian. The language is Hungarian 100%. The station is probably Radio Marija from Plandište, Serbia. Radio Marija in Serbia has some of its programming in Hungarian.

Sorry, no audio samples are available as I have deleted the files. I can only store so many files for so long as I need the hard drive space for more meteor files ;O)

When I saw the 5201 PI code on 103.0, I automatically assumed it must be Italy. The signal lasted a few seconds. To begin, with I just assumed I was receiving the RAI-1 service from Menconico, as regular visitor via meteor scatter. I also assumed I must have been hearing an interview with a man whose language was not Italian. Then I heard the same station a few more times. Each time I was hearing a language which was more akin to Czech, Slovakian or even Hungarian. Then I received the PI 5208 on 105.8 and I so I wondered if there were new transmitters or some frequency changes taking place.

I probably won't do any more meteor scatter DXing now until the Draconids or the Orionids in October, but I will keep a close eye on 103.0.

Thanks.

The good old ‘Armstrong method’, as far as pointing in the right direction is concerned, a compass (especially the Silva variety) would be very useful.

Here is a comparison I did when my Triax FM5 was brand new, in August 2013. The Triax versus the almost-30-year-old 8-ele VKN, with its coaxial feed being almost 30 years old, too.

The antennas stood on separate poles, both roughly in 10 metres above ground levei. The station is 105.1 [EST] Eesti Raadio, Koeru tx 6 kW, 280 km, horisontal.

https://app.box.com/s/ix3uji44kz4hpn9j7n1t3fxanq8h01wr

I even tried three different kind of coaxial cables with the Triax, endig up with a similar result.

I have two Triax FM 5's one vertical and one horizontal and I find them ok here and as Julian pointed out vertical is less directional but it has more gain than my FM 3's have and more directional on horizontal.

Hi Alex,

Finally I get some time to answer your initial query. The compact yagi on HS publications has a 3dB beamwidth of +/-30 deg at 100 MHz according to 4nec2 results. It's wider at a lower frequency and narrower at a higher frequency. What is probably more important is that all through the band it has a better gain than a dipole at 40 deg - so that could be considered a usable beamwidth.

The difference between the one HS publications sells and the actual design on the K6STI website is that the one from HS uses half-inch elements and the K6STI uses 10mm elements - and it is important to remember that - if only because Brian Beezley doesn't want any comeback if the performance doesn't match the figures on his web-site.

My one has half-inch reflector and director elements - and having seen the size of the pigeons perching on the ends I'm glad I did that way!

When I first built it I put it on a 12 foot pole and did a direct comparison with an FM3 - F/B ratio was so much better especially at the low end.It performance was good and I checked front-back ration right the way from 89 to 107 MHz on local stations.

When you can afford it - and if the washing pole is really solidly mounted you could clamp a 16ft pole to it and get the aerial that bit higher. You need a great circle map centred on East Harling to work out the best beam directions - I've run one from the N6ST web-site and it is attached. It looks like 110 deg will cover a huge chunk of Europe - you can work the rest out yourself. You may be able to get a second hand scaffold pole and suitable clamps - and the good thing is - it will be easy to slacken and rotate and dropping it to horizontal if severe weather is predicted is also very easy.

Now here is the 'sneaky' thing you can do - you could check that your FM3 is OK - and find somewhere to mount it in a fixed direction - pointing south would be good for SpE - and then you've got a huge coverage.If it is a Triax FM3 you can lengthen each half reflector element by 2 inches / 50 mm and improve the low end F/B ratio quite a bit - the antiference 3 ele had the right length elements and swopping those onto the FM3 did make an improvement - so simples!

If you can persuade your parents they really need to have an outdoor FM aerial for good stereo radio then you can put a two way splitter in the lead at a suitable point. Pointed at Talconeston you'd then be covering the North-East (an

Just a few throw-away thoughts - step 1 being to get the aerial

40271. Algerian PI codes

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-15 21:35:46 UTC
From: Günter Lorenz (FMLIST)
Topic: 40271 Message: 40271

Algeria started using PI codes this year. They are following the rules, using 2201, 2202 and 2203 for their national programs, and 24xx for the regional stations. In many cases, xx corresponds to the region number in FMLIST - which is nothing else than the official numerical code: https://en.wikipedia.org/wiki/Provinces_of_Algeria

However, two recent observations spoil the picture:

Miquel from Spain reports Chaine 1 on 102.7 with PI 2416 - this must have been the high power Tessala transmitter, which used 2201 before.
Also from the Tessala transmitter, Chaine 2 on 89.6 was reported recently in Belgium with PI 2417, which I could confirm today (I'm currently in Liguria, Italy, and there are nice tropo condx).

I don't think these are regional PI codes. Perhaps Tessala is simply testing some new equipment.

73,
Günter

Alex, is there any chance you safely extended the pole? Can you insert for instance a steel bar, steel pipe inside the pole? 1.5 meters might work for Es and MS, but for tropo reception this is rather low. I believe, the minimum height recommended, for tropo reception is some 8 meters [24 ft.] above ground level.

My motto in the last 30 years is, nothing less than an 8-ele and nothing lower than 10 meters agl ;)

PI Code = COAD

PS Name = EndeavFM

So far I am unable to find out if this is full time/permanent or just a short-term RSL.

It's not mega strong and I have to beam directly at Boston with the 9.2 vertical, to get RDS - it's a struggle even then.

They are currently testing and announce an on-air date of Monday 22nd August.

Hopefully just a short-term RSL as I like my empty band. Nice to hear something local though. Boston is 21 miles south-west by road.

I suspect, the balun somehow is defective. Either that, or otherwise the 8-ele VKN just is a superior performer compared to the Triax FM5, the way the yagi by VKN clearly beat the other 8-ele yagis I compared it to, 30 years ago [Funke, Visi, I cannot remember which make the fourth yagi was, I had in the comparison].

First thing I did with the Tirax FM5 before assembling the antenna, was I removed the balun card and cleaned all the connections,

Looking again at the original old Triax FM5, there could be some support for Ilkka's findings.

At the low end, F/B is only 6dB, and mostly around 12dB elsewhere. Especially if used in built-up areas with reflections from surrounding buildings, the experienced directivity may not be very impressive.
If mounted vertically on a metal mast, F/B actually turns negative(!) at the low end, and is only 4-6dB at higher frequencies.
Also, the fact that the high SWR is made worse by metal mast interaction, increasing from 2.7 to 8(!), doesn't help.

BTW, the Triax FM5 is only 18cm shorter than the 9.2.

You need to change your modelling software…

An empirical test with a vertical FM5 on a metal mast showed the F/B ratio is positive when listening to Skyrock 87.6 MHz in Castelnaudary JN03XH. Forward azimuth is 274 degrees whilst backwards is 86 degrees; distance 24 km.

I don’t transmit through the FM5 so SWR is irrelevant…

> An empirical test with a vertical FM5 on a metal mast showed the F/B ratio is positive when listening to Skyrock 87.6 MHz

By how much?

The exact value will depend on where the mast connects to the antenna boom (and the mast height). Too often this is done close to the center of the boom. Better would be near the reflector on a FM5. The best would be behind the reflector, if mechanically possible...

> I don’t transmit through the FM5 so SWR is irrelevant…

Antennas behave the same whether you receive or transmit. SWR causes mismatch loss that can be easily calculated.

> You need to change your modelling software…

I don't think so.

Peter

(1) About 4 dBf as indicated on XDR-GTK display.

(2) Boom passes between first and second reflectors from driven element. Mechanical stability and balance is very important here in western Aude as the winds are very strong.

(3) The transmit paradigm is different to the receive. In TX you want to transfer maximum energy to antenna hence low swr. In receive paradigm you want to maximise signal+noise /noise ratio – hence excellent antennas can have very high swrs.

(4) The modelling software should change to reflect the empirical results observed. At least that’s the way we did it when I did my engineering PhD…

From: davebunyan@...
Topic: 40214 Message: 40296

Adding two inches/50mm to each end of the FM5 reflector brings up the F/B quite nicely! I'd read this on a post sopmehwere and was able to quickly verify this by substituting the relfector elements from an antiference 3 ele to the Triax - at the time testing on a 12 foot pole.

4nec2 modelling software says you lose 0.5-1dB F/B in the mid-band when you do it

David

This is also Saint Brieuc Dave. The program for this QRG is Hit West. It runs 2 kW, the 87.9 MHz tx has 1 kW. Both v-pol.
The exact tx location is Plérin/Rue du Stade-Stade Marcel-Gouédard, Château d'Eau (22).

40306. Al Aan FM: Libya, Syria, Iraq

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-17 18:25:21 UTC
From: Günter Lorenz (FMLIST)
Topic: 40306 Message: 40306

This info comes from someone involved in setting up the transmitters.

--quote--

Al Aan FM is radio station operating in Libya and parts of Syria. It claims to "aim for freedom of speech in both Syria and Libya".

Al Aan FM in Libya
In Libya, Al Aan FM uses 105.3 MHz across the country, covering the following cities:

Al Bayda
Al Marj
Benghazi
Misrata
Labraq
Nalut
Sabha
Susah
Tobruk
Tripoli

Al Aan FM in Syria
In Syria, Al Aan FM is available in the following cities and frequencies:

Al Bukamal 96.6 MHz
Aleppo 96.6 MHz
Atme Camps 99.7 MHz
Azaz & Afrin 96.6 MHz
Al Bab & Manbij 104.4 MHz
Damascus 96.9 MHz
Daraa 98.2 and 99.4 MHz
Hama, Homs 97.6 MHz
Idlib 96.6 MHz
Latakia 96.3 MHz
Qamishli & Amuda 97.6 MHz
Quneitra 98.2 MHz
Suwayda 98.2 and 99.4 Mhz

Al Aan FM in Iraq
In Iraq, Al Aan FM is available in the following cities and frequencies:
Mosul & Dohuk 98.5 MHz
www.alaan.fm

Thanks JJ
Good to hear from you. I'm able to receive those other BBC frequencies on a good day also. Although today was pretty bad as regards reception. I might tinker with a beam some time or try out a 2/2 yagi array for DTV from carradon Hill. It's a long-shot though. Cheers

Thanks Liam,

I always read Roger's columns in Television and wrote to him every month. He worked for Southern TV and later TVS and I was lucky enough to meet him when TVS did an OB in Bexhill. Before I moved down here I lived in Stroud and would often receive RTE 1 & 2 on VHF and UHF - a few pics of RTE are in this album...

Thank you John.

I logged Skala FM on 107.9 shortly after this, but I was convinced this recording was of something else.

Yesterday evening, 105 - 107.9 was a soup of Danish local stations. Several were logged on some individual frequencies. This was possibly the best Danish opening I have heard to date.

Best DX.

John

Thanks Tim
I thought your name was familiar to me so I checked back some past issues of Television magazine (yes I still have some) I see you in August 1993 and again in January 1989....My thanks to .....and Tim Anderson (St. Leonards)!what a small world. It's interesting you actually got to meet Roger. It would have been an honour for me to have met him. I used to read all his articles and have his TVDX book as a teen. Shows how the generations change. Nowadays I'd say teens have more interest in finding that Pokeman guy with their phones! Interesting stuff Tim and thank you. If you need any of these old copies of TV magazine Iwould be only too happy to post them over to you. Let me know
Cheers

Hi all, Sorry for the late reply. Cheers for the recommendation of the K6STI 5-el Yagi, Julian! That definitely sounds good if the beamwidth is about the same as any 5-el Yagi.

By the way, what is the 3 dB beamwidth of the Korner 9.2 just to compare?

Regarding the antenna height, I'll definitely think about having it higher because tropo is one of my main modes. That would be really good if it increased the scatter performance too.

Alex

  Nick,
87.5 (presumed) could well be Dynamis Radio from Madrid. It is a religious station & the subject spoken in the recording matches the format of the station.
88.2 (presumed) sounds like RNE Radio Nacional also from Madrid. The person doing most of the talking sounds more of Latin American origin & he is going on about the theatre scene in Spain. The presenter of the program has an accent from Spain.
104.9 (presumed) might also be RNE Radio Nacional from Madrid judging from the style of the program. They seem to be reciting some sort of children's book about a bear & the moon.

106.8 (confirmed) is Cadena SER from Jerez. There is the name of the program "A Vivir Que Son Dos Dias" @ 1:36 & the website for Cadena SER Jerez @ 1:47.
87.7 (confirmed) Spain is Europa FM. There is a mention of Juan Sanchez @ 4:09 who is presenter for the station. I would say this is from southern Spain as there is also a relay for the Madrid region.

Hi All,

A busy FM DX day yesterday resulting in a sizeable logbook. The Sporadic E opening had some good intensity for a while, with the MUF hitting the top of Band II.

Unfortunately there is still very little to hunt for on Band II towards Russia, outside of the big cities.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Hi All,

Today some Band II tropo had remained from the previous days. As I write this all has gone, swept away by a cold front from the west.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands.

Thanks for the offer on the old Television mags Liam. It would be great to have some again but I used to have a collection going right back to the days of the ITV experiments with external tuners being advertised for Band III - they just took up too much room and they had to go, I mustn't start collecting them again! I do miss those days of analogue TV and TVDXING. My best catch was Australian TV on A0 via F2 propagation. Happy days!

Tim

It's interesting you actually got to meet Roger. It would have been an honour for me to have met him. I used to read all his articles and have his TVDX book as a teen. Shows how the generations change. Nowadays I'd say teens have more interest in finding that Pokeman guy with their phones! Interesting stuff Tim and thank you. If you need any of these old copies of TV magazine Iwould be only too happy to post them over to you. Let me know

Just starting here. Mostly very weak, but Rangstrup, Holstebro, Sonder Hojrup, Bjerkreim, Bokn & Lyngdal now propagating.

Also Heide and Flensburg in norhtern Germany coming through. Delta Radio 105.6 now noise free and a tad below RDS level.

Good DX!

40344. AW: [SkywavesDX] FMLIST problem

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-24 23:07:19 UTC
From: Günter Lorenz (FMLIST)
Topic: 40341 Message: 40344

Ruud,
The only situation where the "clear" button is required is when you click on a location, and select another frequency from that location. In this case, the frequency gets stuck and only "clear" helps.
Actually the "clear" button is a workaround as I have not yet managed to fix the real bug ;-)
I've never experienced or heard of the problem you describe in other cases - but I can investigate: Next time it happens to you, please send me an email as soon as possible, and let me have your current IP address. This will help me to track your calls in the server log.

73,
Günter

From: Fast Logger
Topic: 40346 Message: 40346

Hi All,

I have a DVB-T+DAB+FM dongle which I use for ADS-B aviation monitoring on 1090 mhz with the RTL1090 software.

I am now testing HDSDR software with it (dongle and very tiny window-sill antenna sold with it) to catch some action on the most popular satellite bands , namely
137-150 mhz and 430-455 mhz, not much heard if anything so far even when heavens-above website reports ham sats passing overhead me like 80 degrees elevation.

Could it be that the antenna is not suitable for these frequency ranges ? Any idea ofwhat antenna could fit in niceline with the dongle's 'in' (sort of a jack in) socket to cover these spectrums (or spectra ?); also I would like to patrol the Satcom band (240-280 mhz) to see if there's any action from here, in Northern France.

Any ideas ?

Many thanks.

Pat

Hi Liam and welcome,
A horizontally polarised aerial would reduce the strength of the vertical-only RTE transmissions on 88.2 when trying to hear NHT 88.1 which is mixed polarised. Regarding the other frequencies from NHT, I presume 90.3 is more of a challenge, with an RTE R1 transmitter not too far away from you on 90.2 . in addition to the more distant RTE transmitters 0.1 higher...I'd expect 103.4 is much more difficult to hear, with lower ERP and more interference from other stations.

Your collection of Television magazines sounds interesting, I'd be particularly interested in reading reports of long distance reception of UK TV in Ireland (and vice versa) . Maybe you could get around to scanning some of the TV DX pages (if they are not online elsewhere) !

I used to buy Televison Magazine primarily for that column too. It is a real shame the publisher killed it off, when IIRC it was still profitable at the time. I've no idea what exists of the TV/brown goods repair trade these days...

Regards
Tom

> Thanks for the offer on the old Television mags Liam. It would be great to have some again but I used to have a collection going right back to the days of the ITV experiments with external tuners being advertised for Band III - they just took up too much room and they had to go, I mustn't start collecting them again! I do miss those days of analogue TV and TVDXING. My best catch was Australian TV on A0 via F2 propagation. Happy days!

Yes, I´m going through the visual logbook of FMLIST now. Autumn has begun with very great catches, and F5LEN´s maps predicted it! But it happened also in opposite direction: Today I could receive YLE Radio Vega (103.0 MHz) from Eurajoki. It is my first finnish log via Tropo and the distance is 1677 km! Yesterday I heared SR PR3 from Emmaboda (99.7 MHz, 1079 km). Equipment was a modified Grundig S 650 with telescopic antenna. Next time I should use my 19-ele aerials...73 de Matthias, DG4MHM (JN57PK)

Hi Matthias, folks,

I know the GS 650 for a superb FM performer as I owned both models, the GS 600 and GS 650, in the '80s. Still, your pull sounds absolutely amazing!

May I ask what your current altitude was, and how high was the radio above the ground level? What kind of modifications have you done with the GS 650? 30 years ago, the FM dial was so spacey over here in Finland, one could DX using the Satellit 600//650 as such, without any IF filter mod's. Today, even 80 kHz is far too wide a bandwidth for the local dial.

The very Grundig model still is propably my all-time favourite of the world-band portables I ever owned, even though I sold those two radios 25 years ago. Well, actually the GS 600//650 rather is liftable or movable, not very portable... Had the AM IF filters been easily modified, I suppose I would have kept one of the very Satellit receivers, along with my communications receivers. In hard-core DXing expedition conditions, it took a well modified Icom IC-R71E as well as a top modified JRC NRD-525 to beat my sensitivity modified GS 600, in MW performance as to sensitivity.

About the huge lift, yesterday Friday. One must congratulate at least three finnish listeners on their setting a new national record in tropo distance. Take for instance Austria, the country was never before caught via tropo in Finland. The lift did not reach my whereabouts in S.E. Finland, yet it was fascinating to follow these listeners spotting their personal best as well as the finnish tropo distance record, one after another. It was like witnessing some athletics sports event, like javelin throwers with their new personal best each round.

Actually, I am not sure who of these guys currently holds the new national record in tropo distance. I believe it was the 120 kW Zagreb transmitter, Croatia, setting the new milestone. Was it, one listener's distance to the transmitter is 1.647 [?] km yet the other

listener beat him by 4 kilometres in distance.

73, ilkka

Hi again, folks,

Jukka from Helsinki, Finland, kindly clarified to me, the new national tropo distance in Finland now is 1.691 km, to the Zagreb 120 kW tx.

Mind-dazzling. Matthias, just with the modified GS 650 and the built-in telescope reached for 1.677 km. I am not sure, but I gather the 1.691 km from Zagreb to Finland was recorded with the Sony XDR-HF1, a +20 dB mast-amp, about the antenna I am not sure whether it was a 9.3 or a 19.2.

Anyhow, a true lift for sure boosts, I guess no matter if you listen by your car-radio.

The lift of the decade to Finland, at least and for sure, so far.

73, ilkka

40364. Band II Tropospheric Loggings for 26 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-27 18:39:00 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40364

Hi All,

An intense Band II tropospheric opening developed in the course of yesterday evening. Producing many hours with fine DX, which went on throughout the night.

Below is the logbook for yesterday, part two covering this morning will follow shortly. As good as this opening was, it is shining pale compared to what has been going on in Eastern Europe the past couple of days.

Here’s hoping this is a pre-warning for things to come this autumn.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

40365. Band II Tropospheric Loggings for 27 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-27 18:57:35 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40365

Hi All,

This is part two of a big logbook from a very good Band II tropospheric lift today and yesterday. This opening produced several first timers, many stations reached RDS level strength.

And now I have to catch-up on some sleep.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

40367. Re:: Re: [SkywavesDX] Stunning tropo in Finland

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-27 22:30:46 UTC
From: matthiashornsteiner@...
Topic: 40363 Message: 40367

Yes, I was really surprised when I heared Finnish language here in the Alps. By the way, my QTH was not on a high mountain but in a gorge! Nevertheless, I could receive there Swedish stations as well. It was in February (!) when I heared Sweden, the maximum distance being 1462 km (tx Borlänge). I had the GS 650 with me, but I could hear all clearly by my car radio! This gorge seems to be a very special location for DXing, as it is obviously acting like a focal point.
The last DX conditions had to do with extreme warm air advection over whole Central Europe - the higher the dew points, the stronger refractivity gradients may occur. It would be insightful to evaluate the high-resolution radiosonde data. Unfortunately they are not available on the internet, but I will ask a colleague from the German Weather Service...

The intensity of the Tropo band openings since 2011 are really stunning. In June 2016, the radiosonde data of the Norwegian oil platform Ekofisk (North Sea) revealed a vertical N gradient of -248/100 m! Note that ducting occurs if the gradient exceeds -15.7/100 m.These high values are even remarkable for tropical regions, even though the region of Salalah (Oman) may beat such records easily. The strongest gradient known to me amounted to -763/100 m, but I would not exclude the occurrence of -1000/100 m...

40369. Tropo late evening 27/28 August 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-08-28 16:08:59 UTC
From: nick gilly
Topic: 40369 Message: 40369

A nice lift late yesterday evening down to SW France & northern Spain. Hepburn was predicting that the lift would peak this morning around 0600 UTC but when I checked on waking the lift had collapsed and conditions were flat.

Ok Tim
I can well understand that! they sure do take up a lot of room and I also have to get rid of them. I don't have any time or interest since analog tv faded away. there seems little or no point keepin' them. So If anybody is interested give me a shout and I'll try to send them to an interested party. It's better than slinging them in the bin
Cheers!

Hi Tom and thanks for the info. I can send you the magazines sometime if you like! it's up to you just let me know. I don't know when I'll ever get the time to scan them etc. but your welcome to them if you like. I've lost interest keeping them since analog is gone like the dinosaurs.
re NHT reception I find BBC 4 can also be goood at times and I'll check out a horizontal as you suggested and also the other freqs of RTE etc. I'm in the process of drywalling my shed and getting it all tarted up so I'll have a proper space in which to work; in time for the ever looming winter months ahead. So when all the work is finished I'll get a chance to do some proper DX'ing!
Cheers!

Jim has got the wrong type of connection in mind - the connection he is referring to would be for tapping the RDS data from after the demodulation to audio..

To tap the 10.7MHz IF from an analogue tuner you have to take an RF feed from after the tuner section - preferably before the first IF filter. You would need to look at the circuit diagram. You should use a very small value capacitor to tap off the signal to avoid loading and de-tuning the tuner.

There is plenty of info on the internet about "panadaptors" in general.

Dave,

No, I was not talking about RDS data or anything like that… but talking about a serial link to the radio to use the computer to sync with/control it.

For example, my Icom 8500 has a 3.5mm socket into which you plug an adaptor (CiV to serial).. that adaptor then plugs into a serial port (or serial<>USB adaptor) on your PC so you then use the PC to control it. I thought that was the question Miguel was asking.

Of course, I may have misunderstood Miguel's question, and he may have meant "how do I get my IF signal into my SDRPLay". If he did, then Dave is correct in his answer J

Topic: 40384 Message: 40384

Can anyone suggest an ID for this station heard this morning on 87.8 please?:
https://app.box.com/s/ff2mu8i75bqqj2s7qibvek5js8h15yjg

It peaked towards Brittany, so maybe Décibel from Dinan?
 Thanks and good DX.

Nick, Whitchurch, Hampshire.

From: pe1etr@...
Topic: 40349 Message: 40389

Hello Miquel.

You seemed to have missed something. The Pioneer is not connected to the computer. The 10.7 MHz IF is fed from the car stereo to the SDRplay. The SDRplay is connected to the computer via USB.

Peter

40390. Band II Tropospheric Loggings for 3 September 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-03 19:42:45 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40390

Hi All,

Yet another good Band II tropo opening today. We have seen a lot of them the last couple of weeks and the forecast for next week also looks promising.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

Saturday 3 September 2016

Nothing really new in this "news".
Just several days ago one Russian official has repeated that the date has moved from 2016 to 2018 (that happened more than a year ago).

More actual and relevant information about Russia: tx power decreasing for many analogue TV txs on all bands, usually from 20 to 10, 5 to 2.5, 2 to 1, 0.1 to 0.03 kW TRP. Not for all but the list is very long.

Victor

Hi All,

It is a matter of digging real deep, but then still some Band II tropo can be found. When is this massive high pressure area going to produce something interesting?

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

40412. New dynamic range improvements for Airspy

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-11 20:49:50 UTC
From: sdrsharp
Topic: 40412 Message: 40412

I think you might be interested to test the new capabilities for FM and TV DX. Basically, Airspy can now handle stronger signals while maintaining a good sensitivity. when using the decimation.
Get the update from http://airspy.com http://airspy.com

40413. StationList-M for Android

Yahoo group: SkywavesDX (2016 — 2017)

https://youtu.be/IOEM_KHazvk

Can anybody tell me which German station this is please? I received it during an Es event on June 9th this year. I assume it is Germany and not Austria.

Thanks

John

Scrub this. I thought this German station was received via Es, but it
was part of an ongoing tropo, so MDR Kultur.

Thanks anyway.

John

40427. Radio Mayak on 66.41 - location not known

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-16 09:05:16 UTC
From: davebunyan@...
Topic: 40427 Message: 40427

Received on 16th Sept - it was a weak signal coming and going for about 5 minutes - identified by the distinctive signature just before the time pips.

It is not in FMList - so if anyone has info please let me know

Thanks

David

40429. Fishing rod for antenna support

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-16 14:08:16 UTC
From: ilkka suni
Topic: 40429 Message: 40429

Hi folks,

Pardon my just blabbering.

As I am going through all kinds of temporary solutions with the Triax FM5 for a [temporary] vertical, I am currently running an experiment with a carbon fibre fishing rod. I extended the aluminium pipe by taking the second strongest and second thickest part of a 7-metre carbon fibre fishing rod. The very piece of the fishing rod is some 1.5 metres, 5 feet, in length which I suppose is enough to prevent the mast or rather the stick, to interfere with the antenna itself.

Do any of you folks have experience with [this kind of] carbon fibre pipes, rods, as to them coping with the windloads? What also bothers me is, how the carbon fibre rod might cope in winter-time winds with temperatures down around -25....-30 centigrade even. I currently put no extra support for the tip of the antenna stick, a couple of loose nylon strings only, to prevent the disastrous complex from coming down in the winds, the wind gusts so far having stayed below 20 m/s. My failure waiting to happen, currently stands on a camera tripod [for rotation] on the roof of my shack's porch extension, with the tripod on the roof being in some 4 metres above the ground level and the antenna itself hovering in some 8 metres agl [the proper, wavelength x 2].

What I just wrote might sound foolish, especially as I have been for years planning for a 9.3 to replace the storms-torn 8-ele yagi vertical. Decent tropospheric lifts just reach this S.E. corner of Finland so very seldom, I got frustrated enough years ago, to put serious effort in bringing down the 12-metre antenna mast, to renew and replace my old antennas. The Gulf of Finland always wears out them tropo lifts before they reach my location. Take for instance the year 2015, only on one day was there conditions to Denmark, while Norway kept silent all year. Also, only on one day in 2015 was there excellent tropo lift to Lithuania and Poland. The Russia direction, the local 30 transmitter pretty much eliminates, no lift overcomes and no receiver stands the field.

73, ilkka
[FIN - right by the Joutseno 30 kW]

I have found both SDRs to be very good for FM-DX. But so far, despite some coding to improve matters the Airspy has a poorer IF image rejection on the high side than the SDRPlay with API 1.95.

When beaming towards my local BBC transmitters it is enough to put a hearable image over a weak station - which isn't good for tropo.

Point to note:

Airspy is a low IF architecture so for a station on 93.5 with 10mbps sample rate the local oscillator is 5 MHz higher - so an image will appear on 103.5 if the signal is strong. High side rejection is at best under 60 dB - low side rejection is significantly better.

SDRPlay in zero IF mode will show strong image signals if I/Q compensation isn't used - on the opposite side to the centre frequency. With auto compensation the image of a strong station drops down to the noise level and is barely discernible.

I estimate that the SDRPlay with API 1.95 in auto mode is around 10 dB better at rejecting the zero IF image of a particular annoying local than the Airspy is at rejecting the low IF image.

So from my POV - although the AirSpy is reported as having a better dynamic range - I am not able to take advantage of it because the IF image problem will show up before the overload point.

So if you are close to a high power transmitter group in the lower end of the Band it is a factor to consider when choosing which one to buy.

Me I have both - so can take advantage of the best of both.

For info: Irag/Iran on the SDRPlay and Israel, Lebanon, Jordan on the Airspy this year - all weak signals
.

David

You are probably still using a very old version of the software/firmware. Check your things.

Thanks for the reply - I've been away for the week - so I have only just followed it up. I wasn't aware of the need to update firmware as well as software. So with 'heart in mouth' I followed the instructions to re-flash the firmware

I am now on build 1488 and r1.0.0-rc10 released 5 days ago. The image of 102.8 MHz is present on 108.8 Mhz if I use 6 mbps or 112.8 if I use 10 mbps. If I beam towards my local BBC group then I can find corresponding images on the high but looking on the low side the IF image is barely discernible. This is for signals about 65-70 dB above the noise floor. My rough estimate is that the image on the high is 'only' 55-60 dB down - but the image on the low side is at least 65 dB down.

But in a very interesting development with build 1488 - when I use decimation the high side image drops right into the noise and is barely discernible. The image on the low side is unchanged at 'barely discernible'. I noted this change in performance before I updated the firmware - so it is software.

That is quite a game changer - as generally when listening or scanning I use decimation (x2) - so IF images are no longer a potential issue If I am recording I run at the maximum sampling rate of 10mbps and can choose a centre frequency that drops any potential high side images onto occupied frequencies.

Thanks for the continued development work - all I need to do is re-install all my favorite plugins.

40437. Radio Sweden on 1179 this evening?

Yahoo group: SkywavesDX (2016 — 2017)

https://youtu.be/CwE1Q3ntQpY

Here's an unusual one.

This evening at 2100, I heard Radio Sweden's interval signal on 1179 kHz. This is long after they have vacated the frequency. Was I hearing a ghost transmission? ;O)

Checking MW List, I found a station in Sweden called Hörby Mellanvåg 1179 from Karlsfält (5 km S of Hörby). They have a listed power of 0.005 kW! That's just half a watt!

Two questions:

1. Would Hörby Mellanvåg 1179 be carrying Radio Sweden's interval signal?
2. Are they really using half a watt?

It certainly does look good. It'll probably depend on the exact path of the ex-tropical storm that is injecting a lot of warmth and moisture our way and probably boosting the tropo. F5LEN has the best conditions on Wednesday, which would be good if it came off as I have that day off. Good DX.

Hi John,

As a FM DX-er I may not be supposed to get involved, but I am hearing Radio Romania Actualitat.

If this was the wrong clip and you also got Radio Sweden, like Paul I would be interested to know if you indeed got a 0.5 Watt tx.

73,
Janpeter

Hello Paul and Janpeter.

As you may know I am always active on medium wave at this time of year. Conditions to Japan and other East Asian countries have been the best I have known, with several UK firsts in the bag. You can see recordings of this on my YouTube page at https://www.youtube.com/user/g1vvp

Regarding Radio Sweden, some interesting replies. Firstly, 0.005 kW is 5 watts and not half a watt. Thank you Julian for the correction. Still, at five watts it's equally as good as something of 10kW from 10,000 km in my book.

According to Christian on the MW group (I think that's Christian Stodberg?) Radio Sweden on 1179 have been active this weekend from the Radiomuseum in Hörby. So maybe my station is not a relay from Karlsfält. Or is that the location of the Radiomuseum?

Janpeter, you may have to listen with headphones, but the Radio Sweden interval signal is there under Reșița/Bacău. I only just spotted it myself.

An interesting catch and nice to get this if it's only a temporary station. It would be nice to clarify whether this is a special event station or if it was coming via the transmitters of Hörby Mellanvåg 1179.

Thanks all.

John

Thanks very much for this. Lebanon would definitely make sense for 88.0 as this is on a similar bearing to the Iranian reception. FMLIST only has Nostalgie listed from Lebanon on 88.0 though. Is this a new tx?
As for 87.9, I was wondering if it was more likely to have been coming from Syria rather than Egypt, as this would match the direction of the other signals. Egypt is a bit further round to the SE. FMLIST did have a high power station listed on 87.9 at the time of my reception but checking again it seems to have gone.
Other DXers received Iraq and SE Turkey during this amazing opening.
 Good DX.

40448. Re: [SkywavesDX] Radio Sweden on 1179 this evening?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-26 21:01:48 UTC
From: John Faulkner
Topic: 40437 Message: 40448

I emailed Radio Sweden to tell them of my reception. I wasn't wanting a
QSL card, but this was their reply, received in just a few hours:

Hello John,

Thanks for reception report and recording of the interval signal at top of the hour. Great!
QSL will be sent by post.

Power output is only 2,5 W EMRP calculated from measurements made with a calibrated field strength meter at 1 km distance according to standards. The antenna is a 12 m top loaded vertical with 4 pcs 30 m long top wires and 4 pcs elevated radials 56 m long and 1 m above ground. Station site is the same as the very first medium wave transmitter was located in Hörby, built 1928. Ref to the b/w photo.

We plan to have the transmitter running until mid feb 2017.

Best Regards
Bengt Falkenberg

2.5 watts one metre above the ground? Wow!

Receiver was a Perseus SDR, standard sized (3m x 7.6m) flag antenna on
the garden with pre-amp and Jaguar v2.6 software.

John

It certainly does look good. It'll probably depend on the exact path of the ex-tropical storm that is injecting a lot of warmth and moisture our way and probably boosting the tropo. F5LEN has the best conditions on Wednesday, which would be good if it came off as I have that day off.

Good DX.

Nick, Whitchurch, Hampshire.

40465. Band II Tropospheric Loggings for 28 September 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-28 21:33:45 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40465

Hi All,

And special it became. The tropospheric Band II conditions that started yesterday evening, developed into the best opening towards Spain I have seen. Some highlights:

- Never before did I get 13 stations from Spain in a single opening, all of them at more than 1250 km distance

- Some of the Spanish txs run only a couple of kW

- The Spanish DX was audible for approximately 12 hours, which is much longer than ever before

- Several low power stations from the UK and France were audible

- The intensity of the opening was high enough to enable many stations reaching RDS levels

- I had 13 first time catches, which is a lot after almost 45 years of D-ing

- My personal tropospheric DX distance record was broken and is now 1411 km

A very good start to the autumn season!

And I should not forget to mention that the Hepburn tropo forecast was incredibly accurate.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

Hello Jurgen,

I had the reverse whilst in Bridlington on the East Coast of England in 1990. The Continental UHF TV Tropo switched on around 20th of May and was almost daily until Sept. I was using an indoor log periodic UHF aerial on a chair on a table next to a window. Similar but less intense cx in 1999 in Hull.

Peter Wilson

Hi Nick

I am getting France Musique on 92fm; also available France Bleu, Inter, and Culture – all with RDS and mostly in stereo.

I am bleary eyed but it is a great listen.

Regards

Tim Arnold

An impressive Spanish opening. The Hep and F5LEN got this one just about spot on, showing a finger of tropo pointing almost straight at me then out across the North Sea, over the Netherlands and into Northern Germany, allowing record-breaking distances for some.

The first indication of tropo came from Brest. It was weak at first then increased in strength to a whopping S9+50dB within an hour. It stayed at this strength throughout most of the evening!

Galicia appeared shortly afterwards, again quite weak to begin with, but some transmitters increased to S9+30dB, producing a fair amount of RDS.

I was hoping for Portugal but it didn't happen this time. To be honest, I was surprised I was placed so nicely in the firing line for any of this! Usually, such impressive Spanish DX is reserved for the south or the west side of England.

Luckily, the noise I get from the South-West was absent for the duration of this tropo but, unluckily, the South of England was well enhanced too, giving a lot of channel blocking from the likes of Wenvoe, Rowridge, Wrotham, even Llangollen to the west. But it was nice to hear The Breeze for the first time though.

Many personal firsts were received. If you see "++" in the log, those are my notes which indicate a personal first, but there are others in there which I haven't checked. I am back at the same position I was at this time one year ago - well behind with FM tropo and Es SDR files. There's a fair bit of catching up to do.

Good DX!

The last of the Spanish tropo. Still some reasonable signals but a little weaker after midnight, then quite a lot weaker by dawn. Most of the signals from the previous evening were hanging on, but still no Portugal.a

The "++" in the log are my own references for personal firsts.

Maximum distance received was from the Moaña transmitter at 1379 km.

Good DX!

** Personal 'First'

Starting to catch up with my Es SDR files from the summer. Better late
than never!

Three openings today. A very small one to Greece and Belarus towards the
end of the morning. Then the main opening of the day came early
afternoon into central Europe. The day's Es ended early evening with a
short-lived opening to Portugal, with some brief live-logging.

Good DX!

40472. Help please with UNID Spaniard 94.2

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-29 17:10:42 UTC
From: nick gilly
Topic: 40472 Message: 40472

Can anyone help with this one please from the Spanish tropo? The first half is pop music (with awful audio quality) and I'm fairly sure that this is Radio Solidaria from Santiago de Compostela. However another station then takes over with a phone-in. Can anyone get anything from it that might lead to an ID?:
https://app.box.com/s/0lg8f3vc2lhxuvkwtbf585firwdhrrcp

Any help very much appreciated. Thanks and good DX.

Nick, Whitchurch, Hampshire.

40475. Help need with identifying German shared programming overnight

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-29 20:29:51 UTC
From: davebunyan@...
Topic: 40475 Message: 40475

A nice bunch of German stations received in the early hours of 29th Sept - but I have problems with linking the voice ids on the hour with the actual transmitters. I know that some German stations share overnight programs but can anyone give a list of who shares with who.

I know hr3 and SWR3 as it had the same music - but different pi codes. But who shares with SR3 Saarland Welle? The following frequencies identified the programme as "SR3 Saarland Welle nachtricten" - 90.7, 91.9, 93.6, 94.6. But no SR3 transmitters are listed and I can't see an alternative that matches all four frequencies - so sharing could be over more than one network.

Thanks

David

40480. Re:: Re: : Re: [SkywavesDX] Tropo Today

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-09-30 07:28:34 UTC
From: pe1etr@...
Topic: 38927 Message: 40480

Hello Jurgen,

There was usually a pattern to the reception. It would start in the early afternoon with Sweden, then Denmark would become dominant with regional DRTV2 test cards, then into Germany, HOL, BEL and F. Reception would continue until late in the evening. The picture quality was often stunning. No audio due to using System I equipment.

I also had band III to a lesser extent (on a UHF aerial) and some FM.
The strength of reception was in line with tropo being directly proportional to freq.

Peter

40490. Tropo 27-29 September 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-10-02 10:37:34 UTC
From: nick gilly
Topic: 40490 Message: 40490

Well, the 2016 autumnal tropo season has got off to an excellent start, with this being the first major event of the season. I had high hopes for this one, as both William Hepburn and F5LEN were showing a very strong finger of tropo going down into NW Spain, a bit of Portugal and down into the Atlantic to the Canaries. When these two forecasts agree then there is a very good chance that the forecast is accurate.

The first signs of something happening were on Tuesday evening with an increase in signals from Wales, SW England and Brittany. By 8 pm local Brest was reaching a full 3 bars with RDS on the XDR, and at 8.06 pm, the first hint of Spain with RNE Radio Clásica on 91.6 from Culleredo at very weak levels. The Spanish tropo really got going from around 9 pm when several transmitters from Galicia came in, some at very good strength eventually. Portugal also made sporadic weak attempts on 94.6 (Antena 2 Muro). Several new sites/stations (for me) were logged.

The tropo was still ongoing on Wednesday morning (luckily I had booked Wednesday off work) with plenty of Spanish activity although strengths were maybe a little down on the midnight peak. The duct was also extending towards Germany as Hamburg, Münster and Steinkimmen were also logged. This explains how Jürgen Bartels was able to log astonishing 1715 km tropo DX to NW Spain that morning.

Portugal reached a peak this morning with fair signals from Muro logged on 90.4 (RFM), 94.6 (Antena 2), 103.4 (Rádio Renascença) and 106.5 (TSF Rádio Notícias). Not too long after this the long distance DX to NW Spain/Portugal fizzled out.

Later on in the day there were still some weak Germans about such as Teutoburger and Brocken but these had gone by mid afternoon.

By the evening the tropo was increasing again to France, Belgium, Luxembourg and Germany, with sites in the latter such as Donnersberg and Hornisgrinde logged. Luxembourg reached good strength.

Thursday morning saw the last dregs of the tropo with a few weak Germans persisting such as Inselsberg, Bärbelkreuz (Eifel), Linz (Rhein) and Haardtkopf.

Overall an excellent start to the autumnal tropo season!

Subject: [SkywavesDX] Tropo 27-29 September 2016

Well, the 2016 autumnal tropo season has got off to an excellent start, with this being the first major event of the season. I had high hopes for this one, as both William Hepburn and F5LEN were showing a very strong finger of tropo going down into NW Spain, a bit of Portugal and down into the Atlantic to the Canaries. When these two forecasts agree then there is a very good chance that the forecast is accurate.

The first signs of something happening were on Tuesday evening with an increase in signals from Wales, SW England and Brittany. By 8 pm local Brest was reaching a full 3 bars with RDS on the XDR, and at 8.06 pm, the first hint of Spain with RNE Radio Clásica on 91.6 from Culleredo at very weak levels. The Spanish tropo really got going from around 9 pm when several transmitters from Galicia came in, some at very good strength eventually. Portugal also made sporadic weak attempts on 94.6 (Antena 2 Muro). Several new sites/stations (for me) were logged.

The tropo was still ongoing on Wednesday morning (luckily I had booked Wednesday off work) with plenty of Spanish activity although strengths were maybe a little down on the midnight peak. The duct was also extending towards Germany as Hamburg, Münster and Steinkimmen were also logged. This explains how Jürgen Bartels was able to log astonishing 1715 km tropo DX to NW Spain that morning.

Portugal reached a peak this morning with fair signals from Muro logged on 90.4 (RFM), 94.6 (Antena 2), 103.4 (Rádio Renascença) and 106.5 (TSF Rádio Notícias). Not too long after this the long distance DX to NW Spain/Portugal fizzled out.

Later on in the day there were still some weak Germans about such as Teutoburger and Brocken but these had gone by mid afternoon.

By the evening the tropo was increasing again to France, Belgium, Luxembourg and Germany, with sites in the latter such as Donnersberg and Hornisgrinde logged. Luxembourg reached good strength.

Thursday morning saw the last dregs of the tropo with a few weak Germans persisting such as Inselsberg, Bärbelkreuz (Eifel), Linz (Rhein) and Haardtkopf.

Overall an excellent start to the autumnal tropo season!

Thanks Ruud. This is certainly the best Spanish tropo opening here since the 9.2 was installed 2 years ago. This was also the second time I have received Portugal via tropo. The first time was on 1st February, but the signals were more stable this time and I received Muro on 4 frequencies, rather than just the one. Serra da Lousã would be an even better target to receive via tropo. It has been done before.

Congratulations to you also for receiving Culleredo on tropo too! Was this a first for you? Good DX.

Nick, Whitchurch, Hampshire.

Hi John,

It is good to see your loggings again.

Just two tips:

> 106.1 1627 ? UNID, ? CF23 ra_____ _____FM _stotis_

This is Centro FM from Kedainiai (LTU), a brand new station.

> 101.75 1841 ? UNID, ? 5497 Italian song

This is Radio FM Music from Vico Equense/Monte Faito (NA). This tx regularly changes from 101.7 MHz to 101.75 MHz and back.

73,

Janpeter

40496. Re: [SkywavesDX] Skegness Log: 2016-06-12 (Es: Baltics, Germany, Italy, Balkans)

Ooops - I pressed "send" before I'd finished.

There aren't a lot of files to go through compared with last season, so I hope I will be able to get through things fairly quickly. I really do feel guilty posting this late.

Thank you again Janpeter and good DX! Oh - and congratulations on your recent Spanish tropo. A great distance!

John

Hello Janpeter.

Thank you. Yes, it's time to catch up with old SDR files. If only I had
time to do things on the day. I hate being late like this.

Thank you for the info on the new Lithuanian, Centro FM. Franco Martelli
kinfly informed me about FM Music on 101.7. I will amend my log.

** Personal First

I like to keep detailed records of logs, but lately I've been wondering (again!) whether to bother posting the full log like this. It's easier just to post this: http://www.fmlist.org/fm_logmap.php?datum=2016-06-05&omid=2079 I may do this at some point, but I thought I would look at how long it takes me to format and post my log in triplicate. (SkywavesDX Forum, Blog, Yahoo Group)

FM List (and MW List for medium wave) and TextPad are my heroes. Exporting from FM List and copy/pasting into TextPad takes a few seconds. Re-formatting in TextPad using my own macros, highlighting persona firsts, etc. takes 1 to 2 minutes. I've been counting! 1 min 20 secs for this log. Then the final copy/paste into the SkywavesDX forum, my blog, then this Yahoo, including the necessary re-formatting for each platform, took me another 2 mins. Simple! But I think that posting a link would be so much simpler :)

Good DX!

** Personal First

This is a repeat of my log from the 9th June, but with this time with
the tropo loggings included.

Good DX!

John Faulkner
Skegness, Lincolnshire (JO03dd) <3m ASL.
Blog: http://skegnessdx.blogspot.co.uk
YouTube Channel: https://www.youtube.com/user/g1vvp
Vimeo Channel: https://vimeo.com/skegnessdx

Receivers:
Elad FDM-S2 (Meteor Scatter and sporadic E)
Sony XDR-F1HD with Konrad i2c mod. (Tropo/Scatter)

Aerials:
Körner 9.2 @ 5.5 metres agl. QTH is approximately 3 metres asl, 1km from
the sea.
Fringe Electronics 20dB pre-amp.

Software:
Elad FDM-SW2, SDR Console File Analyser & RDS Spy via VAC.
XDR-GTK v0.3.1 for the Sony XDR-F1HD

Rotator:
Yaesu G-5500 azimuth & elevation rotator, allowing antenna to be
vertical, horizontal, etc.

** Personal First

/Another update to a previously submitted log - now with personal firsts mentioned and a solitary German tropo log, but a real goodie!/

A fascinating Es opening to France with lots of personal firsts. Having visited this part of southern France and Northeast Spain twice in the past, staying in Argelès-Sur Mer and Palafrugell, I was familiar with many of the local place names and even remember listening to some of the stations when I was there, so this was a special day of DX. I also remember it was on one of the return trips back home in the car, that I experienced a bit of reciprocal DX when the band opened up from just north of Argelès-sur-Mer, right up to Scotland and Northern Ireland. The most striking part of that reception was a consistently strong signal from BBC Radio Foyle on 93.1 from the Londonderry site. Glasgow stations were also piling through, particularly 100.3 - that might have been Scot FM at that time.

Also in the above log was the very trailing end of an amazing spell of tropo. I only logged the one station. Curiously, just about the only German staton on the band and a brand new one for my log: Antenne Niedersachsen from Göttingen on 106.0. Where did that come from?

Today was a great day of DX!

Good DX!

John Faulkner
Skegness, Lincolnshire (JO03dd) <3m ASL.

Blog: http://skegnessdx.blogspot.co.uk
YouTube Channel: https://www.youtube.com/user/g1vvp
Vimeo Channel: https://vimeo.com/skegnessdx

Receivers:
Elad FDM-S2 (Meteor Scatter and sporadic E)
Sony XDR-F1HD with Konrad i2c mod. (Tropo/Scatter)

Aerials:
Körner 9.2 @ 5.5 metres agl. QTH is approximately 3 metres asl, 1km from the sea.
Fringe Electronics 20dB pre-amp.

Software:
Elad FDM-SW2, SDR Console File Analyser & RDS Spy via VAC.
XDR-GTK v0.3.1 for the Sony XDR-F1HD

Rotator:
Yaesu G-5500 azimuth & elevation rotator, allowing antenna to be vertical, horizontal, etc.

** Personal First

A busy day to the Baltic states and possibly the biggest opening I have
experienced to Latvia and Lithuania. Also many new Polish stations were
received today.

Good DX!

40517. Radio Patmos, temporary broadcaster

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-10-14 05:19:37 UTC
From: ilkka suni
Topic: 40517 Message: 40517

Hi folks,

In Finland, the temporary licensed, religious broadcaster Radio Patmos is on the air, once again. They are licensed to operate until 2016-12-31.

These are their frequencies and locations:

88.8 Kuopio 0.2 kW
89.2 Porvoo 0.2 kW
89.6 Joensuu 0.5 kW
91.8 Lapua 0.6 kW
92.7 Hyvinkaa 0.5 kW
93.4 Mikkeli 1.0 kW
95.2 Kouvola 0.1 kW
95.9 Jyvaskyla 1.0 kW
100.7 Kokkola 1.0 kW
101.0 Hollola 0.1 kW
101.3 Hameenlinna 0.5 kW
101.6 Ylojarvi 0.5 kW
107.1 Lappeenranta 0.2 kW
107.4 Helsinki 0.1 kW

As a kind reminder, here is where you can always find the list for temporary broadcasters in Finland:

https://www.mediamonitori.fi/index.php/tietosivut/lyhytaikaiset

And here is the link to the search engine for finnish broadcasters with permanent licenses:

https://www.mediamonitori.fi/index.php/tietosivut/taajuuslista

The search columns stand for
-Province
-Station
-Search by frequency [feed the desired frequency in the column, to list all the permanently licensed broadcasters on the frequency]

40519. A few loggings

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-10-14 21:29:33 UTC
From: ilkka suni
Topic: 40519 Message: 40519

Sorry for spamming, folks.

IF I AM NOT WRONG, my loggings repeatedly seem to
not make it to the Finnish DX Association's
public logbase, so I figured I might as well
mention a few of my recent loggings on this platform.

The past few days were rather interesting to me,
as proper tropospheric conditions towards my
south to west, very seldom reach my whereabouts,
in South-Eastern Finland. On Thursday Oct. 13th,
there pleasantly was both Auroral as well proper
tropospheric propagation around.

All reception is by a year 1989 Yamaha TX-530
tuner, 2x53//2x80 kHz Muratas, the antenna is a
8-element yagi VKN in 10 metres agl.
.

2016-10-11
Tropo: 92.40 1909z [S] RIX FM 92,4 Skelleftea,
Skelleftea/Praestfaebodsberget TM (vb) 555km//1.5kW

My dial is so crowded, in horisontal polarisation
there seems to be only, just about two odestly
powered stations from Sweden, being able to push
through. Nicely, this Skelleftea transmitter kept
booming in for almost two days. This is a
nationwide network, yet they air regional weather
a couple of times an. Also, there is a local
identification just before the full hour, yet the
ID is very, very hasty, short.

98.70 1836z [FIN] Finnish Defence Force Radio,
QTH unknown, temporary tx, air combat drill

Yes I knew, the Finnish Air Force were to
commence an air combat drill, for the first time
with the Royal Swedish Air Force co-operating,
too. What I did not know was, they would have a
temporary radio station on the public FM dial,
even repeatedly mentioning target cordinates and
target profile. I quite cannot figure out this
transmitter location nor output power. Horisontal
polarisation, I was able to pick up in a very
narrow sector only. I dare to bother the Finnish
Defence Force, with my reception report and my

enquiry, only after they have accomplished the drill.
.

2016-10-12
Tropo: 100.00 2104z [NOR] NRK P2, Oslo/Tryvann
(os) briefly, weak 982km//54.45kW

As close as Norway lies to Finland, to me the
country is very, very challenging on FM. Both Es
and tropospheric conditions utmost seldomly carry
anything from Norway to me, that goes for Auroral
propagation, too. Meteor scatter, then. Them
meteoroids apparently penetrate the atmosphere in
such an azimuth, the scatter reflections always are very limited in duration:
very rarely does the MS last for more than say 2...5 seconds.

Yes, this is a powerful transmitter, less than
1.000 kilometres away. Still, it has been years
since I last received Norway via tropo. And, we
all are running out of time with receiving Norway on analog FM.
.

2016-10-13
Aurora: 88.80z 1650 [CZE] CRo Sever, Ústí nad
Labem/Buková hora (US) // stream 100kW//1459km

My furthest-away auroral catch... Ever or for
years, I am not sure, I have not kept statistics.
Three powerful transmitters from Poland, in the
range 950 to 1200 kilometres, more or less
steadily pushed through via Aurora, the PR
Koszalin transmitter [1057 km] even with say s7
signal strength and very good audio quality. This
CRo Sever transmitter fitted the 7 degree sector
with the polish transmitters, yet I got somewhat
baffled. It took me several web streams to
compare back and fourth. Darn, it is CRo Sever.

THAT'S ALL, FOLKS. Sorry for bothering you with
my spam. Will be back with my loggings, should
there be anything worth mentioning.

Oops, I almost forgot. Recently, was it a week or
two ago, many of you living in the U.K, Germany,
Netherlans, seemed to pull in huge catches via
tropo, in your south. Congratulations for those
catches, it was fascinating to follow the DXmaps progress.

73, ilkka

A nice Autumn Es opening with a MUF of 107.4 MHz (a better opening than most days in the 2016 Es season!)
There were many more but heavy QRN prevented RDS. The reader will note very little was received at BOB due to persistent v heavy noise.

40523. FYROM streams on FMList-All updated!

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-10-22 07:43:02 UTC
From: thanos.thessaloniki@...
Topic: 40523 Message: 40523

I would like to inform everyone that I have just finished adding streams for every Fyrom station on FMList (except the ones who didn't have any). Also there were a few transmitters missing and some old ones which aren't working anymore- everything's OK now!

So Fyrom stations are ready for the next Es season ! ;)

From: nick gilly
Topic: 40525 Message: 40525

Just on the off chance, does anyone have a spare of the above remote for the Sony XDR-F1HD please? Seems that the SLEEP, on/off and 1, 2 and 3 buttons have all stopped working on mine. The 2 button has been out of action for a while but the rest seems dead this morning :(Nothing on Amazon or eBay at the moment. Thanks and good DX.

Nick, Whitchurch, Hampshire.

From: Miquel Nicolau Amer
Topic: 240 Message: 40528

Hi,

I've listened a new tx in Algeria but I don't know the location.

98.3 Radio Multi-Chaines

100.8 Chaíne 3

And I think 105.1 Radio Multi-Chaines, that I've received, isn't Nador.

One problem 98.3 and 105.1 aren't in pararel with 95.0

Now 95.0 is // with Radio Algérie Internationale

Who would be playing laid-back German language alternative pop, followed by downtempo electronica on 103.9? Signal peaked around 110 deg. Conditions have been going out as far as Gr=C3=BCnten, Ochsenkopf & Hochries. Maybe Germany?

Any help much appreciated. Good DX.

Hi Damien
Yes, when in the UK I use my car stereo. But, as I live in a valley in the Cheviot Hills and surrounded by high hills cannot really DX from the home QTH . So have to travel outside the hills to DX and even then only get spain and italy..HI Car radio has usual freqs as well as DAB for terrestrial and satellite channels., nothing hrd on satellite channels yet and only Scotland on terrestrial DAB. Good luck with your DXing Damien

40538. Band II Tropospheric Loggings for 29 October 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-10-30 13:27:57 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40538

Hi All,

After many days with no Band II conditions whatsoever, despite of a high pressure system nearby, came yesterday a sudden change. Quickly developing tropospheric ducting made it a joyful evening with a widespread opening ranging from Berlin in Germany to Bourges in France. Many stations had solid signals at above RDS levels.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

40541. Re:: car stereo re Damein

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-10-30 20:03:50 UTC
From: damienread@...
Topic: 40537 Message: 40541

Thanks Edward
I am lucky to live in a good location, and l am only a 20 minutes drive
from Clee Hill

To be honest, l was looking for advice on a good car stereo to DX with
With modern features Bluetooth usb etc

Regards
Damien

** Personal First

This spell of tropo has largely been a flimsy and variable affair, but there were some good peaks into Belgium and Holland today with a few personal firsts. Also today I received several regular German transmitters from Nordrhein Westfalen and Rheinland Pfalz at enhanced levels, but I decided to concentrate on logging only less common and new (to me) stations.

_*Unidentified:*_*
**** Some of the Belgian stations heard at the top of the band today had multiple transmitters on the frequencies, so I decided not to log these stations. Family Radio, Nostalgie, etc., but I was particularly curious about the Nostalgie transmitter on 105.3 and I hope somebody may be able to help me with this: Although Perwez is listed (100 watts), there is also a "PLANNED" outlet at Bouillon, listed with 5kW. I wonder if this is on the air yet - does anybody know?*

Good DX!

40545. Band II Tropospheric Loggings for 30 October 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-10-31 07:22:27 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40545

Hi All,

A very good day for Band II tropospheric DX yesterday. Conditions around the clock with the skip area moving from east to west, which is an exception to the rule.

Spain made it again to Zoetermeer, which is the fifth time in half a year with tropo. I have not seen anything close to that ever before.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

Moi Miquel! This a good forum for UNID's, no problem ever. Odd that you don't recognice as a mediterranean the difference between GRC or TUR..
GRC 100%, Ryhmos or Dionysos maybe (as per FMLIST GRC /2016 I have), maybe a promo "ena garage, ena studio", hopefully someone who understands greek (are there anyone here?!) could "verify" this.
These unids are the best, more interesting than boring PI''s and RDS codes, which are as "ID'd" without no talk whatsoever..

Hannu

Hi Miquel,

Greek for sure, but I don't hear any ID.
I think this group is the right place for your UNIDs, particularly in the off season for ES.

Thank you very much to all who help me

Perhaps is here (in the file of this e-mail) the id but I am not sure if
is the same station. This is the same frequency but two minutes later.

Music 89.2 from Ymittos?

The problem is, the word "music" could refer to the name of the station,
or is simply being used as a more generic term which could be used in
any jingle of this nature. I would say the Ymittos station is very
likely. I'm sure Thanos or Panos will know.

Thank you very much to all who help me

Perhaps is here (in the file of this e-mail) the id but I am not sure if
is the same station. This is the same frequency but two minutes later.

Hi Miquel,

the ID seems to be "Aftos Neo Music 89.2"

Hi Miquel!
I am from Greece and I can identify 100% that this is Music 89.2 Fri Ymittos,Athens. The man on the clip says "The most hot dance songs...and all the new ones non-stop...this is the Music 89.2, all the new ones non-stop"

Received during last weekend's tropo on 107.7:
https://app.box.com/s/av7pt4clyyfgre9s8xujkrf10g6fdcbd

It's weak but hopefully someone can get enough info from the clip to ID it. Thanks and good DX.

Nick, Whitchurch, Hampshire.

Moi Nick!I'll join to this saturday nite dx lottery, so my guess without the headphones maybe the "ID" or (not) in the very first second, "..Hessen"(?). Sounded like they had mx during the nx or maybe a qrm from someone else..just a slight guess, this, but still..

Thanks Hannu. Yes I can hear that. In which case it might be Hit Radio FFH from Hohes Lohr.
At the time Hitradio FFH was coming in on 105.9 from Großer Feldberg, as well as B5 Aktuell on 106.9 from Grünten, and SWR4 RP on 107.1 from Haardtkopf.
 Good DX.

Hi Nick,

it is definitely Antenne Bayern! In the sports section of the news, when the moderator is announcing the football results of the Bundesliga, he is
highlighting the teams from Bayern at first: Augsburg, FC Bayern and then Ingolstadt. So you catched really Antenne Bayern.

73,
Joerg

40575. HDSDR beta 2.75 CPU usage comparison video

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-11-06 11:10:57 UTC
From: pe1etr@...
Topic: 40575 Message: 40575

A comparison of HDSDR 2.75 Beta (released 3rd Nov 2016) with other popular SDR apps, with regard to CPU and memory usage.

I used an Acer Aspire V 11 Touch laptop, which is lightweight (about 1 kg), has a long battery life and therefore very suitable for DX-peditions. This is a "real" touchscreen laptop wih good connectivity (USB 2 and USB 3, HDMI and ethernet connectors). The headphone socket can be also used for stereo audio input etc. (user selectable)

It is not a tablet with a keyboard.

The SDR is an SDRplay.

https://youtu.be/eyHJJvOdsNk

in addition to the test SDR app and Task Manager, just the background processes were running.

** Personal First

Very mysterious indeed! I ask myself "Am going mad?" Or perhaps I am
just forgetful, overlooking a few things. No! I definitely remember
deleting my folder with my Es SDR files from June 30th. I had completed
these a couple of days ago. I have a system. I delete files and
directories after they have been checked. The June 30th folder has
returned today, along with several new files I haven't yet checked. Work
that on out if you can! Not only was there a directory from the 30th,
but one has also appeared from June 29th with several more unchecked files.

This is the latest of many similar mysteries presented to me by Windows
7. Windows 7 continues VERY odd and highly unlikely things here. My
"profile" disappeared yesterday evening and re-appeared a few minutes
later. It must have slipped through a time warp.

Enough is enough. I think it's time to do something I promised I was going to do two years ago and move over to Linux. I missed my free ticket to Windows 10. Never mind. These things are sent to try us - and I refuse to install Windows 7 again - for what would be the 20th+ time this year (literally!).

Good DX!

Hi,

I installed SDRuno and now SDRuno recordings are incompatible with other SDR's like SDRsharp, SDR Console or HDSDR.

I am not happy for that.

I usually record my DX with SDRuno and after I can use SDRsharp combined with RDSspy to decode weak RDS signals.

I'd like that all were compatible SDR recording.

Sorry for my bad, bad English.

Hi,

It's only one test.

Try to find the PI code in the 89.3 in the below file.

I know the PI code but ...

What is the best software or combined softwares to decode weak signals?

Atention : It's a very big file: 1,53 Gb

The file is in
https://wetransfer.com/downloads/6793359f78ada1751b58ce83d08a039b20161116141257/e727cc4fe1030ba5a132cc8ef8da522220161116141257/6cca54

I try to find the best software for SDR for FMDX

¡Hola!
What software have you opened the file?
That was only a SDR file.
You can open only with SDRsharp, SDRuno, SDR Console...
That file has 87.8MHz to 94.2
The file doesn't work only like a audio file.

Hello Miquel.

RDS Spy is the most sensitive RDS decoding software I have used:
http://rdsspy.com/ I use this in conjunction with my Elad FDM-S2, but I
have to use Virtual Audio cable with this.

I bought the full version of VAC. The free version has voice
interruptions every few seconds. There are other free VAC types of
software but I forget their names.

The RDS decoding in SDR Console V3 is also very good.

Regards.

John

Hi all

I am going through my recordings from this year□s ES reception. I have a couple of unidentified recordings; Balkan, no doubt. None of them were RDS-ing.

91.5 MHz: <https://app.box.com/s/weic4s6jqoodcedhign304yne3j5lw36>
https://app.box.com/s/weic4s6jqoodcedhign304yne3j5lw36

89.5 MHz: https://app.box.com/s/az8ngm85syymwjfiatnmag9zjpfqc2pv

I would appreciate if anyone would give them a try.

Moi AF!

(In my opinion) the latter (on 89500) sounds to be BIH: Radio Hit, Brcko. Majevica-tx, as Brcko mentioned and also the internet country code .ba was audible. Brcko nails this imo..

my 2¢,
Hannu:)

Hi Arvid,

I think Hannu is right for 89.5 MHz.

On 91.5 you have and adv for http://motorexbih.com/ so BiH again, but this company is present in different areas of the country, so hard to say which station is broadcating this adv, maybe some local member?

40603. [MS stuff] A 7-minute burst !?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-11-19 02:36:17 UTC
From: ilkka suni
Topic: 40603 Message: 40603

Hi folks,

Once again, it is time for some meteor scatter stuff. If I am not wrong, folks in the forum have recently not been as active on MS as they have been in the last few years. Have not been that active myself, either.

Currently, there are the Orionids drifting away, as well as the Leonids on the rise. Neither shower is a major one, still, along the years I have experienced some of my most massive slides by these two showers, especially outside their very peaks.

On Friday, November the 18th starting at 1111z, I witnessed one of the longest lasting presumably single bursts, I ever experienced. BBC Radio 2 and Radio 3 kept coming in, at least on 88.3, 89.3, 90.1, 90.3 and 91.5 MHz. The burst lasted for 6, even up to 7 minutes? I gather, there were the Holme Moss, Sandale and Sutton Colfield 250 kW transmitters coming in from the UK, if not even more BBC transmitters.

I bet this was one of the very final, as well as the big rocks by the Orionids. One of them bigger rocks, the Tellus only recently hoovered in. Only recently, that is to say in the last few millenniums plus some...

In case of any interest, here is the audio clip, starting with the Radio 3 cembalo:
https://app.box.com/s/3v1jwbnej09ddmyzpof5g5nnqqu1tiq4

The tuner was hissing on 90.3 while my awaiting for the norwegians, Radio Norge and a couple of NRK regionals, before they are off the dial.

Unfortunately, I missed the very beginning of the burst as I was concentrating on other issues, and the cassette tape deck was not in recording mode, either. Still, there is some 6 minutes of the burst, in my audio clip. One can notice, I kept scanning for several frequencies while trying to catch something else from the UK besides these powerful BBC transmitters. Had the burst lasted for a thousand years, as goes the lyrics in the Radio 2 pops...

BTW 1: The box.com appears having turned to an internet security risk since I started using the very site 3 years ago, while the properties, too, have gone trash. I no more found a way to enter a comment, an explanation, for a single audio file. Better spot a secure, flexible site I pay for, the way I paid for a certain finnish photo site in the past, up until they twisted the interface usability to junk.

BTW 2: In the forum, on Friday there was a marketing posting by KrazySiberia. I wonder whether this was authehtic or a spam-bot.

Anyway, let there be rocks!

73, ilkka

** Personal First

I haven't done much meteor scatter lately as I tend to concentrate on MW
DX at this time of year. It's also been very disappointing on the few
occasions I have tried - same stations, weaker in strength.

So, to this year's Leonids: I wondered if it would be a good shower this
year. It's a shower which has been known to produce storming on
occasions, even in years when it has not been expected. But last year's
Leonids were disappointing. This year''s peak has been disappointing
too. So much so that I didn't bother to check through all the files.

There weren't any great signals and only three long trains were noted.
These were very weak (too weak for RDS), each lasting about one minute.

I know I would have been glad of a meteor log like this a few years ago,
but since I have got into SDR receivers, this is disappointing,
especially for a major meteor shower.

The January peak of the Quadrantids is always recognised as being a good
one and I am looking forward to that.

Good DX!

Emne: Re: [SkywavesDX] UNIDs from the 26th of May 2016

Hi Arvid,

I think Hannu is right for 89.5 MHz.

On 91.5 you have and adv for http://motorexbih.com/ so BiH again, but this company is present in different areas of the country, so hard to say which station is broadcating this adv, maybe some local member?

Alessandro

Trieste, Italy

Subject: [SkywavesDX] UNIDs from the 26th of May 2016

Hi all

I am going through my recordings from this year□s ES reception. I have a couple of unidentified recordings; Balkan, no doubt. None of them were RDS-ing.

91.5 MHz: <https://app.box.com/s/weic4s6jqoodcedhign304yne3j5lw36> https://app.box.com/s/weic4s6jqoodcedhign304yne3j5lw36

89.5 MHz: https://app.box.com/s/az8ngm85syymwjfiatnmag9zjpfqc2pv

I would appreciate if anyone would give them a try.

40607. new dab station

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-11-25 12:55:20 UTC
From: edward baker
Topic: 40607 Message: 40607

A new DAB radio station is launching in Manchester playing traditional Christmas carols and general festive music from Dec 1st.The pop-up station is being run by Manchester Cathedral on Niocast’s minimux, with the help of radio pro Mike Shaft.Manchester Cathedral Radio launches at 9am on December 1st and will continue till 6pm on January 5th.The station will be providing listeners with an insight into the various events taking place at the Cathedral in the run up to Christmas. There will also be a range of features and interviews with key members of Greater Manchester’s Christian community
A radio station playing music from the musicals is launching in the South East next week.ENCORE RADIO, backed by UKRD, will officially start at 1pm Monday and will feature West End Star Duncan James and TV and radio personality Liz Wickham.It will have a mix of West End and Broadway songs from the shows, plus the usual radio content such as showbiz, weather and other features.

40614. Re: [SkywavesDX] Test SDR

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-11-27 18:55:11 UTC
From: Miquel Nicolau Amer
Topic: 40596 Message: 40614

Hello,
Yes, It is.
I have tried it with SDR#, SDR Console V3 and SDRuno and nothing.
I can only see the PI code in that file with SDR# + mpxoutput + RDSSpy.

Now I say a works in Spanish because I can say that in English.

Las grabaciones ahora son totalmente incompatibles con otro software .
Solo pueden ser reproducidas con el software que fueran grabadas.
Tengo el SDRplay y solo puedo hacerlo funcionar con SDRuno o con SDR
Console. Pero posteriormente no puedo reproducir las grabaciones en SDR#.
Me están dando ganas de deshacerme del SDRplay para posteriormente
comprar el Airspy que si es compatible con SDR# y con RDSspy.
Los que compramos un SDR deseamos que tengamos compatibilidad total con
todos.
Eso sería como comprar un coche que solo pudiera funcionar en
determinadas carreteras.

Another software that it's very sensitive RDS is XDR-GTK is a user
interface for the XDR-F1HD Radio Tuner with XDR-I2C modification but
that isn't a SDR.

Thanks

Miquel

40615. On line tuners

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-11-29 13:47:25 UTC
From: Radio Stations
Topic: 40596 Message: 40615

All,
I see many receivers online
http://www.globaltuners.com/

http://sdr.hu/
http://websdr.org/

but zero with RDS FM.

I was wondering why.

Thank you, Jurgen. How technology gets started has always been of interest to me. The formative years of electronics are of special interest, as they managed to get that worked out in such a relatively short time.
Amazing progress back in those days, 1896 was the year radio effectively got underway, forty years later they had perfected television. The next year, the first digital computer was being experimented with. A few years after that, there were several computers in existence, three of which had been independently invented without knowledge of the others.
I have a grown son who is amazed when I show him some of the earlier forms of modern technology. I always tell him "You've got to start somewhere!".
Curtis

It's only a little thing - but now that the Geminids are due, and already producing a fair number of RDS level signals - having an MS button on the MyFM page (to go with the ES and Au buttons etc) would be really helpful.

Thanks

David

I don't know how we'd DX without FMList!

I've added such a button and hope it does the right things and did not break anything. If (not), let me know!

73 and good MS DX

Thank you, Gûnter, as well as David for his proposal.

At first, I missed what David was after. Now that
it's done, the option seems rather useful, at
least for me. Now it only takes half the time,
for the page to load [my internet connection
appears to do just 10...12 per cent of the speed promised by the operator].

One, of course, must bear in mind, distances
beyond say 2.200 km via MS, are strongly or
rather absolutely, dependent on other propagation
modes to support a single MS-hop

Rather lame the Geminids so far. Then again, this
never was one of my favourite showers,

Good MS, folks!

73, ilkka

Hi Peter!

Some really nice MS-DX there indeed. At 1:49 you have an UNID YL on
87.6 MHz. That's
a swedish newscast. I don't know which channel or transmitter though.

Hi Peter.

94,9MHz UNID Classic music at 0847h is SR P2 , Probably Sveg/Brickan (60kW) ERP.

87,6 UNID YL at 0203h is SR P1 . Can’t say exactly which TX since you have three high-power TX in 60kW: Visby/Follingbo, Hudiksvall/Storberget and Storuman/Norrberg.

Oops, stumbled into a dilemma while proclaiming
the excellent AS conditions locally today, all afternoon.

The MS button omits transmitters closer than 700
km away, in the myFM list. Still, I believe MS
reflections from closer than 700 km are possible,
as meteors also sometimes scatter in the altitude
of just 70 km. Just yesterday I was told a story
of several MS pings from a transmitter only 300 km away.

Truly, I do not know what could be the closest
proximity of MS. But what I do know is, a certain
60 kW Sveriges Radio transmitter for example, 600
km away, rather commonly pings in via MS. I also
recall having received sort of backscatter by a transmitter just 500 km away.

Nice, and for me, someone who has never tried MS, I finds this a significantly more useful than a how-to guide. To see the results of MS in a video and the waterfall marked very useful and interesting in understanding the mechanics of what you are listening to.

Hello from across the great pond.

During the Geminids Ms I bagged analog TV-7 for CHBX-TV-1, CTV network in Wawa, Ontario, Canada at a distance of 692 miles/1114km from Easton, Pennsylvania, USA.

The translator site runs 66.4kW ERP with a negative offset (175.240 MHz) from the more common standard of 175.250 MHz.

Wawa is 104 miles/167km north-northwest of Sault Ste. Marie along the south-eastern shores of Lake Superior. It is at azimuth northwest from my location.

I had other Ms transmitters from Canada, but they were less than 1114km on December 14 and 15.

40646. SDRPlay RSP2 for FM DXing?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-12-16 17:46:39 UTC
From: Les Rayburn
Topic: 40646 Message: 40646

I’m curious to hear any reviews, or even anecdotal reports from FM DX’ers who may have used the new SDRPlay RSP2. Unfortunately (for me) I purchased the original RSP only a few weeks ago, literally days before the new hardware was released. I was convinced to purchase the SDR even though I already own an Elad and an Airspy because of the inclusion of the SDRUno software (Studio 1) which is spoken of highly by many FM DX’ers.

The new hardware seems to offer some significant improvements according to the data sheet below.

http://www.sdrplay.com/docs/RSP2_Datasheet.pdf

Any first impressions from FM DX’ers? Trying to decide if I should purchase the RSP2 as well.

I have an RSP2, but as I use SDR Console for FM dx-ing with mainly Perseus and EDld S2, I will wait for it to support RSP2 before attempting a comparison. The test team should have a new kit to play with soon if not imminently, as I know Simon is working on it.

I still find SDR Uno very clunky to use in comparison with Console.

Mike,

Your review was exactly what I was hoping for. Work has been so hectic that I haven't had a chance to read the last two VUD's at this point. My fault.

Thank you for sending the link.

Sounds like I should try my existing SDRPlay RSP out first, and then make a decision about an upgrade. Your review will make that easier to accomplish. Thanks again.

40649. UNID Baltic? Es 88.0

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-12-16 20:30:43 UTC
From: nick gilly
Topic: 40649 Message: 40649

I'm going through some Es recordings from the summer and found a recording of a station on 88.0 with some talk and possible IDs, starting at 1 min 07 secs here: https://app.box.com/s/aczvqg33vcaog9i9ap51xpmjqux27l02

There are 3 stations on that clip, 2 of which are playing music, as well as the talker. I'm not 100% sure of the language, although it sounds like Belarus is referred to at one point. Thanks and good DX.

Nick, Whitchurch, Hampshire.

Hello Les,

IMHO the winning combination for FM DX is SDR# (with zoom FFT filter) and RDS Spy. You might need to make IQ WAV recordings in another app due to incompatibility, but you can still use my preferred combo for IQ file playback.

I have no axe to grind, I have not been paid by any hardware/ software seller/developer, nor am I on first name terms with any of them.

40654. Re:: SDRPlay RSP2 for FM DXing?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-12-19 12:20:41 UTC
From: davebunyan@...
Topic: 40646 Message: 40654

At present SDRPlay have not published the detail in the RSP2 specifications - so we don't know what the underlying improvements might be. Yes it has three aerial inputs - but how much isolation between them? One of them is specifically for hi-z input - so is of no interest for FM DXers.

Like Peter (pe1tr) I use SDR♯ (build 1361) with all the plugins - MPXOutput to feed RDSSpy. Baseband recorder and FilePlayer for playback. RDSDatalogger or FMSuite for scanning

SDRUno misses the ability to scan and to log RDS data - so is a no go for me.

So I wouldn't worry about not having an RSP2. You can do a search for SDR♯ build 1361 and find a zip file. As it was released under GNU it is public domain as are the plugins that work with it. After that build they changed the licence terms.

If you need to switch aerials make yourself an aerial patchbox. With the one I made I can rapidly patch between six aerials - with around 60 dB isolation. The box consists of a small diecast box with seven f-connectors - each connected to a phono socket. The middle one being the output - with a short patch lead between it and any of the other phonos.

I was so pleased with the results that when I bought an Airspy I made one for that.

David

40655. Re:: FMList - extra button would be helpful

Yahoo group: SkywavesDX (2016 — 2017)

Topic: 40630 Message: 40655

Thank you for a quick response Gunter - that will prove to be very useful.

But would you please set the minimum distance for the MS button to 300 km.

Yes that sounds very close but I Iog quite a few stations at under 600 km from Germany and Switzerland and France (Strasbourg on 87.7). I got RTL.lu on 88.9 at 456 km on 13 Dec 2016 and a number of UK stations under 400 km. The UK stations were probably aback reflection from a meteor trail over central Europe.

I probably get more short hop M-S because the antenna is only 5.65m above ground and the main lobe is quite high.

[I have yet to transfer my extensive log to FMList]

David

Just to throw in another spanner ...

Meteor scatter can be less than 100km. I did not believe this until I actually received something at 56 km. I probably still have the video evidence on one of my Mediafire pages.

The mode is some form of backscatter I believe, but it's obviously quite rare. The same could be said for the other extreme too - MS _over_ 2000 km. Also unlikely, but possible if there is tropo or Es, etc. I forget which modes can link up to MS and extend the distance, but I know it happens.

Hefty tropospheric conditions can extend a single MS-hop. Es
conditions may add an additional hop to a single MS-hop, in Finland
and Sweden this has been experienced by several, experienced listeners.

Is a douple-hop via MS possible, I do not know, of this I would not
swear either way. In last say four years I have experienced twice an
MS-ping hinting, a double-hop via MS just might be possible. I know
of at least one experienced finnish listener who has encountered
similar an occasion:
an MS-ping which quite could be explained by a double MS-hop only.

My pings been received from closer than 300 km, I tend to believe
them all having been aircraft reflcetions // aircraft scatter.

John,

What about airplane scatter?

Not so unusual nowadays.

Yes that sounds very close but I Iog quite a few stations at under 600 km from Germany and Switzerland and France (Strasbourg on 87.7). I got RTL.lu on 88.9 at 456 km on 13 Dec 2016 and a number of UK stations under 400 km. The UK stations were probably aback reflection from a meteor trail over central Europe.

I probably get more short hop M-S because the antenna is only 5.65m above ground and the main lobe is quite high.

Hello Sven.

I know what you are thinking. I was surprised too. This was not aircraft scatter.

I will refer you to my original post (if I can work out how to link this in). Or maybe I will just copy/paste the original messages.

No I won't. Yahoo is being awkward. I'll get back to you on this.

The best thing is probably to paste a link to the original topic. I've also started a new thread on this as I don't want to take the previous topic /'off topic'./

To summarize, I wouldn't have accepted that such short range MS was possible.

Please read the topic if interested. If you want to find it via an email client, you'll need to go back to May 5th 2016.

I found the video of my Holme Moss meteor scatter.

It's bizarre, Sven. I would never have expected anything like this. Clearly it *is* meteor scatter. At the time, I checked all the other Holme Moss frequencies and all those in the range lifted up at the same time.

I love meteor scatter DXing. You just never know what to expect. You also get low power stations too. 40 watts is my lowest on band 2.

Hi folks,

On the 13 December 2016 at 1921 I had a very nice trace on the SDR waterfall with eight frequencies showing a meteor ping - every one was a BBC transmitter - starting with BBC R2 on 89.3 and ending with BBC R4 on 94.3.

As my antenna has a 20 dB f/b ratio it is extremely unlikely that a very low power station would be picked up from the back - so the Radio 4 station on 94.3 can only be Wenvoe. As Black Hill carries Radio Scotland on 94.3 it then indicates that BBC R2 on 89.9 and BBC Radio 3 on 92.1 were also Wenvoe.

I also noted on an earlier burst - which was mainly Italians - two Danish stations. In my opinion these were probably back scattered from the same meteor trail - somewhere over Switzerland - bouncing back at an angle.

Just imagine volleyball where your opponent is behind slightly to one side and hammers the ball at the wall, or is off to one side of you and hammers the ball of the wall and the bal comes flying back. That's back scatter or reflection.

It gives some extra interest among those boring 3211 or 232F etc PI codes

"Senior moment alert" - I meant "squash" - not volleyball - but you know what I mean. When I was a kid we used to play a game of kicking a soft ball against a wall. Wherever it landed the next kid had to kick the ball and hit the wall - or else they were out. We played it in a school courtyard where there were other obstacles - so it was quite a lot of fun trying to get the ball to bounce and stop so the next person didn't have a clear shot at the wall - still I digress...back to logging MS reception.

And BTW the next interesting dates are Dec 19-22 for the Ursids - which are above the horizon 24 hrs for the northern hemisphere. Only 10 per hour on average though.

A good analogy!

Good to see you too have experienced this ultra short range MS Dave. Our
of curiosity, what was your furthest MS?

Thought I ought to point out that this reply didn't seem to follow on
from the previous post you referred to. It hadn't got forwarded to
Thunderbird here. When I checked the Yahoo Group page, there it was.

This makes me wonder how many other posts I have not seen since I don't
check the Yahoo page directly as it's such a pain to navigate.

I hope to be back at MS in the new year with the Quadrantids. Too many
distractions at the moment,

Good DX!

John.

40667. Delayed Yahoo Messages

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-12-20 15:19:52 UTC
From: John Faulkner
Topic: 40667 Message: 40667

I think I have worked out why some of my messages have been held back on here. This may be common knowledge to some, but probably not everybody. Hopefully this will be of help.

I have many email addresses for different things. For work, for radio, for forums and other online groups not associated with radio, and a special address or two for those nasty companies who like to bombard you with spam every day,even though they say they won't. Ha!

I looked in the settings in my Thunderbird client. "Check for new messages every ... minutes." was set to one minute! A little unnecessary. A few months ago, I increased these to every 5 or 10 minutes. The result was that far fewer of my Yahoo messages were getting held up. Almost none ion fact!

This regular probing of the Yahoo servers seems to have had the effect of putting my email address on hold for a short time. A few minutes sometimes, or an hour or more. Servers don't like being bombarded. Security measures will be in place to stop this. Yahoo could even suspect that the email address in question could be spamming.

What has undoubtedly added to this problem is when I click on the "Get Messages" button if I am impatient. This action almost guarantees that my message will go into a queue.

If I let Thunderbird run it's natural course, letting it auto-check for messages every five or ten minutes, there isn't usually a problem. I wonder if those who experience delayed messages have been clicking the "Get Messages" button too much or have the auto-checking frequency set too high.

John

Hi John,

There were appear to be two threads - the one I started by asking if the MS button could be added to FMList (that saves a lot of time!) and you one about ultra short skip MS.

My furthest reception that I am 100% certain is MS is 1991 km to MRC. I've had a very few stations in the 1850+km range - most are 1000km to 1400 km.

I would need a much higher aerial to achieve a very low reception angle to get much further away.

The shortest distances - all have to be back-scatter.

92.0 MHz Fr Musique - Rouen 223km
89.5 MHz VRT Klara - St Pieters 250 km
91.7 MHz VRT Radio 1 - St Pieters 250 km on the same burst that affected multiple frequencies
BBC R2, R3 and R4 from Sutton Coldfield (226 km) and Belmont (230 km) - pretty certain because of the frequency combinations of the BBC stations.

David

Hi Julian,

I'm not aware that France have switched off any FM outlets.
Here in Lincolnshire, I receive Lille "Culture" on 98.0 MHz all the time, sometimes with full RDS.
It may be the case that more directional TX antennas are being used at some locations, to minimise "interference" to the UK.

Good DX, 73,

Chris. Lincoln, UK.

From: Christian S
Topic: 40676 Message: 40676

Hi!

Aurora Kp6 tonight. It has appeared some weak carriers on Band I tonight. Not strong enough to give any picture or any indication on the S-meter. But there’s anyhow something there.

73’s de Chris

I'm so low down but Caen on 95.6 sort of come in daily with me even so, but nothing else, the 100w dab tx from Sussex Heights though comes in nicely even on a my 4 DAB+ personal's

Ah the Degen 1103, yes have'nt used mine for ages, great for FM

Are you listening on a car radio Julian? Those French horizontal nationals won't be so easily received on a vertical car whip as most of them are horizontally polarized.

John

Thanks Andy
I have been enjoying BBC4 from North Hessary all morning at near local quality with hardly any variation in the signal strength. I havn't tried tuning around as the frequency display on my radio has developed a fault recently, but relying on the pre-programmed memory I set up before this fault occurred. I must try and get one of those SDR gadgets that I see most people on here are using. Can anyone recommend a good one to start off with? Now back to work in the shed. Wonder if The Archers has finished?

From: davebunyan@...
Topic: 40702 Message: 40702
Attachments: 1 described; binary payloads are missing from this source WARC

I first captured the DAB MUX around 1530 UTC with warbly audio (SNR around 6dB) it's improved as is now around 13 dB.

Initially Rangstrup on 97.2 was found then the others from the same site and more Danish stations are appearing - but the band is very crowded.

A screen shot when the MUX was giving warbly audio is attached

40704. Band II Tropospheric Loggings for 29 December 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-12-30 00:14:31 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40704

Hi All,

A big Band II tropo day today, with many strong stations on each frequency around the clock. Nothing overly exiting in terms of skip distances, but it is always nice to get a lot at RDS strength.

Here’s hoping for the big one tomorrow.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

Thursday 29 December 2016

Andi's DAB player played some DMB when I was in Cambodia, but not all. It played Cambodia National Radio, and I think the others were audio from TV stations.

Topic: 40707 Message: 40707

Hi all

I am going through my FM-log from this day, probably the best opening I have experienced to Spain/Portugal for quite some time. The upper part of the band was rather crowded at times, with one station taking over from another one within a couple of minutes. Maybe there is someone out there who might give me some advice on a few of the loggings:

1) UNID ☐ 93.9 MHz - (probably Spain) with classical music and giving the PI code as F000. UTC 1318. None listed. Any idea? Radio Azul Sur and RFI (which one is that?) as listed under Spain, but not on this frequency.

2) UNID Spain ☐ 107.3 MHz ☐ giving PI code E500. UTC 1336.
https://app.box.com/s/jt2swac8hs5v3wcndeqi68sh03ygy6fn

3) UNID Spain ☐ 108.0 MHz ☐ UTC 1346 ☐ no RDS
https://app.box.com/s/9tbytxvjhqpuy3tvfb29qmt33sicdwh8

4) UNID Portugal ☐ 100.8 MHz ☐ UTC 1348 ☐ no RDS
https://app.box.com/s/cd9t52h4bwfjq46ianvbojz6xfudup81

5) UNID Spain ☐ 108.0 MHz ☐ UTC 14.01 ☐ no RDS
https://app.box.com/s/pahhnimw3snokfm2u4cwn5i7ujcigk6u

http://www.fmlist.org/fm_logmap.php?datum=2016-05-30

It was a bit of a shock seeing the"DMB" ID in Andi's DAB player. The audio was very distorted, so I suspect DMB support is only partial.

Unfortunately the computer I used then (July 2015) stopped working and the HDD proved to be faulty and I couldn't access all of the data. I'll try and locate some video footage.

Peter

Hi,
107.3 Advertisements from La Ba?eza and Le?n (Castilla y Le?n Region) I
don't have any idea!
108.0 Radio 4 G. I think is Tineo . I understand a telephone number
696245610. And in Google
https://www.milanuncios.com/alquiler-de-negocio/centro-emisor-se-alquila-95145207.htm
.
Radio 4 G has a bad moment and perhaps this associated station want to
sell the station.

40711. Band II Tropospheric Loggings for 30 December 2016

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-12-30 23:49:44 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40711

Hi All,

Not the big bang I was hoping for, but still a very nice Band II tropo-DX day today. The Brest txs were ridiculously strong for many hours.

Best regards,

Janpeter van Dijk, Zoetermeer, The Netherlands

Friday 30 December 2016

40712. SV: [SkywavesDX] 30th of May 2016 - UNIDs

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2016-12-31 10:46:43 UTC
From: Arvid Frøsland
Topic: 40707 Message: 40712

Thanks a lot, Miquel, for your help.

I was a bit confused by the PI codes mentioned, but I suppose it is like
that when several strong stations are fighting on the same frequency. So
maybe E500 and F000 are ☐fake☐ codes?

My guess for the 108.0 was Radio 4G, but the telephone number you found
solved it.

Happy new year, and thanks again.

Emne: Re: [SkywavesDX] 30th of May 2016 - UNIDs

Hi,
107.3 Advertisements from La Bañeza and León (Castilla y León Region) I
don't have any idea!
108.0 Radio 4 G. I think is Tineo . I understand a telephone number
696245610. And in Google
https://www.milanuncios.com/alquiler-de-negocio/centro-emisor-se-alquila-951
45207.htm .
Radio 4 G has a bad moment and perhaps this associated station want to sell
the station.

Hi all

I am going through my FM-log from this day, probably the best opening I have
experienced to Spain/Portugal for quite some time. The upper part of the
band was rather crowded at times, with one station taking over from another
one within a couple of minutes. Maybe there is someone out there who might
give me some advice on a few of the loggings:

1) UNID ☐ 93.9 MHz - (probably Spain) with classical music and giving
the PI code as F000. UTC 1318. None listed. Any idea? Radio Azul Sur and
RFI (which one is that?) as listed under Spain, but not on this frequency.

2) UNID Spain ☐ 107.3 MHz ☐ giving PI code E500. UTC 1336.
https://app.box.com/s/jt2swac8hs5v3wcndeqi68sh03ygy6fn

3) UNID Spain ☐ 108.0 MHz ☐ UTC 1346 ☐ no RDS
https://app.box.com/s/9tbytxvjhqpuy3tvfb29qmt33sicdwh8

4) UNID Portugal ☐ 100.8 MHz ☐ UTC 1348 ☐ no RDS
https://app.box.com/s/cd9t52h4bwfjq46ianvbojz6xfudup81

5) UNID Spain ☐ 108.0 MHz ☐ UTC 14.01 ☐ no RDS
https://app.box.com/s/pahhnimw3snokfm2u4cwn5i7ujcigk6u

SARL weekly news in English 2016-12-31

TRANSATLANTIC TESTS TO RESUME

Undaunted, Pieter Jacobs,V51PJ, in Namibia and Marcos Turbo, PY1MHZ,
from Brazil will continue with their Transatlantic tests on 144 MHz
starting early in January 2017. Recently they almost made it when
their digital signals were recorded across the Atlantic Ocean. But
unfortunately the QRA64 software used could not identify the call
signs so the ARRL had to declare the contact null and void. On 16
December 2016 Marcos heard several meteor pings from The V51PJ CW
beacon on 144,429 MHz.

For the new tests in January Marcos decided to change his antenna to a
26 element LFA Yagi design for better handling in strong winds. It
will also provide a low take-off angle from his QTH at the sea. This
time they will be conducting their Transatlantic tests on 144,300 MHz
using JT65b digital mode instead.

I BELIEVE, FINLAND can't go for DAB, any earlier than Russia possibly does.

I see it somewhat awkward, there would be multiple russian
broadcasters right at the border broadcasting on analogue FM, thus
well audible in Finland.

Hello John,

If you've used a RTL dongle for FM or SW and installed the drivers with
ZADIG, than
you first have to uninstall this driver otherwise the DAB player will
not work.

The DAB drivers need no ZADIG to install.

The only thing you have to do is install the right DAB driver for your stick
with the Windows device manager.

73,
John

Here is a full description of what you need and how to install for the original NOXON DAB Stick:
http://www.fmlist.org/noxondab

Instead of DAB_Player_114.zip, you can use the newest version.

Ilkka, the armed forces said no and so did also the national audit office. The national audit office can be said being the "heaviest" part in this case.

If they say no, then it's red light x 10.

And people doesn't demand DAB. They are pleased with FM and internet. The fm-net is robust and stable and internet isn't seen as a replacement though a complement.

If broadcast will be digitalized in the future I'd prefer DRM or dvb-t2 light.

Thanks Horacio, I tend to forget that long URLs should be put in arrows so they will not break.
Hope this works now:

40749. (Jetsee) Antenna Rotator - who stocks this still ?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-01-17 15:48:00 UTC
From: Dave
Topic: 40749 Message: 40749

I am trying to find a supplier who still what seems to be now discontinued
the Jetsee / Maxview antenna rotator as shown here :-

http://www.conrad-electronic.co.uk/ce/en/product/284971/Automatic-Antenna-Rotor

Maplin use to sell them of course, guess they were sold unver many other
names aso

Anyone know of a supplier who may have old stock perhpas ?

40750. PI 8870 on 105.6 (Netherlands?)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-01-17 21:22:25 UTC
From: John Faulkner
Topic: 40750 Message: 40750

https://youtu.be/pPUQlJUX478

Still trying to find out if this is the Netherlands or Croatia.

One DXer has informed me that this is the PI of Radio 1 from Cacevac.
Another DXer says that the 8 prefix is not used at all in Croatia.

I think we know that most countries may have at least one or two
stations who don't use the correct PI code, but my antenna was beamed
around 50 - 60 degrees at the time and vertical. There was a lot of
short-range meteor scatter on this morning (15th) so I would personally
opt for the Netherlands, but if so, who?

Thank you.

John

Unless you are talking about the extreme wallon dialect (which is hardly spoken these days) Belgian and Parisian French is pretty similar in terms of pronunciation - the difference is in the words which can be used. This is a very short clip and there are no clues!

Judging from the few, comprehensible words ("va a sortir en 2012, Stevie Dell? avec", which might refer to a 2012 album) it sounds compatible with Marie-Amelie Mastin's "Lunch around the clock", scheduled from 11 to 14 utc on RTBF Classic 21

Hi Peter and Chris

The second clip is no doubt Swedish, but I am not quite sure that the first one is Norwegian. It’s too short to decide 100 %.

And it’s not NRK P1, I checked the program at the mentioned time. As for NRK P2, they broadcast more or less non stop classical music at this time.

Good dx.

Going by reports, it seems that most of the problems were due to Chrome's odd rendering of the updated version of the software. But some people had issues in Firefox and IE too.

Initially, we thought there was some kind of clash between the old icons we used in v3.1 and the image positioning/sizing in the new v3.2. All that was necessary was a hard refresh, i.e. _CTRL+F5_. That and/or _flushing the browser cache_.

All is working well now, but if you are having problems, try the underlined above.

Hi Peter.

91.7 = SR P2 Bollnäs or Överkalix.
94.5 = SR P2 Sunne/Blåbärskullen or Älvsbyn/Brännberget

92.3 = NRK P2 Skien
92.5 = NRK P3 Nordhue or NRK P2 Greipstad
93.9 = NRK P2 Kongsvinger

94.1 = NRK P1 Vestfold Sprinklerfjell
94.8 = NRK P1 Østfold Halden

94.1 = SR P2 Visby/Follingbo
94.8 = SR P4 Östergötland Norrköping/Krokek

The two first clips YL + OM are Norwegian.
Classical music is SR P2.

https://app.box.com/s/p0kjn6l788wpkh96ft1kixw8oka952ei

Meteor scatter 16:32 UTC 23/01/3017

I think I am correct as I can't find any Swedes for the last two combination of frequencies nor Norwegian for the first combination

91.7//94.5 classical = SR P2
92.3//92.5//93.9 OM =NRK P2 or NRK Petre
94.1//94.8 =NRK P1

file "23.mp3" 94.1 yl>92.3 om >94.5 classical

Thanks

Hello Chris

Thanks for listening.

I think I confused you. All stations were received at the same time. ,I recorded 5MHz bandwidth with an SDRplay.

I chose the clearest instance of each station for the audio recording.

94.1 & 94.8 had the same yl
92.3 92.5 & 93.9 had the same om
91.7 & 94.5 had the same classical music

Regards

Peter

HI Peter:

Then we can make the conclusion that it is

NRK P1, NRK P2 and SR P2 in the right order.

/Chris

Time to play catch-up with my Es files once more. I am way behind as I have been concentrating more on meteor scatter and especially on medium wave, as I tend to at this time of year!

Thank you Janpeter.

Very helpful, as always.

I updated my log with Plus Radio. Seems I already logged Libertad but
didn't realise.

Good DX!

John

Southern Norwegian transmitters are alive and well, for now!

I missed the Norwegian opening in the early part of the day but I am thankful that conditions returned during the evening.

Signals were weak to fair and conditions were not strong enough to support the reception of local stations.

In additional to Denmark, Norway and Sweden, the Flensburg and Heide transmitters were heard weakly from the north of Germany.

Good DX!

40791. OT: Whenever one feels stupid

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-01-29 01:41:58 UTC
From: ilkka suni
Topic: 40791 Message: 40791

Sorry, folks.

The issue came up, my memory tricks me, as there late yesterday was rather strong tropo lift from Sweden. My furthest away catch was the 60 kW Hoerby transmitter 1042 km away.

I believe many of us have been live interviewed in foreign languages. It always goes not that fluently. The utmost stupid moment I recall was in 1990 as a brazilian MW station of the Rio Grande do Norte department phoned me. It was a Saturday noon, and I had just fallen asleep after having stayed by the radio all night long. I do understand brazilian portuguese written, and to certain degree spoken. But do I speak portuguese? It was a phone call, for a brazilian MW station's live broadcast, and did I feel stupider than a jackass'es tail. I got the lady on the phone to realise, I understood what she spoke to me, yet in Spanish I explained to her, I cannot speak portuguese. So frustrating.

Well alright. Say 35 years ago, I fluently spoke Swedish. How fluent was I recently when I was supposed to go live.

What surprised me was, these Sveriges Radio P4 regionals with their 30 and 60 kW transmitters lied just 805 and 725 kilometres away. Still, they were curious enough after having received an e-mail reception report with an audio clip, to call the listener. I bet the reason for their curiosity was due to not having received reception reports from Finland, in ages. Every still active finnish listener had sent reception report to them already in the 70's, 80's, 90's. So had I. Just for the fun. I just decided to inform them on the exceptionally good reception quality [Yamaha TX-530 w 53//90 kHz Muratas, 8-ele yagi 10m al].

My momentary live humiliation upon my lousy Swedish. To add up, the fact, Finland is a country of two official native languages, Finnish and Swedish. Swedish primarily is spoken in the capital Helsinki region and western, coastal Finland.

103.6 kHz, P4 Oestergoetland [805 km 30 kW]:

Hello Chris, Alessandro and Hannu.

Thanks

I sent the message before I'd finished editing. I thought a or b or both might be Czech.

Clip c on 89.6 was in parallel with 90.5 and I wasn't sure if Swedish. I had DNK 91.7 Aarhus DR P3 at the same time which I managed to ID :)

Regards

Peter

The ID on the second clip is "Radio MV" so NDR 1 Radio MV from Helpterberg.
The first clip sounds like a snippet of a song to me rather than a jingle. Good DX.

Nick, Whitchurch, Hampshire.

Hi John again,

Some more on this. What I wrote is how this tx was logged by others last summer. I have now just found on the Internet a Radio Balada FM on 95.1 MHZ from Bistrita. So apparently the tx name is Balada FM, not Balda FM. Which makes more sense given the PS.

Obviously this tx has changed frequency, which is not yet processed for FMLIST.

73,

Janpeter

Thank you very much for this Janpeter.

July 10th 2017 provided some exceptional Romanian reception and I still have lots of files to go through - 167 in total! I am slowly getting through them, several each day. July 10th was the only day where I had to leave my S2 recording, hence the ridiculously large number of files.

I am up to 1530 on this day and Romania is mixing with Spain. There was some limited Turkish reception too. It was such an interesting day that I don't want to skip through the files too quickly.

Apart from July 10th. I rigidly stuck to my rule of recording only a small number of files per opening, so once I have completed the 10th I am almost done for the whole of the 2016 season.

Good DX!

John

Topic: 40806 Message: 40812
Attachments: 2 described; binary payloads are missing from this source WARC

Radio Balada on 95.1 was in FMLIST at the time when John logged it. It's license was withdrawn.
Their homepage still has full reference to FM 95.1, but we all know that the internet never forgets.
95.1 from Bistrita is now Radio Guerrilla, as updated by our editor for Romania in November 2016.
They mention 95.1 here: http://guerrillaradio.ro/retea.html
Balada is still mentioned in the "remarks" field in FMLIST.

73,
Günter

Betreff: Re: [SkywavesDX] Es UNID from last summer: 89.3 A012 ????DA?? and possible ID

Hi John again,

Some more on this. What I wrote is how this tx was logged by others last summer. I have now just found on the Internet a Radio Balada FM on 95.1 MHZ from Bistrita. So apparently the tx name is Balada FM, not Balda FM. Which makes more sense given the PS.

Obviously this tx has changed frequency, which is not yet processed for FMLIST.

73,

Janpeter

Onderwerp: Re: [SkywavesDX] Es UNID from last summer: 89.3 A012 ????DA?? and possible ID

Hi John,

The full PS is BALADA__. The tx name is Balda FM from Bistrita, Romania.

73,

Janpeter

Verzonden: zaterdag 11 februari 2017 02:35
Aan: skywavesDX@...
Onderwerp: [SkywavesDX] Es UNID from last summer: 89.3 A012 ????DA?? and possible ID

Going back over some more Es files from last summer:

https://youtu.be/FKOIJ47vUiE

Possible ID at 12 seconds. Language sounds Balkan.

PI A012
Partial PS ????DA??

Group Analyser suggests that "LA" and D1" could be part of the PS.

Any help gratefully appreciated.

Thanks.

John

40813. Re: [SkywavesDX] Es UNID from last summer: 89.3 A012 ????DA?? and possible ID

Hi Günter,

I have come across several loggings of Balada FM on 89.3 MHz over the summer period in the FMLIST logbook. The tx was logged as UNID though.

So Balada FM has been on 89.3 MHz for quite some time. Their Facebook page is showing 89.3 MHz as the frequency.

Maybe you can notify the FMLIST ROU editor to add the tx.

73, Janpeter

On 1389.980 I have audio and it's in parallel with Rádio Jornal's web stream at http://radiojornal.ne10.uol.com.br/aovivo/pesqueira/web.html

A personal first and quite rare it seems. The wide offset gave it away.

Commercials, a jingle and Portuguese OM heard.

Good DX!

John.

Excellent Ilkka.

This is a new one for me. I see it's been reported only twice in the UK
during the last few years, in 2006 and 2013, according to MWC records.
Of course, maybe other UK DXers heard it too. Looks like it's a rare
one. Had it not been for the wide offset, I wouldn't have spotted it.

Good DX!

John.

** Personal First

This is the last of the larger Es events of 2016 here. There are only a handful of much smaller openings to come. But what a fantastic opening too Romania this was, making it my best personal Romanian session ever! A few of the transmitters were flea powered.

Nice also to see Turkey appearing, albeit a single station, but a new transmitter for me.

Good DX!

John Faulkner
Skegness, Lincolnshire (JO03dd) <3m ASL.
Blog: http://skegnessdx.blogspot.co.uk
YouTube Channel: https://www.youtube.com/user/g1vvp
Vimeo Channel: https://vimeo.com/skegnessdx

Receivers:
Elad FDM-S2 (Meteor Scatter and sporadic E)
Sony XDR-F1HD with Konrad i2c mod. (Tropo/Scatter)

Aerials:
Körner 9.2 @ 5.5 metres agl. QTH is approximately 3 metres asl, 1km from the sea.
Fringe Electronics 20dB pre-amp.

Software:
Elad FDM-SW2, SDR Console File Analyser & RDS Spy via VAC.
XDR-GTK v0.3.1 for the Sony XDR-F1HD

Rotator:
Yaesu G-5500 azimuth & elevation rotator, allowing antenna to be vertical, horizontal, etc.

Thank you Nick. The combination of freqs indicated to me it was Bayern 2, if it was German, but I wasn't sure it was German.

I don't have the facilities here to listen to podcasts.

Thanks

Peter

40829. Meteor Detector for HDSDR - BETA2

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-03-04 15:34:41 UTC
From: Andy Pritchard
Topic: 40827 Message: 40829

Hi All

I've written a Meteor Detector for HDSDR. It works by analysing the waterfall screenshots which can be automatically saved by HDSDR. It uses these screenshots to determine if a signal is present on any given frequency.

This software is in beta and could have bugs! but if you would like to try it then you can download it from here: http://www.apritch.co.uk/md4_beta2.zip

The help file explains what is does and how it works:
http://www.apritch.co.uk/help/md4.htm

Enjoy!

Andy, M0CYP - Telford

From: balazserno.benko@...
Topic: 40836 Message: 40836

Lately I received a Blaupunkt San Francisco CD70 car stereo.
Checking the German radioforum I found the solution:

1.) Switch off the unit
2.) Pressing MENU and Preset 1 button together, switch on the unit
3.) Now,it works in "service" mode

Later, pressing the TUNE button you can change between the "service" and "normal" mode.

In service mode you can see:

Left: Frequency
PI Code
????

Right: Signal quality
Signal level
????

Hi, When i had this unit, quite a long time ago now, i would have dreamed
of that.

Hi sent many email to blaupunkt and they never accepted to give me the tip.

At this time, this digiceiver with sharx was the best tuner i had owned.

All the best,

Olivier GUILLAUME

From: John Faulkner
Topic: 40841 Message: 40841

https://youtu.be/FNaPZA1vu6c

As per the accompanying write-up in the video:

"The pop station is North Norfolk Radio. But who is the English station mixing? The audio quality of the presenter sounds like a 10k line or some other lower-fi processed audio system.

Conditions at the time were strong into the Baltic and Balkan countries. Double-hop was around on 6m along this path.

Any suggestions welcome, but it's highly probable that nothing will come of this. Too long ago and nothing concrete to go on.

I am just starting to check my files from this day so I can only hope that other clues may be thrown up along the way."

Just one of those unusual and probably 'never to be identified' catches, but any thoughts appreciated.

Thanks.

John.

A message to all European FM-DXers!

Here a note to let you know that the European DX Conference will be held in Tampere, Finland on 18-20 August 2017. It is time to celebrate, as this year is Finland's centennial and The European DX Council will have its 50th anniversary.
The meeting will be organized by The Finnish DX Association (SDXL, soon to be 60 years) and Tampereen DX-Kuuntelijat (local DX club celebrating its 50th anniversary).

We will follow our tradition of successful EDXC conferences held in Finland in 1971, 1987, 1992, 2002 and 2008. So it will be three days of lots of program, lots of events and lots of fun.

FM will be covered in a special workshop on Saturday.

More information is available on our website http://sdxl.fi/edxc/ http://sdxl.fi/edxc/

SDXL, Finland

Topic: 40866 Message: 40866

Hi all.
I have bought a new DSP-based tuner, and it is unlike any other I have used before. I had sort of distantly lusted after the BW Broadcast RBRX1, but never thought I'd be able to afford one. Well this has since been superseded by the RBRX Encore. Normally I wouldn't have been able to afford this sort of thing, but I had a bit of a windfall recently and so used the opportunity to snap it up. The device is actually a professional rebroadcasting receiver. Although it is extremely sophisticated with many options buried in menus, it is actually very logical and intuitive to use and I can make adjustments quickly as needed. It has dual DSP-based tuners. I had to buy adapters for the audio cables (it has balanced XLR inputs only) and for the coax plug (it uses a 50 ohm BNC input) but it was easy to set up for monitoring. The receiver is designed to work with the most challenging of reception conditions and rebroadcast your signal at the highest possible quality, so I knew it was going to be ideal for DXing.
Most of the options useful for me are in the PRESETS menu, and I go to the TUNER 1 submenu (this is the tuner I have the aerial hooked up to) where you can tune up and down in 100 kHz steps, adjust the de-emphasis (off/50 uS/75 uS), if filter (auto/fixed - the latter has 15 bandwidths to choose from ranging from 56 kHz to 311 kHz), stereo blend adjustments, stereo improvement with traditional high blend or fmsi (FM stereo improvement) which uses DSP in a similar manner to the Sony XDR-F1HD to kill the extra hiss with many parameters adjustable, soft mute on/off, again with lots of possible adjustments. The display on the left which gives info about the received signal includes RDS data like PS name, PI code and Radiotext (this doesn't seem to work properly) as well as received signal strength in dBuV, multipath %, modulation %, ultrasonic noise, softmute, high cut, stereo blend, high blend, and fmsi parameters such as low band, 2.2 kHz band, 5 kHz band and high band. In short it makes one of those Revoxes look plain and simple in comparison! Adjustments are made using the central rotary knob, which means that you can use this knob to tune up & down the band, with no muting. Very nice. The extended coverage down to 65 MHz mentioned in the PDF sepcifications is actually not included yet but will apparently be added in a future firmware update. I don't know if the DAB and HD options involve extra hardware or whether this will also be included in a firmware update. I would also hope that there will be an option to adjust the tuning steps e.g. 10, 30, 50 or 100 kHz.
For information, the available IF bandwidths available are: 56, 64, 72, 84, 114, 133, 151, 168, 184, 200, 217, 236, 254, 287 and 311 kHz. Very comprehensive and useful!
The receiver has even more flexibility if it is connected to your LAN, but that isn't really practical for my set up. In theory I could set it up to monitor, say 87.6 MHz, and send me an email when a signal is received, so it could be used as a DX warning device! Having said that, it has what I think may be a software glitch as it occasionally reboots itself at random times, so I'm going to try and update the firmware via ethernet hook-up later this week.
For DXing this receiver is a dream machine in every way. With the IF bandwidth set to Auto it isn't as good as the XDR-F1HD at fending off splatter from adjacent signals 100 kHz away, but using the fixed bandwidth of 56 kHz I think it is actually slightly better in this respect. For general tuning around and DXing I use a fixed bandwidth of 114 kHz as this is a good compromise for good audio quality, excellent selectivity, and easy RDS decoding. If you want to use the receiver as an audiophile listening device you can choose

the Measure mode, which bypasses all of the DSP and gives you an unmolested clean FM signal at the widest 311 kHz bandwidth. On BBC Radios 3 and 4 in this mode the audio quality is fantastic, with a bit of a different character to the Kenwood L-1000T, but not inferior. Bear in mind however, that using this mode you will get multiplex noise even on empty channels. The 8 presets can all have different setting stored in them so it's almost like having 8 different tuners as they can be set up for different purposes.
So this device is extremely flexible and sophisticated and it shows what can be done with the latest chipset and DSP software. More info on this receiver can be found at the links below:

I'm feeling pretty much off-topic with this question ... Absolute Radio is not among the "most-wanted" in FM-DXers wishlists. So perhaps I should better ask at a different place. No, digitalspy is not an option. They are systematically blocking German Telekom Business IPs. And their support is below 0.
Of course, I could go for a weekend trip to England to find out. But I don't like the eco balance ;-)

Betreff: [SkywavesDX] Absolute Radio

How many "versions" of Absolute Radio are there on air?
Looks like three versions:
* AM various frequencies + DAB D1 National
* FM 105.8 + DAB London 1
* FM 105.2 Sutton Coldfield
And which of these three is on this stream?
http://stream.timlradio.co.uk/ABSOLUTERADIOIRAACS

I'm aware of their other format channels on DAB, they are outside of my question.

Günter, I will try and have a listen, I have access to the London services here on FM and DAB. Stuart might be right about them having the same programming, although they might have different ads and IDs on the different services.

The station was formerly Virgin Radio. When the 105.8 service started for London, there were opt-outs from the national service for London, but I recall these were reduced or even dropped. Not sure if the same requirements were still in place when the service became Absolute Radio.

1215 is in // 105.8 at the moment. I often drive up the M40 from London to Birmingham and it’s the same programme on 105.8 and 105.2. The ads may be different – from on air comments sometimes the ads are dropped from the online stream and an extra song played.

Lyrids are active from April 18 through the 25th. A five fold Increase in activity is expected to occur this evening into early Saturday morning on April 21/22. Peak rates of 15 members per hour are predicted to occur near 17:00 Universal Time on April 22. While the Lyrids are not the strongest of major showers, it is notable that shower members will occasionally reach fireball intensity.

Thanks for the reminder, Mike!

To another issue. Have you folks photographed aircraft scatter?

What I discovered years ago, the very best plane models [i.e. their turbines] to form aircraft scatter are the A380 and ye-good-ole B747. The A350 comes next, and the B787 Dreamliner barely reaches the 4th position.

Just yesterday, I photographed the B747-830 in 34.000 ft, The Lufthansa flight was from Beijing, due Frankfurt. As you notice, the object herself is rather blurred [the shadow in the photo is by my 8-ele. yagi]. I used the Pentax K20D body, and the Tamron SP 70-300. The noise [at ISO800 only!] also bothers me, I have found the older model K10D much more clean.

Even though this is rather off-topic, folks, what is your theory as to the blur? Atmospheric distraction, or Tamron lense poor quality? I've been supposing to write an article on monitoring aircraft scatter, for a finnish radio hobbyist publication, yet I need to catch proper photos of planes forming scatter, with them doppler waves visible, even.

Anyways, supposedly need to use the early 70's Super-Takumar M42, f8/400. She truly is a sharp producer.

Today in KP41GD: early morning -10 Celsius with snowfall. Noon local time, +6 C and sunny. 6 p.m. local time, below zero, snowfall and two thunder claps. Last year this time, it was steady +10...15 C. No greenhouse over here, this spring. Just when may them jet streams bring me the first Es this year, recall I right, was it last spring or 2015, there was Es around on April 12th.

OUCH... Almost forgot. Antennenland in Germany seems to not been able to deliver the FM antenna 9.3 since November 2016. Does anybody have any info on this issue, are they possibly going to deliver any more?

Happy Lyrids!

73, Ilkka
[FIN - Joutseno]
KP41GD

P.S: I prefer the old DXmaps graphics.

Same.

  Thanks for the reminder, Mike!

To another issue. Have you folks photographed aircraft scatter?

What I discovered years ago, the very best plane models [i.e. theirturbines] to form aircraft scatter are the A380 and ye-good-oleB747. The A350 comes next, and the B787 Dreamliner barely reaches the 4thposition.

Just yesterday, I photographed the B747-830 in 34.000 ft, The Lufthansaflight was from Beijing, due Frankfurt. As you notice, the object herselfis rather blurred [the shadow in the photo is by my 8-ele. yagi]. I usedthe Pentax K20D body, and the Tamron SP 70-300. The noise [at ISO800only!] also bothers me, I have found the older model K10D much moreclean.

Even though this is rather off-topic, folks, what is your theory as tothe blur? Atmospheric distraction, or Tamron lense poor quality? I've been supposing to write an article on monitoring aircraft scatter,for a finnish radio hobbyist publication, yet I need to catch properphotos of planes forming scatter, with them doppler waves visible,even.

Anyways, supposedly need to use the early 70's Super-Takumar M42, f8/400.She truly is a sharp producer.

Today in KP41GD: early morning -10 Celsius with snowfall. Noon localtime, +6 C and sunny. 6 p.m. local time, below zero, snowfall andtwo thunder claps. Last year this time, it was steady +10...15 C. Nogreenhouse over here, this spring. Just when may them jet streams bringme the first Es this year, recall I right, was it last spring or 2015,there was Es around on April 12th.

OUCH... Almost forgot. Antennenland in Germany seems to not been able todeliver the FM antenna 9.3 since November 2016. Does anybody have anyinfo on this issue, are they possibly going to deliver any more?

Happy Lyrids!

73, Ilkka
[FIN - Joutseno]
KP41GD

P.S: I prefer the old DXmaps graphics.

Same.

At 23:17 21.4.2017, [Mike Schaffer] wrote:

Lyrids are active from April 18 through the 25th. A five fold Increase inactivity is expected to occur this evening into early Saturday morning onApril 21/22. Peak rates of 15 members per hour are predicted to occurnear 17:00 Universal Time on April 22. While the Lyrids are not thestrongest of major showers, it is notable that shower members willoccasionally reach fireball intensity.

Hi All,

The first Sporadic E of the season at my location. Always nice, after so many months with little to no DX.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Hello!

Is there any present updated list for transmitters left in Band I?

Are there any countries in Africa and Middle East left in Band 1?

** Personal First

Another quick catch-up with the remainder fo last year's Es files.

This opening produced a real treat with some short Es into Switzerland, France and Germany. Turkey also appeared, so it was a day of both 'long' and 'short'.

Good DX!

Hi Peter/group,

Looks and functions very similar to my Icom IC-7300. Shame that my transceiver doesn't receive anything above 70 MHz and no Wide FM is provided.

Best regards and 73,

Chris (Lincoln, UK) 2E0NDT.

Thank you Janpeter.

I realised I was confusing some of the networks/countries. I missed
these two.

Will add these to the log in the morning.

Best DX!

John.

From: nick gilly
Topic: 40898 Message: 40906

Hi Herman. The Arabic on 87.5 is probably a religious station from Libya, possibly from Benghazi or Sirte. It was also logged on the Sussex coast.
Unfortunately I don't know if any of this afternoon's Es reached me as the best conditions happened whilst i was at work. Good DX.

Nick, Whitchurch, Hampshire.

40908. Comparsion: Sony ST-SE700 and Sony ST-SB920

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-05-17 17:03:37 UTC
From: redbase@...
Topic: 40908 Message: 40908

Hello folks,

as a addition to my DX shack i bought a very very cheap Sony ST-SE700 for PI Code decoding without a PC. The main PCB looks identical as the ST-SB-920. Is the PCB really identical (except for the front panel)?

In the past i had a modified ST-SE520 which died a few years ago.

My modified ST-S311 (3x 110 kHz wide + 1x 56 kHz in narrow with RDS Data/Clock Output) works flawlessy but lacks the PI Code function.

73,

Matze

40909. UNID from south-east

Hi Balazs,

Are you sure this came in from the southeast? In the UK, Belgium and The Netherlands this station has also been received several times this season. It is suspected to come from Libya, south southwest from where you are. The tx has religious programming.

Hi Janpeter,

Thank you for your response !

I think you are right. My Koerner 9.2 was aimed at south-east, and received the station with full RDS, so I did not try to rotate the antenna . Anyway, it is from Libya.

Is it known what's the name of the station (if any) ?

Good DX !

Balazs

40913. Help please - UNIDs via SpE 18th May 2017

No Balazs, the station name is still unknown. All that has been received is endless religious speeches, exactly like on your recording. And the RDS is the default manufacturers coding. Telling us that the tx TRP is 5 kW, so not a very weak station at all. I bet we will be seeing a lot from it. Let's see who will be the first to catch an ID.

73,

Janpeter

Hi again Hannu. Mike Fallon logged City Radio on 88.0 from Tirana, Albania at 1833 UTC, just two minutes before my recording, and I think it must be this that I received. The ID doesn't really sound Italian to my ears, so I have amended the log.
Mike also logged BH Radio 1 from Čapljina on 87.8 around the same time. Could this be BH Radio 1 too?:
https://app.box.com/s/4aj25bjdtor8yn98pru8am8nhibg1xq9

Thanks for any more help on this. Good DX.

Nick, Whitchurch, Hampshire.

Hello All,
I just found these articles concerning an aspect of space weather I've never heard of before, Radio Bubbles.
Curtis Sadowski

Summary of articles: VLF radio waves from human activity have created a "barrier" in the Earth's magnetic field.

http://www.newsweek.com/nasa-barrier-earth-artificial-protect-space-weather-611356

Hi Nick and Hannu,

surely it's NOT italian, and the ID sounds as "City Radio" so I think it's Tirana.

Alessandro

Subject: Re: [SkywavesDX] Help please - UNIDs via SpE 18th May 2017

Hi again Hannu. Mike Fallon logged City Radio on 88.0 from Tirana, Albania at 1833 UTC, just two minutes before my recording, and I think it must be this that I received. The ID doesn't really sound Italian to my ears, so I have amended the log.

Mike also logged BH Radio 1 from Čapljina on 87.8 around the same time. Could this be BH Radio 1 too?:

https://app.box.com/s/4aj25bjdtor8yn98pru8am8nhibg1xq9

Thanks for any more help on this.

Good DX.

Could well have been chordal hop, John, with the path being
station-cloud-cloud-Skegness, and not touching the ground half way.

Another possibility is tropo enhancement at the DX end.

40926. 87.6 Radio Ibiza ?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-05-20 13:04:33 UTC
From: Arvid Husdal
Topic: 40926 Message: 40926

Hello,

Great to get some SpE today !

It was of short duration, but very interesting for me, as I managed to receive Baden-Württemberg for the first time here via SpE propagation.

Also in via St. Chrischona-tx on 89.5 MHz.

A question for the group:

On 87.6 MHz I received a station with partial RDS: NEW_IB_ _and also NEW_IBIZ, could very well be Radio Ibiza (I), and their dance-mixes.

But why the "NEW" ? Only RDS reception, unfortunately.

Any ideas ?

73!

Arvid, Kristiansand, NOR

Hi Arvid,

I am sorry, I cannot help you on this 87.6
puzzle. Anyway, it is good to read you guys in
Norway experienced some of the first Es this
summer. In Finland, this May so far is of the
poorest in ages. On Tuesday the16th only, there
was an opening to Turkey, yet rather modest one.
This past week, some activity on the the OIRT band, though.

Recall I right, you too in Norway have
experienced a cold spring? Over here, late April
and May have been very cold. Them climatologists
say, only three springs in last 100 years were
this chilly. I live roughly on the same latitude
as you, Arvid. Early this week, daytime
temperatures hung below +5 celsius with snow
falling, with them night-time lows around
-8...-10 even. Still, just yesterday it peaked +25! Rather strange.

Wishing all the Skywaves folks plenty Es!

Hi Ilkka,

The puzzle remains a puzzle, but I have a feeling this is just Radio Ibiza on a brand new freq !

Yes, indeed a very cold spring also here, mostly cloudy and low temperatures, barely passing 15 degrees this year ☐

but Winter wasn`t at all cold, just humid and grey ...

but the coming days look far better, maybe we will have some more e-s activity ?

73 to Finland !

Arvid

40929. Help please with UNID 87.8 - Romania

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-05-20 18:02:28 UTC
From: nick gilly
Topic: 40929 Message: 40929

Hi all.
I recorded this UNID on 87.8 this morning shortly before the band opened up properly:
https://app.box.com/s/l4cpz5guozgyu3o8jfcsc3yaw4ihdi14

There's a mention of a 'Restaurant Stadion' which is in Bucharest. Any possible clues as to the station? Thanks and good DX.

Nick, Whitchurch, Hampshire.

Hi All,

Today’s Sporadic E opening featured some decent distances into Russia. It is good to still see some activity on OIRT in this country.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Yes there was some mumbling before that which sounded a bit strange, thanks for letting us now. Cityradio sounded like usual italian way of "saying" style.
tnx Hannu

Hi Nick,

This is SNRT al-Idaâ al-Watania from an unknown site. In fact, Morocco has become rather unique in the sense that there are so many main line stations in the country for which no information is known or to be found. Your catch is a typical example. The tx has been received many times by several DXers, so must be running kW's. Yet still unknown from where.

40941. FMLIST Problem

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-05-24 16:43:01 UTC
From: Janpeter van Dijk
Topic: 40941 Message: 40941

Once more the question if it is just me or if others are having similar problems with FMLIST. For me it is now entirely unusable as a page takes minutes to load.

Regards,

Janpeter

From: Chris Howles
Topic: 40941 Message: 40942

Hi Janpeter,

I have had no problems with FMLIST, it loads just fine for me. I use Chrome as a browser. Dunno if that hepls at all?

Regards,
Chris.

Hi Chris,

Thanks for answering. I have the same issues on both Firefox and IE. Can't use any of it since two days. With sometimes a couple of minutes without problems.

Maybe Günter can help.

this must have been a JavaScript issue rather than Java, two different programming languages. FMLIST does not use Java, but uses JavaScript like most websites. JavaScript issues are difficult to detect because they do not leave any trace in the server log. perhaps it was a data-driven problem that disappeared when the data disappeared from the map. in case it pops up again, please report directly to me.

RAI Radio 1 from Abriola/Monte Pierfaone (PZ) also has this PI. Given what was coming in at the time, this tx makes more sense.

The 5601 PI for Abriola needs to be added to the FMLIST database.

Hi Jurgen,

No, I somehow missed your correction. It might be my state of panic (sort of), since FMLIST is simply refusing to work for me the last couple of days. I am just so glad there aren't any conditions ☐

The Ukraine oblasts I find by pointing at or clicking on the fourth link from above, on the left hand side menu, starting with Efir.

Thanks for the updates, let's see if I can catch some.

73

Hi Janpeter,

> I am a bit puzzled. I can't find anything listed for Odesa on 70.70 MHz. At
> least not on these sites:

Haven't you seen my correction a bit later?
My first one had wrong values.

These are correct
68.36 UKR Odessa, Radio M
see: http://ukrtvr.org/efir-po-naselenikh-punktakh/37/160

70.70 carrying Radio Svoboda, unknown site,
perhaps Golos Besarabii, Sarata (OD) got activated?

> http://ukrtvr.org/efir-po-naselenikh-punktakh/odeska-oblast.html

How did you select that one?
I tried it before but only found Odessa city but not Odessa oblast.
The other oblast's are there.

> I would like to know who the other new OIRT stations are, maybe Victor can
> provide a short list?

Also this one has a few new ones:
https://svitle.org/

Jurgen Bartels Suellwarden, N. Germany
Ant. hor: 29-45MHz 7-el, 45-87MHz 11-el, FM 15.11, Band-3:13-el,
UHF:48-el
TV: Winradio G305 / Fly2000 + video noise filter & variable IF BW
FM: Downconverter + Perseus + Speclab as WFM demod.
27-1000MHz: Airspy with HDSDR
MW: 30 x 4m EWE 320° with JB-terminator, Winradio & Perseus

 Hi Nick,This is SNRT al-Idaâ al-Watania from an unknown site. In fact, Morocco has become rather unique in the sense that there are so many main line stations in the country for which no information is known or to be found. Your catch is a typical example. The tx has been received many times by several DXers, so must be running kW's. Yet still unknown from where.73Janpeter

However if you want to decode them then you have to fit a discriminator tap.

It's an analogue radio. You either need a digital radio, Or use a PC and the tapped output to decode the digital audio from it. It might help if you define 'digital' Do you mean digital voice modes or datamodes?

Hi All,

Nice Band II tropospheric enhancement today, much more than I had expected based on the forecast maps.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

** Personal First

Not sure if this tropo was forecast as I rarely check these days, but
this was a very nice surprise.

This was a good opening to Germany and the Netherlands and I
concentrated on the latter as signals from the regular Dutch stations
were so strong that I couldn't resist rotating the antenna to vertical
to see if I could catch some locals at the top of the band. I was not
disappointed! The opening was centred around areas of the Netherlands I
have not previously received, so several personal firsts were caught in
this lift.

Good DX!

40973. 107.5 UNID Dutch talk - help please

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-05-29 11:21:08 UTC
From: nick gilly
Topic: 40973 Message: 40973

At least, I think it's Dutch. This was received last night on 107.5 during excellent tropo conditions to northern Germany and the Netherlands:
https://app.box.com/s/44z3622splogtpacoxv40ch93ae6m4aa

I tried all the Dutch and Belgian streams listed on 107.5 in FMLIST, but they were all playing music. It's weak and scratchy but I'm hoping a Dutch speaker might be able to decipher it. Thanks and good DX.

Nick, Whitchurch, Hampshire.

Thanks John.
Funny you should say that, but the more I listened to it the more I realised it wasn't Dutch but probably Polish. If so, I think the most likely candidate is PR 24 from Lębork in NW Poland near the Baltic coast. It's on the same sort of bearing as the German reception. Good DX.

Hi Ruud & John.

It's more-or-less certain now that this was PR 24 from Lębork. This station was also received by Dave Bunyan in Kent about 15 minutes before my recording.

The distance from here is 1331 km. A very unexpected surprise!

Good DX.

Nick, Whitchurch, Hampshire.

40982. iTrip or E-skip?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-05-30 21:07:29 UTC
From: nick gilly
Topic: 40982 Message: 40982

What do we think?:
https://app.box.com/s/u3a4ip6558c2jynmdjfequmja049mpz8

I'm inclined to think iTrip but would be interested to know what others think. Thanks and good DX.

Nick, Whitchurch, Hampshire.

** Personal First

The first decent opening of the season with some interesting reception.
I could only listen for a few minutes before having to go into town. I
left the receiver recording while I was out. Greece continued to be well
heard for at least another hour, before Italy took over. Lack of time
prevents me from checking most of the recordings, plus I am trying not
to get bogged down with another huge 'catchup' situation.

Good DX!

Yes, it's definitely Albanian.

You can hear the adv of the "Mon Cheri Coffee Shop" located in Tirana.

Many thanks Franco for your confirmation re Albania.

Now I can proceed to investigate with station it might be.

73,
John

Hello John,

I am going to ask my Albanian neighboor to listen your recording and trying to detect something useful for your identification.
:)

Hello Franco,

Unid solved !

It is Radio Club FM with new PI code 3D44 (ex 12FF).

Thanks for your help.

73,
John

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-05-31 20:44:02 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40991

Hi All,

A good day for Sporadic E DX today. With high MUF’s for several hours. Most remarkable was the intense and persistent opening into Greece, by far the best I have ever had.
A big compliment goes out to the FMLIST GRC editors. The database must be very up to date, as I have not a single UNID from Greece. Also, almost all of the webstream links work. A huge improvement compared to a couple of years ago!

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

40992. Finland 93.4 hrd in Pantelleria (Sicily)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-01 17:15:33 UTC
From: andrea.lawendel@...
Topic: 40992 Message: 40992
Attachments: 1 described; binary payloads are missing from this source WARC

Hi,

I'm spending a few days here on the tiny Sicilian island of Pantelleriea (actually closer to Tunisia), a site I had been away from for a few years but which I had already positevely tested as a prime FM DX location. Yesterday, May 31st, was a very good one, with prolonged Es conditions mainly centered on Poland. I was totally amazed to hear presumed Finland (I'm pretty sure it's not Estonian) on 93.4 around 12:20 utc, at the end of a first phase of this opening (it did start again some 2 hours later). According to FMLIST, it could be YLEX Lieksa, but that would place this DX - made with my usual "beach DX" ultralight PL-390 and its short telescopic antenna - at almost 3.200 km from my location! Which is hard to believe in spite the 390 being really sensitive.
Can some fellow Finnish DXer kindly give a try to this very short clip? Is that really "YleX" (pronounced "üles" I'm hearing at the very beginning and midway?

https://chirb.it/wp/P9ttdz https://chirb.it/wp/P9ttdz

Many thanks and 73

Andy
(attached a GMaps screenshot with the exact location on a wooden tan and dive board in Cala Tramontana, Pantelleria)

Moi Andy;), esatto e finlandese, la lingua. Does not sound like YleX (youth px, former legendary Radio Mafia) px at all, some author/writer visits the studio and they are talking about his book and finnish history, Mannerheim, his aid Hanna and so on. I've an idea, this could be Sisuradio, a finnish px, broadcasted by Sveriges Radio (SR2), as they had this px, yesterday, just an idea..same presenter (for me) at least talking swedish in this clip:

http://sverigesradio.se/sida/artikel.aspx?programid=185&artikel=6552749

my vote goes to Sisuradio, via SR P2

Hannu

btw listened without headset, no YleX id at least for me, so loud only the Sisuradio, I'd say it came via SR P2 (Sisu= grinta, in italian)

40997. UNID: Albania? PI 83CF

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-01 20:08:52 UTC
From: Jim Smith G0OFE
Topic: 40994 Message: 40997

Nice intense opening this evening Spain North Africa Italy, then Germany/Czech/Poland beforer back to Italy and the Balkans. Well over 3 hours worth - about time we got some proper action. Will have to finish putting my logs in tomorrow!

Got a station with:

PI 83CF

PS TIRANA KLASIK

Not listed on FM List. No listed station at all has that PI code. I am assuming Albania.......

There is no station on the Albania list on any frequency with KLASIK in the name.

Anyone any idea what this might be?

TIA.....

40999. Band II Sporadic E Loggings for 1 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-01 20:27:29 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 40999

Hi All,

A mixed Band II DX bag today, with both tropo and Sporadic E. The Es opening was a wild one, with the skip area switching back and forth from Italy through Algeria into Spain. Also the skip distance rapidly changed, making it difficult to determine what was received. Very interesting to see this happening.
Below are my Es loggings, the tropospheric loggings will follow later.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Kiitos Hannu!

Yes, it dovetails with a couple other frequencies with Swedish programming! Finland sounded too good to be true, especially at such a northern latitude. Nice catch, anyway!

Topic: 40994 Message: 41002

Hi Jim. I found this Facebook page for them:
https://www.facebook.com/RADIO-Tirana-Klasik-1879252659062927/
https://www.facebook.com/RADIO-Tirana-Klasik-1879252659062927/

This may be a brand new station. It looks like their Facebook page was only created on 31/05/2017!

I've found out some more, this time from Radio Tirana's Facebook page at https://www.facebook.com/radiotirana1/?hc_ref=PAGES_TIMELINE https://www.facebook.com/radiotirana1/?hc_ref=PAGES_TIMELINE .

There's a post on there about the new station - https://www.facebook.com/radiotirana1/photos/a.106915234302.90939.35282334302/10155204904229303/?type=3 https://www.facebook.com/radiotirana1/photos/a.106915234302.90939.35282334302/10155204904229303/?type=3 . The English translation from Facebook reads:

"May 18th, 2017, at 19:30 began broadcasting radio with new in Albania, the only of its kind in the country, Classic Radio Tirana 101.2 FM, dedicated music classic!
" think with your music, keep dreaming with music!
Radio Tirana Classic 101.2 FM"

I wonder if you have the the first logging outside of Albania, Jim?

Looking at FMLIST, I suspect that Radio Tirana have killed off (or changed the frequency of) the listed "Boom Boom Radio Jazz 101.2 FM", in favour of the new Radio Tirana Klasik. The jazz station was listed as 37.77kW (how precise!)

Date: 2017-06-02 07:49:44 UTC
From: John Faulkner
Topic: 40998 Message: 41007

I see that D91B is Hitradio.RT1 Südschwaben.

Would I be correct in guessing that the "PLANNED" 50 watt tx on 92.2
from Memmingen-Memmingerberg is my station? I received Hitradio.RT1
Südschwaben from the Memmingen-Bad Grönenbach tx on 90.2 at the same time.

If so then it looks like Hitradio.RT1 Südschwaben is on air.

Thanks.

John.

41009. UNID 93.3 Meteor Scatter DX

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-03 04:05:06 UTC
From: Les Rayburn
Topic: 41009 Message: 41009

I posted a brief recording of an UNID meteor scatter signal recorded this morning on 93.3 FM here in Alabama. Two signals can be heard during the same ping. The first is playing Cindy Lauper's "Girls Just Wanna Have Fun", but the second is ID'ing a web site that sounds like call letters.

If anyone can make it out, I'd be grateful for the assist. You can download the MP3 at:

http://forums.wtfda.org/showthread.php?11379-UNID-93-3-Meteor-Scatter

41011. UNID 91.2 with PI 3133, jingle/ID near the end?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-03 07:26:09 UTC
From: nickgilly@...
Topic: 41011 Message: 41011

Hi all.

Any ideas on this one please? There's definitely a jingle or ID near the end of the clip after the song finishes:

https://app.box.com/s/1zztgmb17tcogjc9me1b1htpst9qouxb
https://app.box.com/s/1zztgmb17tcogjc9me1b1htpst9qouxb

This was during a late night opening to the Balkans.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

** Personal First

A good evening of DX with a few catch-up files, now fully caught up!

The session began with a lot of short skip into southern Germany. A few unfamiliar "1***" PI codes were displaying, but the signals faded the moment I hit the record button and they all got away. If only I had been aware of this opening a few minutes earlier.

Good DX!

** Personal First

The day began with the strongest signals I have known from Italy. Some
of them reached a whopping S9+60dB! (But bear in mind that I am using a
Fringe Electronics 20dB pre-amp.)

All Belmont frequencies were either squashed or simply did not exist, as
if Belmont had gone off the air! Examples of this included 102.2,
usually occupied by a strong Lincs FM, and 88.8, BBC R2. Thgese
frequencies were often 'empty' at times, as if they didn't exist. So

even when the Italian stations dropped down in strength on these frequencies, Lincs FM and BBC R2 did not return and the frequencies had nothing on them. This is the weird effect an intense opening can have on the band. I have noticed this very same knocking out of local stations effect during intense tropo too.

I found myself struggling to find the enthusiasm to log anything during the morning Italian opening, so I concentrated on logging only those stations I had not received before.

There was relatively little 'soup' this time too as there was less co-channel interference than usual, but RDS still struggled to form in spite of the hefty signals.

The evening opening may have had some Turkish signals, but they were too brief and weak to identify.

Good DX!

From: Les Rayburn
Topic: 41017 Message: 41017

Russ—

My sincere thanks. I'm still getting accustomed to pulling out ID's on FM.

That's one mystery solved, but in the process you've created another. WKYQ in Paducah, KY is roughly 285 miles from me. That's too close for meteor scatter—the physics simply don't work out.

It's unlikely to be e-skip either. The ionization would have to be intense to produce skip that close, and the MUF would have needed to be very high. No evidence of that either.

So what is the likely mode of propagation? Airplane scatter?

41021. Re: [SkywavesDX] Re: [WTFDA] UNID 93.3 Meteor Scatter DX

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-03 17:27:32 UTC
From: John Faulkner
Topic: 41017 Message: 41021

I have had meteor scatter much short er than this, thought to be meteor backscatter, which was a new term to me at the time.

The video of this is here:
https://www.youtube.com/edit?o=U&video_id=amp99-hS8kI

So meteor scatter is certainly possible at 285 miles. The only other alternative would be lightning scatter, with a storm at the mid point. I have experienced this too, but I also heard static crashes immediately before the reception.

Regards.

John.

From: ilkka suni
Topic: 41017 Message: 41022

Hi folks,

The closest MS catches, I can recall people
having mentioned, are around the 250 miles range.
My closest one would be 260 mi. Still, sometimes
it is very hard to tell by the audio, whether it is AS or MS.

Sometimes, it helps if one can recognize whether
there was a man-made object around, to form
scatter. For aircraft monitoring, I have found
the Planefinder much more handy than the flightradar24. com:
https://planefinder.net/?embedrefer=true#

From: Jim Smith G0OFE
Topic: 41024 Message: 41024

Nice opening today to North Africa and the Med. Nice to log Libya which is never easy from here.

I also logged a D305 on 101.1 which is unlisted in FM List. I suspect it was Libya, anyone have any further info on this one?

Thanks..

41025. Band II Sporadic E Loggings for 3 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-03 20:24:57 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41025

Hi All,

Yet another big Band II Sporadic E DX day today. Resulting in a crowded band with at times a widespread skip area. When Morocco, Alegeria, Tunisia en Libya can be received simultaneously, things become a bit complicated.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Onderwerp: [SkywavesDX] unknown from today D305 101.1

Nice opening today to North Africa and the Med. Nice to log Libya which is never easy from here.

I also logged a D305 on 101.1 which is unlisted in FM List. I suspect it was Libya, anyone have any further info on this one?

Thanks..

Hi All

I’ve figured it out; its:

RADIO_TEST_FM from Istanbul

Now for the PI 4045 on 92.4 and the station that mentions the red sea on 93.6

Andy.

From: 'Andy Pritchard' apritch@... [SkywavesDX]

Sorry Andy,
If you look carefully to the Istanbul station on 94.0 you will see I marked it as planned and the tx site is the new TV tower that will be operating early next year.
There is definitely no such station. I just added it for test purposes.
Sorry again
Kurt - Istanbul

Hi all.
I also had an UNID station on 102.1 which I suspect may have been Al Tanasuh from Tripoli. It had religious programming and didn't match anything from Algeria or Tunisia. Also Radio Awal was logged on 106.3 with full RDS, and the unid Quran station on 87.5 briefly popped up. Is this last one really as far across as Benghazi?
Over 3 hours of recordings to go through now, but that can wait until tomorrow... Good DX.

Nick, Whitchurch, Hampshire.

I agree with you Nick. The 87.5 MHz LBY religious station is most likely not from Benghazi but from the greater Tripoli area instead. I have never received anything before from Benghazi, while the 87.5 MHz station is coming in with almost every Es opening into that direction.

Hi all.

I also had an UNID station on 102.1 which I suspect may have been Al Tanasuh from Tripoli. It had religious programming and didn't match anything from Algeria or Tunisia. Also Radio Awal was logged on 106.3 with full RDS, and the unid Quran station on 87.5 briefly popped up. Is this last one really as far across as Benghazi?

Over 3 hours of recordings to go through now, but that can wait until tomorrow...

Good DX.

Nick, Whitchurch, Hampshire.

Onderwerp: [SkywavesDX] unknown from today D305 101.1

Nice opening today to North Africa and the Med. Nice to log Libya which is never easy from here.

I also logged a D305 on 101.1 which is unlisted in FM List. I suspect it was Libya, anyone have any further info on this one?

Thanks..

41040. Sporadic E Loggings for 4 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-04 20:39:58 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41040

Hi All,

The Sporadic E propagation is going from good to great. Today’s many hours with solid DX featured the following highlights:

* DX from no less than 14 countries: ALG, BLR, E, EST, F, GRC, I, LTY, LVA, MRC, POL, POR, RUS and UKR
* Short skip from France
* 2 x Es from the Sverdlovskaya oblast in Russia
Truly a large variety made this a very enjoyable day. More of this please!

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Hello,

Maybe one of our Russian or Ukrainian members knows
which FM station belongs to this PI code.

Received yesterday afternoon on 89.40 Mhz.

73,
John
The Netherlands

41051. FMLIST Refusal

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-05 18:42:34 UTC
From: Janpeter van Dijk
Topic: 41047 Message: 41051

Is it me again or is this a general FMLIST failure? I can't login anymore, the entire web site seems to be down.

73

Janpeter

Onderwerp: Re: [SkywavesDX] FMLIST Refusal

Moi Jan, how about some googling..;)
Works with Chrome. Even I don't use, just Freedome bt F-Secure. No problems ever with FMLIST (don't have time and intrest to use (downloads/country databases suit me fine) it but anyways..)
https://support.google.com/chromebook/answer/95464?co=GENIE.Platform%3DDesktop&hl=en
Browse in private with Incognito mode - Computer ...<https://support.google.com/chromebook/answer/95464?co=GENIE.Platform%3DDesktop&hl=en>
support.google.com
If you don’t want Google Chrome to save a record of what you visit and download, you can browse the web privately in Incognito mode. How Incognito mode works

hannu
Open an Incognito window

You can open an Incognito window on your computer to prevent Chrome from saving your browsing history. You can switch between an Incognito window and any regular windows you have open. You'll only be in Incognito mode when you're using the Incognito window.

1. Open Chrome.
2. At the top right, click More [More] [and then] New Incognito Window.
3. A new window will open. In the top corner, check for the gray Incognito icon [Incognito mode] .

You can also use a keyboard shortcut to open an Incognito window:

* Windows, Linux, or Chrome OS: Press Ctrl + Shift + n.
* Mac: Press ⌘ + Shift + n.

Exit and turn off Incognito mode

Incognito mode runs in a separate window from your normal Chrome browsing sessions. To exit Incognito mode, you'll need to close all Incognito windows.

1. Go to your Incognito window.
2. In the corner of the window, click Close [Close] .
* Windows, Linux, or Chrome OS: See the top right.
* Mac: See the top left.

A good suggestion for you would be try a different browser or if you don't have an alternative try using incognito mode so any cookies are not checked. If that works, clean ALL cookies.

From: Janpeter van Dijk
Topic: 38927 Message: 41069

Hi All,

Today again a good spell with Band II Sporadic E propagation. Not as intense as yesterday, but still some good signals mainly from Spain and Italy. At times coming in simultaneously, at other times the skip area switched back and forth between the two countries.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41073. Recording of BFBS Cyprus 99.6/87.5 unid

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-05 21:14:23 UTC
From: nickgilly@...
Topic: 41073 Message: 41073

Here's a recording of BFBS Cyprus received here at around 1100 UTC on Sunday June 4th:

https://app.box.com/s/u85tg2tos6sq2o5qsqd8451dxu4rtqvk
https://app.box.com/s/u85tg2tos6sq2o5qsqd8451dxu4rtqvk

I had just received Bosnia & Herzegovina on 100.1 just before this, and when the PI code FE01 quickly appeared, I assumed it was Balkan. Then there was the TOTH ID of BFBS. I assumed it was a Balkan relay, until I looked it up and found it is actually from Cyprus! It's the signal strength which surprised me.

This appeared next on 87.5:

https://app.box.com/s/sx4oymh6mcwqhw0zbxmqt9p18ddgrrt8
https://app.box.com/s/sx4oymh6mcwqhw0zbxmqt9p18ddgrrt8

I wonder if it may be from Lebanon, which is on the same bearing.

After that the exotics disappeared.

Good DX.

Nick, Whitchurch, Hampshire.

RBRX Encore, Kenwood L-1000T, Yamaha T-2, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

41075. Re:: Re: [SkywavesDX] Recording of BFBS Cyprus 99.6/87.5 unid

From: nickgilly@...
Topic: 41073 Message: 41075

Thanks Jurgen.

Radyo Vatan is in Turkish, but I'm pretty sure the music on my clip is Arabic. A shame I didn't catch any speech.

Good DX.

Nick, Whitchurch, Hampshire.

BW Broadcast RBRX Encore, Kenwood L-1000T, Yamaha T-2, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

41077. UNID Ukraine on 91.8, maybe UR 1?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-06 06:18:33 UTC
From: nickgilly@...
Topic: 41077 Message: 41077

This was received on Sunday 4th June again, when reception had swung round to eastern Europe:

Part 1: https://app.box.com/s/vsii2okd7h547gof4s0kc1wa4gwno0ic
https://app.box.com/s/vsii2okd7h547gof4s0kc1wa4gwno0ic

Part 2: https://app.box.com/s/fl9cb8l3a753qgmjnbkgh0ddxypn0axf
https://app.box.com/s/fl9cb8l3a753qgmjnbkgh0ddxypn0axf

It would appear to be Ukraine and I was wondering if it was UR 1.

Thanks in advance for any help with these clips.

Good DX.

Nick, Whitchurch, Hampshire.

Hi Jurgen,

> Why not let the dongle run in the background, tuned to the rare

> channels. Use slow a waterfall speed so you can spot the unsuals
> when you look in between.
> I use a 4 minutes span.

I thought about that. But for reasons I have not been able to find, once I connect the Band I antenna to the Dongle I am getting a terrible noise level on Band II. For a longer time I have had the plan to re-arrange my DX set-up, in an attempt to get rid of the noise. But since this is such a big project, I did not come to the decision to go ahead with it yet. I realize that time is running out though, it won't be long until the Russian Band I stations will be taken off air.

41079. Technics ST-G470L ?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-06 18:39:58 UTC
From: ilkka suni
Topic: 41079 Message: 41079

Hi folks,

I am doomed to these old, basic tuners, due to the nearby 30kW transmitter.

Has anybody any experience on the Technics ST-G470L? FMtunerinfo
tells nothing on the very model, of late '80s early '90s. Kind of a
mid, to upper mid-class model, I reckon.

How many IF filters are there? Does the tuner offer memory scan function?

Thank you, for any information.

73, ilkka

Topic: 38927 Message: 41081

Hi All,

Also today a very radioactive Band, thanks to the Es still going strong. Unfortunately I had to miss a lot of the opening.
I may not be the first one to note this, but the Golos Nadiyi network in Ukraine has been activated. There are other changes in this country that have not yet been processed in FMLIST.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41084. Automating the review of RDS Spy Logs

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-07 08:03:54 UTC
From: Les Rayburn
Topic: 41084 Message: 41084

I use RDS Spy to generate daily logs of PI Codes captured here. I actually have several instances of RDS Spy running at all times. One version is “fed” by the MPX output of an AirSpy SDR receiver. Using Andy Pritchard’s wonderful “RDS Datalogger” i basically have an FM DX scanner that avoids the local channels and looks for RDS signals only on the clear (or semi-clear) channels here.

This results in several stations PI Codes being captured over and over again—depending on which way the antenna is pointed, and tropo conditions overnight.

In order to identify unique PI Codes, I have to manually scan each day’s RDS Spy.TXT file. If I’m unsure about a code, I have to manually look it up—this usually results in my finding out that I’ve logged that station in the past.

I’d love to create “white list” of PI Codes that have been logged before, and be able to quickly get a list of unique PI codes that have not been logged before.

Doing this would require some sort of simple database, and the ability to import the RDS Spy text file into that database for comparison. I think this might be done inside Excel, but I’m not sure.

Has anyone else attempted a solution to this problem? I’d welcome any input here.

Hi John,

Serbian, anyway. Sounds like Radio Bis.

41087. Broken TV-card?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-07 14:18:32 UTC
From: Christian S
Topic: 41087 Message: 41087

Hi!

This season I haven't received any signals on band I despite good signal strength, around S8 on my FT-857.

I'm wondering if my tv-card, an AverMedia M168-K is broken. It doesn't make any sense if I have the aerial and preamp connected or not.

What do you think? I mean signals around S8 should be detectable. Last season I received once or twice. The antenna works fine and so do the preamp.

I have seen equal cards on eBay but just for NTSC N. Mine is for PAL B/G but can handel all analogue formats. Maybe it doesn't matter?

Sorry message not quoted:

This was received on Sunday 4th June again, when reception had swung round to eastern Europe:

Part 1: https://app.box.com/s/vsii2okd7h547gof4s0kc1wa4gwno0ic
https://app.box.com/s/vsii2okd7h547gof4s0kc1wa4gwno0ic

Part 2: https://app.box.com/s/fl9cb8l3a753qgmjnbkgh0ddxypn0axf
https://app.box.com/s/fl9cb8l3a753qgmjnbkgh0ddxypn0axf

It would appear to be Ukraine and I was wondering if it was UR 1.

Thanks in advance for any help with these clips.

Good DX.

Nick, Whitchurch, Hampshire.

41091. Sporadic E Loggings for 7 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-07 20:46:37 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41091

Hi All,

This Sporadic E spell is gradually building into something of unprecedented proportions. With today being the nineth consecutive day with a substantial Band II opening in Europe.

Today’s opening started in a way that was difficult to work with. The skip area was widespread and the signals were weak and very unstable. As time progressed, a very intense opening developed with a MUF that may well have reached Band III. A lot of rare Band II DX was the result.

This is a very good season so far, despite of the slow start.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Hello,

during tonight`s interesting SpE between 18.39-18.41 DZ I received the same stand-up comedy show on both 88.2 and 90.9 MHz,

somehow I am not able to find out which station has these two frequencies ?

It is hard to say which direction, but three minutes later I received SWR 1 R-P from Bornberg on 90.8 MHz.

I am grateful for any help !

Hello ilkka,

Thanks for your reply, shame that the station isn't listed somewhere.
Maybe it will pop-up again with more info during a next Balkan opening.

Hi John,

Actually, I am not sure of the station [or programme] name, the lady pronounces.

Possibly, it is not "Bis". The word well may consist of 5 or 6 letters, two syllables, and possibly ends "...dic". The language still is Serbian, or Serbocroatian. The announcer giving the frequency, refers to a local station, or a regional programme.

Well worth finding out, might be a whole new station.

41099. 92.20 FIN not listed

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-08 12:54:00 UTC
From: John Marsyla
Topic: 41099 Message: 41099

I heard this morning during Es into Finland on 92.20 Mhz YLE PUHE with PI code 6207.

However I don't see this one listed in FMLIST.

Is this a new one ?

Maybe ilkka can provide more info.

73,
John Märsylä

https://www.mediamonitori.fi/index.php/tietosivut/taajuuslista

Feed the frequency desired, in the bottom column,
one finds all the active stations in Finland, on the frequency.

73, ilkka

Hi Ilkka,

thank you for checking it out !

I think it has to be Ö1, but will check out NDR 1 Schedule as well.

73 de Arvid

Hi Arvid,

Ö1 or NDR1.

73, ilkka

At 00:47 8.6.2017, you wrote:

Hello,

during tonight`s interesting SpE between 18.39-18.41 DZ I received the same stand-up comedy show on both 88.2 and 90.9 MHz,

somehow I am not able to find out which station has these two frequencies ?

It is hard to say which direction, but three minutes later I received SWR 1 R-P from Bornberg on 90.8 MHz.

I am grateful for any help !

41103. Two FM-DX-peditions at the same time in Finland - in SW (Utö) and SE (Virolahti)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-08 14:30:09 UTC
From: harriku@...
Topic: 41103 Message: 41103

Two groups of FM-DXers are organizing 10 days peditions in Finland this summer. Those DX-camps are held between 7.6. - 17.6.2017.
The distance between these QTHs is 360 km. So, the conditions will differ very much.

Utö-island, SW Finland - Utö18
This traditonal FM-pedition is now named Utö18. There are 7 regular participats: JUS, JJS, JTK, MB, OSY, JJK and JY (in order of appeareance).

Virolahti (Poronniemi), SE Finland - Poron1
This is the first FM-pedition in very southeast of Finland in Virolahti, close to Russian boarder, named Poron1. The participants are HKU, TAK and VJR. This new QTH is by the sea with a view to Russian islands. The DX-target is east and southeast. Körner 15.11 and Körner 9el + OIRT and amps. Several Perseus, SDR Plays and XDRs are in use.
Picture of the cottage http://www.poronniemi.net/ - View to southeast
http://users.kymp.net/p402450a/images/villaporo/cwdata/Pict0704.html - View to southwest
http://users.kymp.net/p402450a/images/villaporo/cwdata/Pict0705.html

Some photos are added here later from new QTH Virolahti, Poronniemi - and also some comments of the FM-openings f the pediton.

Great opening at the start in Utö and Poronniemi 7th amd 8th June. A lot of big signals from western Europe!!

Harri Kujala
Naantali - Finland

41104. FM-DX--camp-link and photos (later more)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-08 16:06:03 UTC
From: harriku@...
Topic: 41104 Message: 41104

Here a new message about DX-camps. I forgot to add the site-link:

http://uto-fmdx.blogspot.fi/ http://uto-fmdx.blogspot.fi/

There is now antenna-photo added and some more photos later.

Harri

41105. Sporadic E Loggings for 8 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-08 20:22:18 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41105

Hi All,

Again a massively big Sporadic E day today. Starting early towards Russia, with increasing intensity towards noon. This resulted in a very nice opening into Norway, which had been many years ago since this last happened. And which may well be the last time it happens with the analogue shut down in the country.
I catched Radio Rossia with a clear ID on 68.93 MHz. I am pretty sure this was 2 x Es from Sredniy Bugalysh, again in the Sverdlovskaya oblast. I have some doubt though since the tx is running 100 Watts only. The skip azimuth at the time was 60 – 70 °.

FMLIST Finland needs a heavy update.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

It's Radio Brus, from the town of the same name in Serbia. "Talasna dužina 94 koma 1, Radio Brus".

For some reason the station is listed in FMSCAN as "closed", even when it's still operating.

90.7 is Mag Radio from Podgorica. "BD 90.0" is the frequency for Budva. Both frequencies once belonged to Radio Atlas that seems to be defunct.

Many thanks OM, it was my thought too, but FMLIST listed it as closed.

Anyhow my unid is now solved !!

I will enter the log in FMLIST and make a notify to the editor.

And the second audio clip is a Serbian religious programme. Probably Radio Beseda (Novi Sad).

41115. Dover via E skip?!

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-09 18:54:43 UTC
From: Paul Logan
Topic: 41115 Message: 41115

Hi all,
at 11 am this morning during a very intense opening to northern France Radio 2 popped up here on 90.0 fading just as E skip would.

I'm seriously thinking it's Dover at 685 km.
Morecambe bay is also on this freq but I am in the bottom of a valley and have never heard it via tropo or aircraft scatter.
Dover was in line with other stuff being received at about 800 km.

Alas my recording ends just as it peaks up. 92.4 was blocked with a French signal so couldn't confirm Radio 3 from the same site.
Could it really have been?
Any ideas? Paul Logan, Lisnaskea, N. Ireland

41116. UNID German speaking station , 99.3 MHz

Yahoo group: SkywavesDX (2016 — 2017)

Topic: 41116 Message: 41116

https://soundcloud.com/arvid-husdal/unid-german-speaking-station-993-mhz-0820-utc-09062017

Hello,

usually UNID German/Austrian stations are identified by "Titelsuche" etc,

but I am not able to find this one based upon the track "Funky Town".

My bet, however, goes to Ö3.

I will appreciate any comments !

73 from Arvid - god DX !

41117. Re: [SkywavesDX] Dover via E skip?!

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-09 19:22:32 UTC
From: Jim Smith G0OFE
Topic: 41115 Message: 41117

It's perfectly possible, Paul.

I had skip of just over 700km on occasions, and on 6m I have had skip as short as 350km.

Es this week has been so intense at times, for my money your Radio 2 was Dover.

==========

From: John Faulkner
Topic: 41115 Message: 41119

No doubt about it Paul. Probably Es backscatter which occurs in the more intense Es openings. There was some very short skip in here this morning too.

Good DX!

John.

From: nickgilly@...
Topic: 41115 Message: 41123

An excellent log Paul!

I also received my shortest E-skip so far on June 1st:

https://app.box.com/s/ktwrej8kagraazwye1egph9sifdg9bfc
https://app.box.com/s/ktwrej8kagraazwye1egph9sifdg9bfc

The pop music on that recording turned out to be Antenne Frankfurt from Wiesbaden-Delkenheim at 698 km, confirmed by the PI code of 1362.

This is really the most amazing spell of E-skip I can remember. Long may it continue!

Good DX.

From: nickgilly@...
Topic: 41077 Message: 41124

Thanks very much for your help on this. The tuner only tunes in 100 kHz steps so it's possible it was TV audio although I don't remember hearing it on 91.7. The filter response is symmetrical too.

Does it sound like TV audio rather than a radio programme?

Thanks and good DX.

A pity you don't have an SDR. TV audio has a narrower bandwidth than FM radio, and of course it would be easy to see if the frequency is 91.75 or 91.8 MHz..

41128. Problem with Sangean HDT-1

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-10 08:21:18 UTC
From: Les Rayburn
Topic: 41128 Message: 41128

I’m having a strange problem with my Sangean HDT-1 tuner. Hoping someone can help me to troubleshoot the unit.

Currently, I have the Sangean HDT-1 connected to an FM-6 antenna and it’s left on 24 hours a day. I use it to detect brief RDS decodes, catching them with a web cam set up to record any change in the screen graphics.

This has worked fine for several days, but now the radio is acting strangely. While the dial appears normal, frequency displayed, etc. Only one or two captures will be made before the tuner appears to lock up. No audio output, and no further RDS signals detected.

The controls for tuning, etc. also are frozen. If you power down the unit and turn it back on—everything works normally again—but only for awhile.

Any thoughts on troubleshooting? Anyone else had this issue?

From: Jim Smith G0OFE
Topic: 41131 Message: 41131

At some point I ought to post my logs - Lots of Es, together with trying to get our home ready for the arrival of our daughter in August has left me with little time for much else...

Still trying to finish off checking my recordings made during the day of 2nd June while I was at work.

Just after 1000, Egypt showed up on 90.9. The same TX I am pretty sure brought signals on 88.7 and 88.2 as well, though they did not produce RDS.

https://www.youtube.com/watch?v=V7bHW_83ADI

Balkans and Israel were in at the time. First part is a YL talking, the second is a clip from a song that went on for more than 20 minutes. No sign of RDS at all despite the signal getting up to good strength at times. didnt hear any speech immediately before the song or after it ended.

Have had Romanian suggested for the YL, and another opinion of the song is that it might be middle eastern, but I don;t have a clue, really!

Any ideas anyone?

41135. Valencia via tropo?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-10 20:38:29 UTC
From: nickgilly@...
Topic: 41135 Message: 41135

I recorded this Spanish signal on 96.9 today during the tropo:

https://app.box.com/s/uravu6p1ss1oojbne197jhkqm2bj4zyz
https://app.box.com/s/uravu6p1ss1oojbne197jhkqm2bj4zyz

It definitely wasn't the 'usual' RNE Radio Nacional, and on uploading it to the Skywaves chat, member 'Mad' had a listen. He suggested an ID of 'Kiss' from the YL presenter 7 seconds in, and it does sound like that to me as well. The only relay of Kiss FM on 96.9 listed on FMLIST is Valencia at 1291 km. At the time, I assumed it was tropo, as I hadn't logged any Es then and looking at the FMLIST logbook nor did anyone else. Pic du Midi was coming in simultaneously on a bearing of 173 deg. The bearing for Valencia is 176 deg.

So, could this really be Valencia via an extended tropo duct? It would seem unlikely, but I'd be interested to see what any other members think.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

Hi Nick,

I do not hear Kiss. Moreover, the fading pattern does not fit long distance tropo at all. What I have seen on the propagation maps today is an opening on 2 meters between the UK and the Canary Islands. So your catch may be from there.

It definitely wasn't the 'usual' RNE Radio Nacional, and on uploading it to the Skywaves chat, member 'Mad' had a listen. He suggested an ID of 'Kiss' from the YL presenter 7 seconds in, and it does sound like that to me as well. The only relay of Kiss FM on 96.9 listed on FMLIST is Valencia at 1291 km. At the time, I assumed it was tropo, as I hadn't logged any Es then and looking at the FMLIST logbook nor did anyone else. Pic du Midi was coming in simultaneously on a bearing of 173 deg. The bearing for Valencia is 176 deg.

So, could this really be Valencia via an extended tropo duct? It would seem unlikely, but I'd be interested to see what any other members think.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

That was an Es opening on 2 meters.

Onderwerp: Re: [SkywavesDX] Valencia via tropo?

Hi Nick,

I do not hear Kiss. Moreover, the fading pattern does not fit long distance tropo at all. What I have seen on the propagation maps today is an opening on 2 meters between the UK and the Canary Islands. So your catch may be from there.

I recorded this Spanish signal on 96.9 today during the tropo:

https://app.box.com/s/uravu6p1ss1oojbne197jhkqm2bj4zyz

It definitely wasn't the 'usual' RNE Radio Nacional, and on uploading it to the Skywaves chat, member 'Mad' had a listen. He suggested an ID of 'Kiss' from the YL presenter 7 seconds in, and it does sound like that to me as well. The only relay of Kiss FM on 96.9 listed on FMLIST is Valencia at 1291 km. Hi,

The lady presenter is from SRB, in my opinion. The "song" is Arabic.

Hi Janpeter and Ilkka.

I wasn't aware of 2m activity between the UK and the Canary Islands. Was this opening ongoing at the time of my recording?

Very interesting.

Good DX.

Hi Nick,

One clearly hears from the audio, it definately is Es. 20 years ago,
by the presenter's accent I could have recognized the region she is
coming from. I no more can. My ear only misleads me to northern Spain.

Hi Patrice,

Probably the tx on 91.4 MHz from Gornji Vakuf (BIH) became very strong and your tuner picked it up while on 91.5 MHz.

41149. Band II Sporadic E Loggings for 11 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-11 20:51:51 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41149

Hi All,

After a pause for just one day, the Band II Sporadic E returned today. At full strength. Producing an opening lasting for more than seven hours. This might well turn into a monster season.

Since Libya was in for quite some time I paid special attention to the station on 87.5 MHz. Where I first was sceptical about its reported location, I am now also a believer that this tx is actually located in Benghazi.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Thank you, Janpeter, yes it's a lounge room hi-fi device and it's accustomed to picking RDS signatures 100 khz off the mark.

Good DX for you

41152. Norwegian Locals Es Reception: New RDS Data ..

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-12 09:16:38 UTC
From: John Faulkner
Topic: 41152 Message: 41152

Not too far behind with logs (at the moment!) and I have just caught up with my files from June 8th and a good opening to Scandinavia and Russia which contained some rare low powered DX. Most of the transmitters could not be identified due to multi-tx presence, but I received two local Norwegian stations which may be of interest as the RDS data differs from that in FM List:

104.7 NeaRadio, Røros: https://youtu.be/2UuBzUw7H5M
_F688_ NeaRadio

107.8 Osterdals Radioen, Alvdal: https://youtu.be/mbXTRdLw9qI
_F78D_ _NORD-0ST_ _NORD-OST

_Osterdals Radion's PS alternated quickly from NORD-0ST to NORD-OST (zero to "O") and back again. I don't know if this was deliberate or some quirk of the RDS decoding.

Hopefully of use and full log to follow.

Good DX!

John.

41153. UNIDs from 11.6.17 - double-hop?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-12 19:52:13 UTC
From: nickgilly@...
Topic: 41153 Message: 41153

Hi all.

I wonder if anyone could help with these two clips please? They were recorded yesterday afternoon between 1544 and 1553 UTC. The first one on 87.7 sounds like it might be Arabic. There's a brief burst of Travel Radio from Albania with pop music about a minute in. A PI code of 3064 popped up which suggests Turkey but the language sounds more Arabic to me:

https://app.box.com/s/byarn12is8k1jwifxbcdhq793l5ku4hh
https://app.box.com/s/byarn12is8k1jwifxbcdhq793l5ku4hh - peaked roughly 110 deg

The second clip was received on 90.9. Originally I thought it might be Arabic but I'm not sure now:

https://app.box.com/s/dfgk3f163lwv2sim75srvkh2ahoxv1t9
https://app.box.com/s/dfgk3f163lwv2sim75srvkh2ahoxv1t9 - peaked around 120 deg

Both signals were weak and quite choppy so it may be difficult. Greece and Albania were also in and a Greek DXer was logging Israel and Palestine around the time of my recordings.

If anyone can help with these I'd be very grateful.

Thanks and regards,
Nick

41155. Band II Sporadic E Loggings for 12 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-12 20:51:19 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41155

Hi All,

When I started my listening session today, I found the lower half of Band II completely saturated with Italian Sporadic E DX. Even the strongest local stations were at times swamped by the DX signals. And unlike most of these intense Italian openings, the skip area was very confined. With not too many signals interfering, most stations gave instant RDS ID's.
After about one hour the skip area moved through the Balearic Islands into the Northeast tip of Spain with surrounding areas. What followed was the best Es opening I have ever had into Catalunya. With as a bonus three stations from Andorra. And a lot of low powered Spanish DX at the top of the band.

This all made up for yet another fantastic DX day. With the past two weeks being the most incredible Es spell I have ever seen. Long may it last!

This time I have a few UNIDs in my logbook, indicated in red. Any suggestions appreciated. Also, where FMLIST needs a change this is showing in red.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Hi all,

Hopefully there is someone who can identify the language in this clip.

It sounds arabic but maybe it is not !!

https://app.box.com/s/o19b4xqiogk39lm1ojd1sij5pl5qo8ml

This was recorded on 11.06.2017 at 1742 utc on 88.40 Mhz during a Sporadic E opening

to the Balkans and Greece.

Thanks for listening.

41161. Norwegian Ears Needed

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-13 10:10:04 UTC
From: John Faulkner
Topic: 41161 Message: 41161

Here's a recording a an unidentified station on 104.0, recorded during
the good Scandinavian Es conditions on 8th June.

https://app.box.com/s/il32rz1wzoa0qhsq0lmpykevbemdyb6x

This was at 0941 and was in parallel with 104.7, a frequency where I
identified NeaRadio from Røros at 0938 a few minutes earlier. I cannot
confirm that 104.7 was still NeaRadio at the time of the above
recording, but I suspect it is likely.

Folk music can be heard in this recording, plus a mention of a festival.
It's brief, but maybe there is enough information here to confirm NeaRadio?

There is also a jingle and I have heard this on NeaRadio's web stream
http://nearadio.no/src/include/iframes/modulinnhold.php?type=radio_live&popup=1&AudioStrea
mID=
Or is this a common networked jingle, used in other local radio stations
in Norway?

It would be nice to bag this one if I can as it's a 61 watt transmitter.

Thank you if anybody can help.

John.

No ID on your recording. It is information for Tydalfestivalen 2017. Tydal is situated in Sör Tröndelag, so is Röros so this might be Nea Radio as you suggested.

Hello Christian.

Are you hearing P4 Hele Norge on my recording?

I matched the jingle with NeaRadio's. But as I said, I do not know if this is a commonly used jingle, played on more than one network.

I heard a lot of mentions of the Røros Festival on NeaRadio's web stream. There is a mention of a festival at the end of my recording.

So I am still unsure who I have on 104.0, but it does seem to be NeaRadio. Or maybe I am wrong?

This was NeaRadio on 104.7 from three minutes earlier:
https://youtu.be/2UuBzUw7H5M

Thank you.

John.

Hi,

On the 8th June I heard a Ramadan Station on 87.9 Any one can help identify QTH ?

1. Mention frequency.

https://soundcloud.com/ole-forr/ramadan-879-080617-0959/s-U3TRx

2. Longer clip with a comercial.

https://soundcloud.com/ole-forr/radio-ramadan-879-080617-0948/s-QjAPo

At the same time I heard BBC Radio Sheffield 88.4 and Sheffield Live 93.2

Thank you!

Full ID of Radio Ramadan but no location given. I couldn't find
anything 'local' in the preceding commercial. The mobile phone number is
non-geographic.

Good DX!

John.

Hi Ole

The ID says "You are listening to Newcastle Fast FM on 87.9" which
according to Offcom is from Newcastle Upon Tyne see here
http://static.ofcom.org.uk/static/radiolicensing/html/radio-stations/rsls/current-upcoming
-extended-list.htm

Hope that helps!

Regards,
Chris.

I agree with Gert. Promo for Tydalfestivalen and Tydal is in the
covering area of Nea Radio. Røros! 8th was a great UK day for me with
many nice stations heard.

Thank you very much Ole.

Very pleased with this catch. The 8th was indeed a very good day for Es
to your area. I hope for more of these as Scandinavian openings are
quite rare.

Good DX!

John.

Glad to help! You did well to get this as these Restricted Service License (RSL) stations are usually very low power. Was this via Es or tropo?

This was via Es, I normaly get 1-2 Es to UK eatch season! My QTH is not
good for tropo.

Sorry I missed those links doh! anyway listening to the second link and the song at 0.56 behind the announcement is the same as one of the 87.7 ones I have here and there are three of them on 87.7.
Anyway very good catch as these RSLs are only 25 w.
Andy

Hi Ole. I would agree with the others on the first clip, I heard "Newcastle Fast FM" on the first listen.

Regarding the second clip, if it was definitely 87.9, I would strongly suspect that you had Ramadhan FM in Huddersfield, which is in Yorkshire, as is Sheffield. The presenter was talking about hotels and their facilities.

I Googled the first phone number given, given, 07815904919, and this linked me to a Facebook page, which relates the phone number to matches with Astana Aliya Awaisia Qadria Naushahia, 6 Eldon Place, Bradford, Yorkshire, BD1 3AZ.

07815 904919 and 07896764044 are both phone number for Awaisi Travel Haj Umra & Tours in Bradford.

Huddersfield is about 13 miles from Bradford by road, so quite feasible they would mention Bradford distances which are in easy travelling distances.

However, there is also a Radio Ramadan in Bradford itself on 87.7. Are you certain the recording was from 87.9 and not 87.7? Might be worth checking.

Ian Kelly

** Personal First

My favourite opening of the season so far! Scandinavian Es openings are
less common. Not every season produces much in the way of DX from Norway
and Sweden, so this opening made a very welcome change.

There were many stations which got away as I could not determine the
transmitter sites, but there was plenty of low power DX in this one.

More Scandinavian DX please!

Good DX!

Hi Ian, thank you for your comments. It's definitely 87.9, I took a new listen today :) . (I do have 2 other Ramadan stations on 87.7). I agree with you the station with the Astana Aliya is a diffrent station from Newcastle Fast FM". Here is the clip from 87.7 maybee you can get something out of it ?

Hi Ole at beginning of the file you have Blackburn Ramadan RSL then at 0.29 Bradford Ramadan comes in now the wailing in the background will be Stoke on Trent Ramadan.

Hi Ole. I couldn't really fish out anything of use from the 87.7 recording. There was a phone number in there, but I couldn't catch all of it. Certainly two stations in there. There is a Ramadan FM in Slough on 87.7 which I can here here 20 miles away, but this is a long way south of Yorkshire (about 150-200 miles). Slough is about 20 miles west of central London. I know there are other Ramadan stations on 87.7 too.

41185. Sporadic E Loggings for 14 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-14 20:46:10 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41185

Hi All,

It took a while before the Es clouds drifted enough towards western Europe and intensified. But when it did, things took off big time. Resulting in a completely insane opening, with everything from south-southeast through south to south-southwest coming in simultaneously. Including longer, regular and short skip distances. This made ID-ing a complicated matter. Knowing which tx sites were received was sometimes even harder. Again I wonder how high the MUF has gone during this opening.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Hello,

Does anybody know this station, received yesterday at 1720 UTC on 87.5 MHz.
Could this be Revive FM in Murcia listed in FMList on 97.5 that changed
frequency ?

73,

Guido.

How do you tune? You need to scroll up on that panel on the left if the VFO freq is not showing.

Don't know what you mean, I don't have the freq showing in the main
spectrum / waterfall display just the signal meter as screenshot shows

You said top left. There is no screenshot attached. I don't know what you have done -can you hear any audio? The frequency for "rx1"or "rx2" shoud be at the top left of the spectrum, the one you are listening too.

Peter

** Personal First

Another great opening with shorter skip into south-eastern France. Still
no sign of Riviera Radio on 106.5. It always eludes me!

Good DX!

41197. Sporadic E Loggings for 15 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-16 06:56:26 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41197

Hi All,

We are getting completely spoiled with all of these major Band II Sporadic E days. Yesterday was no exception, with an opening lasting until well after 10pm local. Again with a pretty wild moving skip area, covering a large part of Southeastern Europe.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41201. Armenia 87.5?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-16 13:24:49 UTC
From: John Faulkner
Topic: 41201 Message: 41201

A tip - hearing a woman talking on 87.5 for the last few minutes. I can't be certain but it sounds like the woman currently speaking on Hayastani Azgain Radio 1, Jiliza.

Stream here:http://player.armradio.am/

Maybe somebody else will hear this.

Good DX!

41202. Re: [SkywavesDX] Armenia 87.5?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-16 13:35:09 UTC
From: John Faulkner
Topic: 41201 Message: 41202

Just to clarify now that the reception has gone. I was eager to point this out, should anybody else be receiving it.

I checked all the available Turkish web streams for 87.5 and none them had a woman talking. The woman on Hayastani Azgain Radio 1's web stream sounded IDENTICAL to the one I was hearing on 87.5. The signal was very weak. Were it not for the fact that no RDS or vocal ID was heard, I could be 100% certain and not log as TENTATIVE, but this does appear to have been Hayastani Azgain Radio 1.

Good DX!

John.

From: Tim Anderson
Topic: 41203 Message: 41203

Hi Juergen,

I used to be very interested in TVDX in the 80's and 90's. I still have videos of a lot of unidentified F2 reception from those days. Regularly used to receive Iran and Iraq, (nobody knew there was a TX in Iraq then!) Has the E2 Afghanistan TX been around that long? Any idea what the test cards, IDs or logos for that channel would have been? I know this is a long shot but would be nice to know if I did receive it back then!

Many thanks

Tim

41204. Strange jumping spectrum in ELAD FDM SW-2

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-16 22:24:38 UTC
From: Guido Schotmans
Topic: 41204 Message: 41204

Hello,

Since some time I have a strange issue with my ELAD FDM S2. Now and then the spectrum starts to jump up and down for a some minutes but recently it is happening much more often and for a longer time. It is only happening in the regular broadcast FM band. Not in the OIRT band. After some time it goes away automatically. I don't see the jumps in SDR-radio V3 in combination with the Elad but I think that software is just smoothing the jumps away.

You can see in in this short video:

https://youtu.be/zRvXUA1p6Vw

Note that the amplitudes and noise floor are both jumping.

Here two pictures from the beginning and the end of the band.
https://app.box.com/s/yb2n5610s91elxm9iw3yr98uhmfvpy4u
and
https://app.box.com/s/m7sr87rqc9okzygf4jg2v0usbf1koazc

So you'll see that the dancing noise floor is not occurring further away from the FM broadcast band.

I am wondering what can be the cause of this. I have checked the connections and they seem to be OK. As said it only happens in the FM-band. Can this be caused by some kind of external interference or is the chance that it has to do with a hardware failure more likely ?

I hope somebody can help me.

73,

Guido.

41210. Re: Sporadic E Loggings for 15 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-17 07:40:38 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41210

Hi All,

Yesterday was probably the best Band II Es day so far this season. For me it was for sure, I have never seen anything like it in 44 years of DX-ing. Most impressive was the length and the
intensity of the opening towards Slovakia, Moldova, Roumania and Ukraine. Also the Skandinavian evening opening was huge.
A total of 19 different countries were received: ALB, BIH, BLR, BUL, FIN, GRC, HNG, HRV, I, LTU, MDA, POL, ROU, RUS, S, SRB, SVK, TUR and UKR.

The number of loggings is probably record breaking high. Therefore I will be sending them in three separate e-mails.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41221. Sporadic E Loggings for 17 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-17 20:50:34 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41221

Hi All,

It seemed to become a quiet DX day today. Until Band II exploded at around 6pm local time.
In no time the band was saturated with Es DX, from bottom to top.
The highlight for today was undoubtedly a very strong top of the band opening to Iceland and the Faroe Islands. The latter is only the second time ever, so very rare.
Oh what a season!!

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Hello everybody,

here's a short recording caught during today's opening with my poor equipment....

Which is the language of the broadcast received on (about) 70.8 Mhz (well, you know that ATS 909 has a 0.05 Mhz resolution and, more, I had to avoid the powerful "image" of my local Radio Deejay station on 70.6 (92.0, minus 2x10.7 Mhz)?

Thank you,

Franco

Hello,

our fellow of fmdxItaly Cristian Puddu from Sardinia sent me a recording of a broadcast in a nordic language he received last Sunday 11th of June on 96.1 during a powerful opning into Sweden, Denmark and germany.
He received also picode pE5BA but it might be corrupted.

It seems that there is a clear Id at 0:08 but I haven't be able to understand it.
Is there somebody who can help him?

41225. Re: [SkywavesDX] Nordic ears needed (SWE? DNK?)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-17 22:20:40 UTC
From: Christian S
Topic: 41223 Message: 41225

Hello!

This is danish and I think it’s The Voice.

QTH is probably Nærum, a suburb to Copenhagen.

Hello,

our fellow of fmdxItaly Cristian Puddu from Sardinia sent me a recording of a broadcast in a nordic language he received last Sunday 11th of June on 96.1 during a powerful opning into Sweden, Denmark and germany.

He received also picode pE5BA but it might be corrupted.

It seems that there is a clear Id at 0:08 but I haven't be able to understand it.

Is there somebody who can help him?

From: Janpeter van Dijk
Topic: 41226 Message: 41226

Indeed Franco, this was a WOW moment. Which started a bit strange, as I was listening to the last remains of the massive opening towards mainly Italy and Greece. With the antenna pointed southeast. I had almost decided to switch everything off, when a Nordic sounding language started to be audible on 87.7 MHz. Turning the antenna northeast made the signal weaker, so I turned back to southeast. I was then franticly thinking what language I was hearing, since it was none of the Skandinavian languages. When 'bang', I realized that this had to be Iceland. So the antenna was pointed properly northeast and then I discovered a big opening, also to FRO. Especially the FRO signals were very strong, despite of generally weak transmitters. If you look at the logging of Kringvarp Føroya on 88.5 MHz, the strongest transmitter on that QRG has only 2 Watts!

It was only the second time in 44 years of DX-ing that I have received this country. Iceland is coming in once in every 4 years approximately.

This is a truly increadible season. As I write this, there is a new 2 meter Es opening in progress.

41236. Indian Station 103.8 via Es

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-18 18:50:11 UTC
From: John Faulkner
Topic: 41236 Message: 41236

For the record, just after I received Dnipro, Ukraine, (17:45) this evening, I had an Indian music station coming in via Es on 103.8. It was very brief and didn't produce RDS.

So, just for the record in case anybody else heard this or knows who it is.

Good DX!

John.

41240. Sporadic E Loggings for 18 June 2017 (part 1)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-18 21:17:28 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41240

Hi All,

So what is wrong with nature?? It gets kind of scary when thinking of having these humongously large Band II Es openings every single day until late in August.

Today was similar to yesterday. In the sense that not much was happening until 6pm, when again the band exploded. This time with the skip area concentrating on Belarus. Which led to the best ever opening towards that country. Forgive me for using the word ‘best’ over and over again. It is just the way it is these days.

Unbelievable all of this. Any scientists out there having an explanation?

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41242. Help with ID

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-18 21:42:24 UTC
From: Christian S
Topic: 41242 Message: 41242

Hi!

It was a totally crazy evening. I’d some problems with my computers but I manage to fix line-in at last in Windows 7.

I recorded a lot of french and italian stations to night. But I need identification help, please.

Sorry for the terrible compression. It’s a complete new program for me running in Windows 7 instead of OS X. My new MacBook Pro sadly misses line-in.

Time in CET

20.35 87,8 radio mortina (maria?)

20.54 91,0 radio somasio (italian) + unid german (21.00)

21.04 french 91.3

21.15 93,9 french

21.18 94,5 french

21.23 88.1 french + italian

21.27 88,3 classical music + france

21.36 87.6 ”radiostar" musik

21.38 87,9 french

21.44 88,5 NRJ FM

22.07 88,6 arabic + 88,5 romainia

22.20 88,4 french

22.49 87,6 balkan

41243. Muzyczne Radio?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-18 21:56:05 UTC
From: liammahe@...
Topic: 41243 Message: 41243

Hi to all
last few days here have been extraordinary and I'm enjoying plenty of dx in band II
For a few days I am hearing a polish station on 87.7 It is very strong and can last for hours before it goes out.
I have not been lucky enough for it to ID with any RDS on my car radio; which is usually where I do all by spotting in driving to and from work etc.

I listened to the presenter and as I don't speak any Polish it is very hard for me to identify it but phonetically it sounds like (and I wrote this down); "Movitsnah Raadio"

Tonight I looked up an fm list from Poland but I can only find what might be close to the proper identification in Muzyczne Radio?? But this does not appear anywhere on 87.7 MHz

Any Polish people on here that can help with my dreadful pronunciation?

Liam
Tipperary
Car stereo

41245. Re:: Muzyczne Radio?

From: jjcahill2002@...
Topic: 41243 Message: 41245

Hi Liam

I have been hearing a Polish station on 87.7 MHz around Clonmel Co. Tipperary for a few months. It is very strong from the lay-by at Barravekeen overlooking Clonmel golf course. I suspect that someone is rebroadcasting a satellite radio station. I can't decipher the name of the station it sounds like "music radio" or during news broadcasts it sounds like "MC radio".

Hi John,

It think It was BBC 3CR on 103.8. The show with Yasmeen Khan, between 18-20 BST, contain lots of indian music. I heard them as well. It's my local station.

http://www.bbc.co.uk/programmes/p054l7vg http://www.bbc.co.uk/programmes/p054l7vg

Happy DX!

Topic: 41236 Message: 41257

Hello.

Thanks for your reply. The Indian station was definitely received via Es during an opening which brought in Ukraine, Belarus and Poland. I can receive BBC 3CR here under flat conditions, but it is very weak and would not have been possible with the antenna in this direction.

The general Es signals faded down a little at the time of the Indian music reception. The mystery station was brief and did not RDS, though probably wasn't quite strong enough for this. I was not thinking that this station was actually coming from India, It just seemed unusual to receive such distinctive Indian music via Es on this almost easterly bearing (approx 100 degrees).

A few minutes later, the Balkans were well received. This coincided with Arabic stations were heard right across the band, none with RDS. I failed to identify any of them, but they were all strong enough for RDS. I suspected Algeria or Tunisia to begin with, but there were many interesting stations heard around this time, so suspect one or two exotics.

It was another stunning opening with many countries heard.

I am a long way behind with files now, but that's not surprising after all these amazing openings.

Good DX!

John.

In southern Sweden, yesterday I got Bulgaria, Roumania, Serbia, Hungary, Albania and Turkey.
For a moment it almost felt like living in Istanbul...

Also a lot from Turkey the day before yesterday, see further below. Who runs PI:347C?

From: ilkka suni
Topic: 41263 Message: 41263

Hi folks,

92.3 MHz. Which one do you think, this would be,
LBN Iza'at al-Nour [Aabey -tx], or
SYR Sham FM
https://app.box.com/s/gqcmz1v35ibhx25rftcrhh0lxzkh5cuv

Those two stations are within the range and azimuth [i.e. within 1
deg.] possible, others from Lebanon, Syria or elsewhere not,

I personally vote for the lebanese. The HAAT diagram also suits
better, for my location.

Thanks for the help and your time.

This was received during last night's Es to Scandinavia and the Baltic states. I presume it is from Sweden as it peaked beaming NE. The PTY code was Oldies Music. It is not on FMLIST.

Is this a new Swedish station on test?

Thanks and good DX.

Hello,

These 2 clips were recorded on 16.06.2017 at 1052 utc.

In the first one there is an ID as Radio Sputnik Abkhazia, is
this from Russia or Georgia.
As I only can find Sputnik Abkhazia in GEO

Freq. 106.50 Mhz

https://app.box.com/s/vv99s3v5u4abb9vbzhlo07gyp4tegzdj

Second one is with a unid ID as Shiek FM ?
Anyone who knows the correct spelling and
is it from RUS/UKR ?

Freq. 106.60 Mhz

https://app.box.com/s/wwgap0x871rrm6u0q6toixztzyapqxnc

Thanks for the help.

Hi folks,

Looking for help to identify the station that I received on 16th June, on 91.8 MHz. It's definitely not local. I recorded a few clips, but the signal was weak and I selected only 30 sec for the identification (listenable reception). Received on ☐16 ☐June ☐2017, ☐☐09:36 UTC. I can't identify the language, but sounds to me like Turkish? Sadly, no PI code for this one. I have other recordings of this talk available if required.

** Personal First

A difficult opening. Several parts of southern Italy were received simultaneiously, making transmitter site identification difficult. The last few files had to be trashed because of this.

Good DX!

Topic: 41281 Message: 41281

Hello folks,

Last night I had so many stations but majority of them without RDS or PI and I end up with many UNIDS. Here is first part:

88.3 UNID - French talk https://drive.google.com/open?id=0BzU0xgKCbHfVQ05scThJRDIzNWM
https://drive.google.com/open?id=0BzU0xgKCbHfVQ05scThJRDIzNWM
87.6 UNID - Sweden? Hungary? https://drive.google.com/open?id=0BzU0xgKCbHfVcjg4b29VSnRoMXc
https://drive.google.com/open?id=0BzU0xgKCbHfVcjg4b29VSnRoMXc
87.6 UNID - possibly SR P1, Sweden???
https://drive.google.com/open?id=0BzU0xgKCbHfVLWYyUVh0MVJRTkk
https://drive.google.com/open?id=0BzU0xgKCbHfVLWYyUVh0MVJRTkk
87.9 UNID - French talk https://drive.google.com/open?id=0BzU0xgKCbHfVRUUzaDlhMmJYN3M
https://drive.google.com/open?id=0BzU0xgKCbHfVRUUzaDlhMmJYN3M

Thanks in advance. Happy DX!

Hi!

Not Sweden.

No station with that PTY Code.

/Chris

19 juni 2017 kl. 18:32 skrev nickgilly@yahoo.co.uk<mailto:nickgilly@yahoo.co.uk> [SkywavesDX] <SkywavesDX@yahoogroups.co.uk<mailto:SkywavesDX@yahoogroups.co.uk>>:

This was received during last night's Es to Scandinavia and the Baltic states. I presume it is from Sweden as it peaked beaming NE. The PTY code was Oldies Music. It is not on FMLIST.

Is this a new Swedish station on test?

Thanks and good DX.

Hi All,

I did not have a lot of time to listen today, yet managed to catch a part of the evening opening. Things were not as intense as the last days, but still a good DX session.
Band II below 100 MHz in Russia is still not densily populated with radio transmitters.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

From: Hannu Piirainen
Topic: 41264 Message: 41287

Cheers Nick, Sweden, no doubt. I have the history what's been heard in Finland, but not with this exact PI code, as the last letter does not match but three first points to S local radios. ROU and E also uses these codes..but that's another story.
Hannu

Hi Zach

Thank you for that. I'll record a piece soon and post it up. It's still coming in pretty well so pretty sure it is not dx, but as JJ suggested; probably someone re-broadcasting a satellite feed.

Good dx

This indeed is interesting briefing, double hops always are. And such a nice way to present, some relevant catches presented in a clear, visual way.

Congratulations on the nice catches, keep up the good work!

41295. UNID classical via tropo on 95.9 - Germany?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-20 08:38:12 UTC
From: nickgilly@...
Topic: 41295 Message: 41295

I am receiving an unidentified classical station here this morning on 95.9 via tropo. It sounds like it might be German judging from the modulation, and the fact that it peaks at about 110 deg. Strasbourg is also in via tropo, so maybe somewhere in southern Germany.

However, there is nothing obvious listed from Germany (or France) listed. I have tried BR Klassik and SWR 2 and 4 and none of them match. I think I hear a German YL as I type this but it's losing the battle to adjacent channel splatter now.

Is anyone getting this? Who could it be?

Good DX.

Nick, Whitchurch, Hampshire.

RBRX Encore, Kenwood L-1000T, Yamaha T-2, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

41296. Re:: UNID classical via tropo on 95.9 - Germany?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-20 09:04:04 UTC
From: nickgilly@...
Topic: 41295 Message: 41296

D'oh! Brain fart. It is, of course, WDR 3 from Aachen-Stolberg. For some reason when I saw WDR 3 listed earlier I was thinking it was a pop network, confusing it with SWR 3. This is undoubtably because I had SW Germany in my mind as the are of propagation.

I need a good strong coffee!

Good DX.

Nick, Whitchurch, Hampshire.

41297. Temporary licenses in Finland

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-20 13:25:10 UTC
From: ilkka suni
Topic: 41297 Message: 41297

As always, there are plenty of temporary broadcasters in Finland, in the summertime.

This is where you find these temporary licenses listed.
https://www.mediamonitori.fi/index.php/tietosivut/lyhytaikaiset
Unfortunately, the page only is in Finnish, but I'm sure you figure out the basic aspects. In most cases, the name of the broadcaster is linked to their website, and to their webstream, too, is there such:

The most active and most widely based operator propably is this one:
http://rauhanyhdistys.fi/fi/seurat/kesaseuraradio/

Happy hunting!

41298. Help appreciated: Slovenia 92.3 MHz

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-20 14:32:01 UTC
From: ilkka suni
Topic: 41298 Message: 41298

Hi again folks,

Is there anyone from Slovenia around?

I am trying to solve the identity of a slovenian station on 92.3 Mhz,
I received yesterday Monday 19th at 17:45 UTC,
whether the station would be Radio Koper or Radio 1, Ptuj.

Gather I right by the background noise, there was a break during
possibly a sports event, and the presenter promoted local
enterprises. There was the
"Pizzeria Nizza" promoted, located at Koca & Mastica, tel. 223867.

I tried to google for the pizzeria mentioned, no results, but I
wonder if someone around the Balkans area would be able to help me.

Thank you.

From: ilkka suni
Topic: 41298 Message: 41307

Hi,

Thank you so much!

Now, do I feel humble and stupid. My google
search yesterday brought up the very webpage, yet
I did not visit the page as there was Pizzeria
Nice versus Pizzeria Nizza. I was hesitative and
stupid enough. I also googled up the telephone
number, with no hit. Yes, I've been to Nice,
Nizza a few times. In 1984 I was proud of my VW
Passat 1.5 dieseI, how she coped with the local
Renault GT5 Turbos etc, when racing the coastal curves.

Now I am facing the dilemma, these 2-3 stations
from possibly BIH, yesterday at around 1740 to
1755 UTC, came in from roughly 10 degrees too
daringly east. Tough ones to receive in Finland,
also from surprisingly east, considering the current conditions.

Wishing you all the Best,

73, ilkka.

Hi folks,

Was it last summer, or two to three years ago, I presented a similar question, concerning an Arabic language audio clip. No result.

It possibly appears, folks in the Skywaves group are, at least, almost equally unskilled I am, when it comes to the Arabic language. It just might be, I need to search for a native contact, somewhere. I believe, there are some native Arabic speakers in my region, possibly willing to help.

41309. Band II Sporadic E Loggings for 20 June 2017 (part 2)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-20 20:04:27 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41309

Hi All,

Again a giantly huge Band II Es day today, of which I had to miss the morning / early afternoon part. The evening opening brought again big time Greece, the fourth time with such an opening this still early season. The last part of the session was towards the southwest, with lesser intensity.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Yes it's a clear ID (Denmarks Hit station on FM, DAB and radioplay.dk - The Voice) - 96.1 MHz has just moved to the Site in Gladsaxe (Same antenna's used by Pop FM 100.0 MHz and Radio 24/7 102.3 MHz and DR use the Site too on different Antenna's)

Best 73's

From: nah@...
Topic: 41311 Message: 41311

This is Kanon FM from Kalmar, it has pty Oldies and PI E0A8, perhaps an
mistake between 8 and B.

Same Station is logged in Saltdean, UK at 19.29 UTC same day.

Another part of unidentified stations. Any help much appreciated!

87.7 Spanish talk? no clue! https://drive.google.com/open?id=0BzU0xgKCbHfVbEtCaGN4UUNJS28
https://drive.google.com/open?id=0BzU0xgKCbHfVbEtCaGN4UUNJS28
88.0 Spanish talk? sounds like Maria???
https://drive.google.com/open?id=0BzU0xgKCbHfVbXpHRUJLTklISHM
https://drive.google.com/open?id=0BzU0xgKCbHfVbXpHRUJLTklISHM
88.1 very weak signal, sounds like Nordic or Latvian?
https://drive.google.com/open?id=0BzU0xgKCbHfVbVRJcS1MSUZwVk0
https://drive.google.com/open?id=0BzU0xgKCbHfVbVRJcS1MSUZwVk0
88.2 played song, no clue about launguage!
https://drive.google.com/open?id=0BzU0xgKCbHfVYTBpRlFDZTllTkE
https://drive.google.com/open?id=0BzU0xgKCbHfVYTBpRlFDZTllTkE
88.4 Arabic song, not Chaine 3 as I check their webstream and did not matched
https://drive.google.com/open?id=0BzU0xgKCbHfVVzFreUN0dVBUaVE
https://drive.google.com/open?id=0BzU0xgKCbHfVVzFreUN0dVBUaVE
88.5 Nordic??? https://drive.google.com/open?id=0BzU0xgKCbHfVTjZNZ1ZrOWFfSXc
https://drive.google.com/open?id=0BzU0xgKCbHfVTjZNZ1ZrOWFfSXc
89.4 Nordic, Finland?? https://drive.google.com/open?id=0BzU0xgKCbHfVNEtqcUtfOXh3eHc
https://drive.google.com/open?id=0BzU0xgKCbHfVNEtqcUtfOXh3eHc
89.6 possible ID at 00:26 but I don't understand!
https://drive.google.com/open?id=0BzU0xgKCbHfVdF9YeS1BWTJEWDg
https://drive.google.com/open?id=0BzU0xgKCbHfVdF9YeS1BWTJEWDg
93.1 Latvian?? https://drive.google.com/open?id=0BzU0xgKCbHfVaUo1R01fZGEtX2s
https://drive.google.com/open?id=0BzU0xgKCbHfVaUo1R01fZGEtX2s
93.9 Nordic??? https://drive.google.com/open?id=0BzU0xgKCbHfVYTFfX1lhT2VEd3M
https://drive.google.com/open?id=0BzU0xgKCbHfVYTFfX1lhT2VEd3M
106.4 Russian??? https://drive.google.com/open?id=0BzU0xgKCbHfVYTFfX1lhT2VEd3M
https://drive.google.com/open?id=0BzU0xgKCbHfVYTFfX1lhT2VEd3M
103.7 Classical music only! https://drive.google.com/open?id=0BzU0xgKCbHfVU0ZNYVhfYzZnWlE
https://drive.google.com/open?id=0BzU0xgKCbHfVU0ZNYVhfYzZnWlE

I think 103.7 could be LR3 Klasika from Riga, Latvia. I can't find any other station with classical repertoire. Correct me if I am wrong.

While in Ukraine the analog TV has not been swich off there are a lot
of big DX-windows.

> Can you add the day of reception to YT, so we can compare it to logs
> of others?
In each video at the bottom you can see the date and time in UTC.

For comfort:
ALG - 2017-06-02
BHR - 2017-05-26
E - 2017-06-11 (Sevilla and Zaragoza)
E - 2017-06-14 (Madrid)

Hi Nick
Thanks for info
I first heard the station on the date of the recording, from a layby at Barravakeen 52.325320, -7.638417 overlooking Clonmel and south Tipperary. Although in town of Clonmel the signal is very weak. Liam has head it Cashel which is about 28km from site of the recording. I have also heard it from the Vee road in the Knockmealdown Mountains at 52.250452, -7.955094. These coordinates will work in google earth.

JJ

41321. Re:: Muzyczne Radio?

Hi Liam,

Many thanks for recording. I've listened to the recording and I can confirm, It's Polish 'Muzyczne Radio'. A clear station ID at 01:24. That is interesting, because it's a small comunity radio stations for Lower Silesia only. As Nick already pointed out, someone is relaying the station

Muzyczne Radio has a very low powered TX's:

90.9 Jelenia Góra (1kW)
105.8 Jelenia Góra (10kW)
106.7 Bogaynia (160 W)
106.7 Swieradów-Zdrój (5kW)

Are you still able to receive it?

Regards, Zach

Hi All,

When I started tuning Band II this morning I found some nice tropospheric enhancement towards the UK and Germany. Halfway through this was rudely interrupted by Spanish talks off the back of the antenna. Upon turning the beam 180 ° I could start enjoying yet another big Sporadic E opening. This is a totally insane DX season.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41323. Re:: Muzyczne Radio?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-21 23:00:06 UTC
From: Liam Maher
Topic: 41243 Message: 41323

Thanks Zach

I also listened tonight to JJ's recording and it is indeed the station I heard. I drove out to Kilfeakle which is a good spot and it is still on 87.7 but carrier only interspersed intermittently by a burst of signature tune, then back to carrier only again. I wonder who or where it is being relayed from? I would be interested if anyone else is receiving it elsewhere. There is presently a tropo lift. All the Beebs from North Hessary are present. Thus my loggings from this location tonight:

All times are in UTC

22:15
87.7 Muzyczne Radio (broadcasting carrier and intermittent burst of music [sounds like Arabic music])
88.1 BBC R2
92.0 BBCR3
92.5 BBC R4
94.2 BBC Cymru

At the very beginning of the 91.00 MHz clip, up until 01:03, there is this speech programme, and the male intonation from 00:48 on is rather interesting. By the intonation, I'm not sure if this section 00:48 to 01:03 is in Italian even, for instance the way he pronounces the word "Italia" hints the speaker is not a native italian [possibly of american origin]. The station itself could be pretty much anyone, yet my nominees are Rai GR Parlamento and Radio Radicale, even though I do not know if Rai GR Parlamento was airing on the very night.

41332. Groove FM 94.9

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-23 09:09:57 UTC
From: Paul Logan
Topic: 41332 Message: 41332

Hi all,
does anyone know of a "Groove FM" on 94.9 in central Europe.
Heard here on the 16th but I can't pin it down.
Any help would be great. Paul Logan, Lisnaskea, N. Ireland

41333. Re: [SkywavesDX] Groove FM 94.9

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-23 10:43:54 UTC
From: ilkka suni
Topic: 41332 Message: 41333

Hi,

Was it vocal or PS you got? If vocal, could you provide us with an audio clip?`

In Finland, there used to be a network, titled Groove FM. Was it in
2013, Groove FM was replaced by the network Loop.

If it was vocal you received, one of the finnish radio stations on
94.9 may have been chatting retrospectively, referring to the late Groove FM.

Hi Janpeter. Clermont-Ferrand is also coming in here as I type this on 90.4. Pic du Midi has also been logged on 87.9 and 95.7 so worth keeping a look out for that as well.

41343. Re: [SkywavesDX] Re:: slr Radio 97.7

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-24 06:09:20 UTC
From: Ian Kelly
Topic: 41334 Message: 41343

This is all very confusing! There is LSR (London Soul Radio) on 97.1 - http://www.londonsoulradio.com/, but also SLR on 97.7 - http://slrradio.co.uk/. Not sure there's a SRL!

Also, I said the Transmission One London pirate listing is kept up to date, but having a quick look, I don't think it's been updated in a while. I know that UK Raw are no longer on 87.5 and moved further up the band (wish I could remember where now).

41345. Re: [SkywavesDX] Re:: Band II DX Loggings for 23 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-24 07:01:02 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41345

Hi Nick,

I did that for a while, but nothing. Quite strange this tropo, as it is Clermont only. Nothing else is even slightly enhanced. Also there are some very strong winds with drizzle.

Let's hope the Es will pick-up again today. The Band I map looks promising.

73

Janpeter

Hi Janpeter. Clermont-Ferrand is also coming in here as I type this on 90.4. Pic du Midi has also been logged on 87.9 and 95.7 so worth keeping a look out for that as well.

Interesting. Afterwards I logged Niort, Besançon, Lyon and Gex. All pretty weak though. Es has taken off the the Balkans already this morning. Good DX.

Nick, Whitchurch, Hampshire.

RBRX Encore, Kenwood L-1000T, Yamaha T-2, Denon TU-800L, Kenwood KT-1100SD (modified), Yamaha T-85, Sony XDR-F1HD tuners, horizontal Körner 9.2 beam (Antennenland version), Yaesu G-450C rotator

Hi Roberto,

Many thanks for your reply. I think you minght be right! On the smae day I received 88.1 Radio Radicale from Monte Argentario and 87.6 RAI Radio1 Lazio from Rocca di Papa. Radio Virgin is releated to Rock music, which will fit Dire Straits song. How about R.Freccia https://maps.fmdx.pl/#station=R.Freccia&itu=I from Rocca di Papa? Do you see any relation to it? I am about to contact both stations soon.

Regards,
Zach

41350. Re:: 88.3 Italian? UNID

Hi Zach,

it's Radio Freccia for sure; the "music under" the voice of announcer (who stops ay 0:23) is definitely the one used by them.

Franco

From: franco289@...
Topic: 41338 Message: 41351

Hi Zach,

I saw that you were asking Roberto about Radio Freccia's format.

Well: both Virgin Radio and Radio Freccia broadcast rock music (where "rock" is to be used in a wide sense), and more or less the same rock music (90% British or American, 10% Italian), but there are some differencies into their format.

Because Virgin Radio is a commercial rock radio, with less talk and more music and a lot of adv.
Radio Freccia, instead, for formal reasons needs to introduce herself as a "cultural community radio", and so they have to present every track with a long speech before and they also are trying to promote some new bands.

I hope that my explaination will help you in the next Es loggings,

Franco

41352. Re:: 88.3 Italian? UNID

From: srdzk@...
Topic: 41338 Message: 41352

Hi Franco,

I also had a feeling that this could be Radio Freccia from Rocca Di Pappa. It's bassically on the same path as RAI Radio1 Lazio that I received earlier. Email has been sent to both stations. Will see if they replay. If not, I will mark 88.3 as Radio Freccia (tentative). I'll be having some more Italian stations to identification... In the mean time, thank you very much for reply. I really appreciate it.

Regards,

Zach

Hi,

No ID. There's many stations on the frequency, any of which this could be. Capital, Deejay, RTL 102.5, Virgin...

I suggest, you skip this one and forget about it.

... to all those, having provided and kept up them live stream and
webplayer links.

As I am listening, using a non-RDS old-skool tuner, for instance this
might not have been possible unless there were up-to-date live stream
links available:
http://www.fmlist.org/fm_logmap.php?datum=2017-06-19&omid=3071

Lately, I have encountered incidents, while trying to help out folks
with their unidentified audio clips. In 1990, I got quite unsettled
when I witnessed some listeners publicly making fun of handicapped
people. Did I like that kind of humour, not a bit, thus I reacted
back then. The consequences, I have had to live with, them past 27 years.

Correction.

Cerebral palsy, CP disabled people was those, these listener publicly made fun of.
"It would be difficult for CP handicapped, to use buttons for frequency feed on a receiver, as their hands keep trembling around".
And a big ha-ha, publicly.

And I just got furious, I stood up to this listener. Them words still are on my microcassette, I am a past journalist, I always carried the recorder along.

Hi All,

The Band II Es did make a comeback yesterday, resulting in an intense top of the band opening into Spain and Portugal.
Unfortunately I had to miss the evening Skandinavian opening.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41360. Band II DX Loggings for 25 June 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-25 20:19:56 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41360

Hi All,

A bit of an unusual Band II Sporadic E opening this afternoon. Which started at a time when normally the afternoon Es break starts. The propagation was odd in the sense that the MUF was to the top of the band, while the signals were weak or even very weak for a good part of the opening. Only a handful of stations made it to RDS level. Nevertheless, with 10 countries being received this was a decent DX session.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41364. riddle with RDS

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-06-26 16:13:52 UTC
From: Fast Logger
Topic: 41364 Message: 41364

hi

My lounge hi-fi parked on 94.7 (give or take 0.1 mhz) registered a double RDS:
 CASTELLO and ROCK M_ while I was away..

Any idea?
It was today lunch hour.

Thanks.

Pat

Hi Pat,

if you make a query in Fmlist, you can find the PS CUARENTA CASTELLO for Los 40 broadcasting on 94.8 from Desierto (Val) in Spain. This could be a clue.

(obviously it's CASTELLO not _CASTELLO_ who has 10 digits)

Franco

Moi,
894 "Nordic" / Finland..no no. Its HNG
The previous 885 "Nordic"..no no..sounded like ROU "hippop"
896 R.Centras, LTU
936 "Nordic" also HNG. If you are in Africa, so then they can be considered as "Nordic"..
939 "Nordic", also HNG, sounded like Petofi Radio with its slogan..

Hannu

Topic: 41276 Message: 41368

Very strange, I had PI C201 while receiving Divu Krastu Radio which was listed in FM-List at about the same time. It seems to have disappeared. Do they use two PI-codes perhaps ? I also had PI 7252 but on another time. The 7252 does look more like a Russian PI to me.

73, Marc

Hi all. Trying to work out the language on the brief speech station on this recording from the big Baltic opening on June 18th:

https://app.box.com/s/qf9cumcmla0yqmpmsnux3in084uiq0fq
https://app.box.com/s/qf9cumcmla0yqmpmsnux3in084uiq0fq

Is it Danish? It gets taken out by EHR Super Hits from Latvia fairly quickly.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

From: TPCtvdx@...
Topic: 41380 Message: 41380

A hour ago I received pictures in S.E. Essex, UK, from what I believe might have been the Ukrainian M1 music channel (http://www.m1.tv/) with a stylised 'M1' logo showing top right. Can anyone confirm whether or not they broadcast on channel R4?

Thanks
Tom Crane

Hi Tom,

I received what looked like "M1" on channel R2. I thought this may be Hungary, but it couldn't have been, as Hungary no longer TX in analogue on Band 1. I didn't know there was a Ukraine M1 channel.

Sorry, I have no idea if they also TX on channel R4.

Chris. Lincoln, UK.

Hi Chris,
I did receive M1 Moldova a couple of weeks ago on Chs.R2 & R3 but its logo (http://www.ukdx.org.uk/tv/tvlogos/moldova2011.gif) was not like the one I saw today. I'm sure it was Ukrainian because it briefly showed the 1+1 logo mid-screen -- probably an ad for upcoming programs on a siser channel...

Tom.

Hi Jurgen,
I'm afraid I can't say what the offset was, not even at the <n>m and <n>p level as I'm working with an HS D100 only ATM. I'm convinced it was Ukrainian, firstly because it briefly showed the 1+1 logo mid-screen probably as part of an ad for upcoming programs on a sister channel. Secondly UT1 was in at the time on Ch.R2 with a strong clear signal. The 'M1' logo if that is what it was, did not look anything like MDA's one.

Tom.

> have been the Ukrainian M1 music channel (http://www.m1.tv/) with a stylised
> 'M1' logo showing
> top right.? Can anyone confirm whether or not they broadcast on channel R4?

I've never seen that channel on any frequency.
Tom, what was the offset?

MDA M1 of today on R2 running a DW program (the only reason to take a screenshot), but never seen it on R4 either

Hi all.

This was received on 100.5 on June 26th during a very good opening to the Balearics/eastern Spain, particularly Mallorca:

https://app.box.com/s/beem6cs7pvz972yzg0g21l4gbvmx62zz
https://app.box.com/s/beem6cs7pvz972yzg0g21l4gbvmx62zz

Palma de Mallorca is mentioned at the beginning of the clip, and the station appeared to be in mono. There's nothing listed in FMLIST that I can see that would match it. Could any of our Spanish-speaking members help here please?

Thanks and good DX.

Nick, Whitchurch, Hampshire.

Hi Jurgen
thanks for the info on that, yes maybe the height of the new tower may make a difference, just for your information I am on the north kent coast and Steinklimmen is about 560 kls from here. always use to get it 1 to 2 bars on my sony s3. but now its 1 bar max.

Hi Jurgen
yes maybe your write about the dipoles on the mast I guess its possible that they are tilted, had the radio on a few hours ago and it seemed a little stronger but still going into deep fading thought which I never done before, I don't know how far inland Steinkimmen gets by scatter I guess just DXers on the east coast would only receive it. thanks again for your info on it.

I heard Steinkimmen here this morning on 91.1 and 105.7. I didn't check the other frequencies, but the signals were considerably down in strength here too. 105.7 was noisy in mono on peak, which it never used to be.

Hi All,

Some Band II tropo and Es today. The Sporadic E opening was unusual in the sense that it lasted for one hour, yet only three station made it to my receiver. Two of which were first time catches. The skip area for me clearly landed in the Mediterranian Sea.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

hi john
yes its been like it for the last month or so, mind you this evening I have had some weak tropo from the NE and NDR 2 did rds on a peak, so maybe the directional power to the SW is a bit lower then its was or something.

41406. UNID Germany 98.4 in a trio of stations 18.6.17

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-02 18:40:53 UTC
From: nickgilly@...
Topic: 41406 Message: 41406

Hi all. There's an UNID German station in this clip that appears about 3 minutes in:

https://app.box.com/s/g8vrzrisr35i3098lnd2uizrvyr2kiog
https://app.box.com/s/g8vrzrisr35i3098lnd2uizrvyr2kiog

It's fighting with Poland and Russia, and the two most likely candidates would be NDR Info or DLF, as it sounds like news/current affairs.

Any help with the ID of the German station would be very much appreciated.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

Yes Janpeter, you are quite right, it is Bornholms Kristne Radio and in the little danish speak in the beginning of the Clip the Town: Hammer and Bøls is mentioned, both Cities is on Bornholm.

But actually Norea Radio on 98.6 MHz from Haderslev is also an Religious Station, with Talk. But they would not mention these 2 Cities Hammer and Bøls.

Congratulations Nick, a great catch. Personally I see stations from relatively small islands as a bonus. Which makes this year already a good year for me with Kos (GRC) for the first time, Pantelleria, Malta and a great opening to the Faroe Islands.

Also congratulations for all of the double hop catches. An unprecedented three weeks we have had in June. Which brings me to the question: where has all that Es gone?

unfiltered IF out from tuner to SDR

Tapping the IF before the first ceramic filter results in a wide bandwidth (circa 2 MHz) but at the

expense of low gain. The SDR/DSP can provide the gain but at the cosst of potential overload.

41425. Band II Tropospheric Loggings for 9 July 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-09 20:42:44 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41425

Hi All,

Nice tropospheric Band II enhancement this morning, providing at least some DX fun. Which brings me to the question what on earth is going on with the ionosphere? May was record breaking poor for Es DX, June was record breaking good and now July is back again at record breaking poor levels. I have never seen anything like this before. Will we be seeing a return of Band II Es or is the season over?

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41426. re: [SkywavesDX] Band II Tropospheric Loggings for 9 July 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-09 22:17:51 UTC
From: Fast Logger
Topic: 38927 Message: 41426

Hi

August will be smashing !
Just wait.
We should not despair of the E Gods, how many times have they baffled us when we least expected it ?
Who knows if September will not be a record high. Unpredictability enhances the passion.

that 's why VHF is so much fun. We have our prediction patterns; Nature just grins and decides.

Cheers.

Hi All,

Nice tropospheric Band II enhancement this morning, providing at least some DX fun. Which brings me to the question what on earth is going on with the ionosphere? May was record breaking poor for Es DX, June was record breaking good and now July is back again at record breaking poor levels. I have never seen anything like this before. Will we be seeing a return of Band II Es or is the season over?

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41427. RE: [SkywavesDX] Band II Tropospheric Loggings for 9 July 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-10 01:04:41 UTC
From: Paul R
Topic: 38927 Message: 41427

The conditions you are experiencing are no different from what I did here in Christchurch, New Zealand during the summer we didn't have. The season was shaping up to be a good one until early December when the weather pattern changed. The Jetstream moved northwards which allowed the low pressure zones that normally circulate to the south of the country to track more northwards and the high pressure ridges to track farther northwards. This meant that we were getting more southerlies which brought cold air up from Antarctica in the South Island.

From the central North Island northwards the pattern was somewhat different and they did have some effect from the high pressure zones.

What it meant for FM DXers was that activity all but came to an end in the South Island whereas DXers in the northern North Island had a fairly good season where the weather was more settled.

This leads me to conclude that much of the DX that we receive is influenced more by the weather than by the sun. There is a video here which should explain the weather effects
http://www.hamsci.org/publications/upper-level-lows-and-six-meter-50-mhz-sporadic-e

The only summer like temperatures that we did experience was courtesy of the seasonal North Westerly that was cause by the foehn effect of the wind being dried out as it crossed the Southern Alps
https://en.wikipedia.org/wiki/Nor%27west_arch

With any luck things will change.

41434. UNID 92.0 from 16-06-17

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-14 19:42:29 UTC
From: John Faulkner
Topic: 41434 Message: 41434

I don't recognise this language:

https://app.box.com/s/r64ls95n1nbfegkjw79gw98ojfil3hrw

But Nick suggested it might be Turkey. Since Adana was coming in on 87.5
and 92.0 at the same time I wonder if this is Best FM from Adana?

Thanks

John.

Hi John,
The language is Turkish, but there is no Best FM on 92.0. Maybe Süper FM
from Adana, but not sure at all.
Regards
Kurt from Istanbul

Thank you Kurt.

My mistake, I meant Süper FM. So the language being Turkish and Adana being received at this time does make Süper FM seem likely. I won't log it without evidence of course.

As you will have guessed, I am in the process of checking my recordings from the 16th June. There are many files since conditions were widespread on this day. Maybe other Adana stations will now show up.

Thank you again and good DX!

John.

... and here is a co-incidence! Best FM, 87.8 from Adana. Received at
1036 on 16th June.

https://youtu.be/Xwq8qfwPYR8 Not a bad signal, but it faded a little
for the ID - looped here.

Good DX!

John.

41438. UNID North African on 102.1 - Algeria?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-16 21:34:35 UTC
From: nickgilly@...
Topic: 41438 Message: 41438

Hi all.

Any ideas on this one please? It was recorded during Es to Spain, Algeria and Tunisia earlier today:

https://app.box.com/s/pgogm393cwnykjn2zdongw1ko6z7118h
https://app.box.com/s/pgogm393cwnykjn2zdongw1ko6z7118h

There's mentions of Twitter and Facebook ('El Qahira'?) which may provide some clues. Any help will be much appreciated.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

41442. UNID Spain 90.9 via tropo - Onda Cero?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-18 18:53:34 UTC
From: nickgilly@...
Topic: 41442 Message: 41442

Hi all.

This was received during tropo to NW Spain (Galicia) on the morning of July 15th:

https://app.box.com/s/hgpzufau8z2so89v4xhdznux4xrsnw4t
https://app.box.com/s/hgpzufau8z2so89v4xhdznux4xrsnw4t

Could this be Onda Cero from Padrón/Alto de Elisa?

Any help much appreciated.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

Topic: 38927 Message: 41443

Hi All,

A big Band II Es day today, coming out of nowhere. I could not start my listening session any earlier than at 6pm local time, so a large portion of the fun was missed.
Difficult circumstances for DX-ing, with some young visitors in the house producing lots of QRM. And FMLIST again playing slow down tricks on me, causing a high level of frustration.
The evening part of the opening was not very stable, with the MUF and skip area showing wild fluctuations.

Here’s hoping that today was the start of some more glorious weeks like we had in June, before the season is over.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41446. fmdx lightning scatter

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-20 07:08:48 UTC
From: pe1etr@...
Topic: 41446 Message: 41446

I did some experiments during a local thunderstorm.

I can't remember if I have had lightning scatter on band 2 pm FM before, I know I have had analogue UHF TV via this mode before.

Nothing exotic just Sandale, but it worked. I did have some pop music on 90.3 though along with BBC R3

I was monitoring my Sony ST-S311 live but did record a few IQ files fromm SDRplay.

Safety note
My aerials are indoors.(ring dipole and square quad loop)
How many people on here have earthed their aerial masts?

https://youtu.be/FEH8OoOp7rQ

41449. Unid RUS-UKR 88.6 MHz

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-21 21:43:17 UTC
From: ilkka suni
Topic: 41449 Message: 41449

Sorry to bother you, folks. This one beats me.

88.6 MHz, at 1540z on Friday the 21st.
https://app.box.com/s/26c490eh1tvjgf8l0mpmhsaxl1zbspod

Should be from either Krasnodar or Ukraine. Help much appreciated.

Thanks a lot.

Thank you, Jürgen.

Oops, I goofed. I had stations in the 90...180
deg. sector listed only, as the current
conditions were to my 149...155 degrees. The ERA
FM transmitter is located in my 191 degrees, thus I had hidden it.

Also, I could have listened to the language more closely.

What are the typical limits of reception in terms of distance for this mode? I have indoor antennas in my attic at all—might attempt this mode during our next batch of thunderstorms. Exotic!

Topic: 41457 Message: 41457

This was received during E-skip this morning, PI EBC4, with a clear 'Radio Treby' ID at 1 min 08:

https://app.box.com/s/3pyee0i7loficgp8wzf0gw4einfctc6r
https://app.box.com/s/3pyee0i7loficgp8wzf0gw4einfctc6r

This doesn't seem to be in FMLIST. Does anyone know where this is from please?

Thanks and good DX.

Nick, Whitchurch, Hampshire.

Hi All,

A nice Skandinavian Band II Es opening this morning. With the skip area reaching high latitudes, which is rare. Very little movement of the Es cloud again, the signature of this season.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Subject: [SkywavesDX] 87.8 Radio Treby (Sweden) PI EBC4 - where from?   This was received during E-skip this morning, PI EBC4, with a clear 'Radio Treby' ID at 1 min 08:

https://app.box.com/s/3pyee0i7loficgp8wzf0gw4einfctc6r

This doesn't seem to be in FMLIST. Does anyone know where this is from please?

Thanks and good DX.

Nick, Whitchurch, Hampshire.

41465. Unidentified Israeli & Middle East stations

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-23 16:27:31 UTC
From: John Faulkner
Topic: 41465 Message: 41465

This morning saw a superb band-wide FM opening to Israel between 0900 and 0910. Several unidentified stations were also received including a few Arabic language broadcasts.

It started with KAN 88 on 87.6: https://youtu.be/HXvPgK0xLn0

Not long after this I spotted several other Israeli stations, the strongest of which was KAN 88 from Beer Sheva on 88.5: https://youtu.be/od4NUl_hCds

Signals then began to shoot to the top of the band. I presume this is Israel on 105.1: https://youtu.be/JZUT3j70JYs

105.1 was in parallel with 97.8: https://youtu.be/Y6fFm5Wv3Go

Then things got even more interesting. An Arabic station appeared on 88.7: https://youtu.be/HQwMdBlw0Xg

Then another Arabic was noted on 88.2 with Quranic prayer: https://youtu.be/UAOKDYI0fBo

A Hebrew language station appeared on 93.0: https://youtu.be/hCYI0wKkur4

Then another Arabic (I think) language station appeared on 90.7: https://youtu.be/P-HFWR6DRE4

There are possibly a few more unidentified stations which I will dig out this evening and add below if they are of interest.

Thanks if anybody can throw any light on the unidentified stations.

Best DX!

John.

It has been in fmlist since 2008 together with Radio Vara, but the PI code is new.

41467. Band II Sporadic E Loggings for 23 July 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-23 19:17:17 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41467

Hi All,

For many years I have known Italian Band II Es soup. Little did I know about Band II Es Balkan soup. Until today. For almost an hour the band was completely saturated with at least 4 DX signals on each frequency. ID-ing stations became a real challenge, also because RDS decoding was difficult.
In the midst of this I found a station on 99.8 MHz with an unusual PI code and a scrambled PS. I thought. It took me a while before realizing that I was listening to Galgalatz from Beer Sheva! Believe it or not, this is my first catch from Israel. A big surprise that lasted for just two minutes. Upon checking other frequencies from this location I found nothing but strong locals or thick layers of Balkan soup.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Subject: [SkywavesDX] Band II Sporadic E Loggings for 23 July 2017

Hi All,

For many years I have known Italian Band II Es soup. Little did I know about Band II Es Balkan soup. Until today. For almost an hour the band was completely saturated with at least 4 DX signals on each frequency. ID-ing stations became a real challenge, also because RDS decoding was difficult.
In the midst of this I found a station on 99.8 MHz with an unusual PI code and a scrambled PS. I thought. It took me a while before realizing that I was listening to Galgalatz from Beer Sheva! Believe it or not, this is my first catch from Israel. A big surprise that lasted for just two minutes. Upon checking other frequencies from this location I found nothing but strong locals or thick layers of Balkan soup.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Hi Janpeter

Congrats with the Israel reception.

Andy.

Subject: [SkywavesDX] Band II Sporadic E Loggings for 23 July 2017

Hi All,

For many years I have known Italian Band II Es soup. Little did I know about Band II Es Balkan soup. Until today. For almost an hour the band was completely saturated with at least 4 DX signals on each frequency. ID-ing stations became a real challenge, also because RDS decoding was difficult.
In the midst of this I found a station on 99.8 MHz with an unusual PI code and a scrambled PS. I thought. It took me a while before realizing that I was listening to Galgalatz from Beer Sheva! Believe it or not, this is my first catch from Israel. A big surprise that lasted for just two minutes. Upon checking other frequencies from this location I found nothing but strong locals or thick layers of Balkan soup.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

From: Janpeter van Dijk
Topic: 38927 Message: 41471

Thank you Patrick. Yes, Sunday was a good day for Es, one of very few this month.

Janpeter

Subject: [SkywavesDX] Band II Sporadic E Loggings for 23 July 2017

Hi All,

For many years I have known Italian Band II Es soup. Little did I know about Band II Es Balkan soup. Until today. For almost an hour the band was completely saturated with at least 4 DX signals on each frequency. ID-ing stations became a real challenge, also because RDS decoding was difficult.
In the midst of this I found a station on 99.8 MHz with an unusual PI code and a scrambled PS. I thought. It took me a while before realizing that I was listening to Galgalatz from Beer Sheva! Believe it or not, this is my first catch from Israel. A big surprise that lasted for just two minutes. Upon checking other frequencies from this location I found nothing but strong locals or thick layers of Balkan soup.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41476. Sporadic E Loggings for 27 July 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-27 20:27:04 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41476

Hi All,

Today saw another Sporadic E opening, after several completely quiet days. Very patchy conditions, generally with low intensity and a MUF staying at the bottom half of Band II. The skip area jumped like crazy, with intermittently shorter and longer distances and….. with another huge surprise. A jingle ID ‘Energy’ with Arabic moderation on 92.1 MHz. Again it took me a while before realizing that this was another 2 x Es catch, this time from Cairo! And the first time for me geeting something from Egypt. It was already in June that I called this season insane. Well, it still is in many aspects.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41477. UNID 87.9 - Latvia?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-27 21:33:41 UTC
From: nickgilly@...
Topic: 41477 Message: 41477

Hi all.

This was received earlier today during E-skip to the east. Just prior to this I had logged Zip FM from Lithuania on 88.2, so I was wondering if it may be Latvia?:

https://app.box.com/s/3sn8lcoudq70c8x20kfbfohw7ogd6nc0
https://app.box.com/s/3sn8lcoudq70c8x20kfbfohw7ogd6nc0

It certainly sounds eastern European.

Thanks for any help on this.

Good DX.

Nick, Whitchurch, Hampshire.

Congratulations on those two Egypt logs Janpeter. And I forgot, also for the Israeli log recently.
I only caught some of the Es here after arriving from work and I was right on the edge of it. The few stations IDed were from Poland or the Baltic region. Good DX.

Nick, Whitchurch, Hampshire.

On Thursday, 27 July 2017, 21:42, "Janpeter van Dijk janpeter_van_dijk@... [SkywavesDX]" <SkywavesDX@...> wrote:

  Hi All, Today saw another Sporadic E opening, after several completely quiet days. Very patchy conditions, generally with low intensity and a MUF staying at the bottom half of Band II. The skip area jumped like crazy, with intermittently shorter and longer distances and….. with another huge surprise. A jingle ID ‘Energy’ with Arabic moderation on 92.1 MHz. Again it took me a while before realizing that this was another 2 x Es catch, this time from Cairo! And the first time for me geeting something from Egypt. It was already in June that I called this season insane. Well, it still is in many aspects. Best regards,Janpeter van Dijk, Zoetermeer, The Netherlands Thursday 27 July 2017Sporadic E Loggings:

41480. Re: [SkywavesDX] Sporadic E Loggings for 27 July 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-28 07:47:46 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41480

Thank you Nick. I am still not completely over the surprise, somehow the Gods of nature seem to have decided that this kind of skip should finally also land in Holland ☐

And I am now again in doubt if I should get into recording chunks of the FM band. If I would have had that equipment, I am sure to have found much more stations. The Egypt opening lasted maybe five minutes, Israel just two. Way too short to tune the band up to the MUF. Which was to the top of the band with the Israel opening. And even if I could have recorded the entire FM band, it should not take too long to listen to all frequencies for a two minute interval.

Which brings me to the question if anyone knows if the ELAD S3 is already available for sale? And if yes, are there any reviews yet? What is the sales price?

Onderwerp: Re: [SkywavesDX] Sporadic E Loggings for 27 July 2017

Congratulations on those two Egypt logs Janpeter. And I forgot, also for the Israeli log recently.

I only caught some of the Es here after arriving from work and I was right on the edge of it. The few stations IDed were from Poland or the Baltic region.

Good DX.

Nick, Whitchurch, Hampshire.

Hi All,

Today saw another Sporadic E opening, after several completely quiet days. Very patchy conditions, generally with low intensity and a MUF staying at the bottom half of Band II. The skip area jumped like crazy, with intermittently shorter and longer distances and….. with another huge surprise. A jingle ID ‘Energy’ with Arabic moderation on 92.1 MHz. Again it took me a while before realizing that this was another 2 x Es catch, this time from

Cairo! And the first time for me geeting something from Egypt. It was already in June that I called this season insane. Well, it still is in many aspects.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Topic: 38927 Message: 41481

I am led to believe that the S3 will be available in September for "less than 1000 Euro". No reviews yet to my knowledge.

Tempted by the 23Mhz bandwidth, as my opportunities for real-time DXing are limited somewhat with the arrival of baby Sophie a couple of weeks ago. I'll make a DXer of her yet....

Will need a few more HDDs though, to record at the required rate of 328GB/hour at that bandwidth!!! A decent Nvidia graphics card will also be a necessity at that rate too, I expect.

Given the S2 is around 525 Euro, and getting 23Mhz bandwidth at 16 bits on the ADC really takes some doing, it looks to be a good price compared with, say, the Winradio top of the range stuff.

41482. Re: [SkywavesDX] Sporadic E Loggings for 27 July 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-28 19:08:43 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41482

Hi Jim,

Good to see some of the S3 specifications / requirements. For sure I will first need to see some reviews, before investing a considerable amount of €. Which will be even much higher if running this DX beast means that a new computer might be needed.

Congratulations with your daughter! But don't have too high hopes for her becoming a DX-er. I have four children myself, none of them has any interest in this hobby. Instead they are convinced something is wrong with me trying to listen to these noisy signals. While tens of thousands of clear signals are availble through the Internet. Oh well...

Onderwerp: Re: [SkywavesDX] Sporadic E Loggings for 27 July 2017

I am led to believe that the S3 will be available in September for "less than 1000 Euro". No reviews yet to my knowledge.

Tempted by the 23Mhz bandwidth, as my opportunities for real-time DXing are limited somewhat with the arrival of baby Sophie a couple of weeks ago. I'll make a DXer of her yet....

Will need a few more HDDs though, to record at the required rate of 328GB/hour at that bandwidth!!! A decent Nvidia graphics card will also be a necessity at that rate too, I expect.

Given the S2 is around 525 Euro, and getting 23Mhz bandwidth at 16 bits on the ADC really takes some doing, it looks to be a good price compared with, say, the Winradio top of the range stuff.

==========
Jim, Bournemouth, Dorset. IO90BR. Elad FDM-S2, Perseus/FM+, SDRPlay and Funcube Dongle SDR Recievers 8-element OP-DES for Band 2, 12-ele ZL Special for 2m, plus wideband vertical. Wellbrook 1530 Loop for LF

On 28/07/2017 07:47, Janpeter van Dijk janpeter_van_dijk@hotmail.com<mailto:janpeter_van_dijk@hotmail.com> [SkywavesDX] wrote:

Thank you Nick. I am still not completely over the surprise, somehow the Gods of nature seem to have decided that this kind of skip should finally also land in Holland ☐

And I am now again in doubt if I should get into recording chunks of the FM band. If I would have had that equipment, I am sure to have found much more stations. The Egypt opening lasted maybe five minutes, Israel just two. Way too short to tune the band up to the MUF. Which was to the top of the band with the Israel opening. And even if I could have recorded the entire FM band, it should not take too long to listen to all frequencies for a two minute interval.

Which brings me to the question if anyone knows if the ELAD S3 is already available for sale? And if yes, are there any reviews yet? What is the sales price?

Onderwerp: Re: [SkywavesDX] Sporadic E Loggings for 27 July 2017

Congratulations on those two Egypt logs Janpeter. And I forgot, also for the Israeli log recently.

I only caught some of the Es here after arriving from work and I was right on the edge of it. The few stations IDed were from Poland or the Baltic region.

Good DX.

Nick, Whitchurch, Hampshire.

Hi All,

Today saw another Sporadic E opening, after several completely quiet days. Very patchy conditions, generally with low intensity and a MUF staying at the bottom half of Band II. The skip area jumped like crazy, with intermittently shorter and longer distances and….. with another huge surprise. A jingle ID ‘Energy’ with Arabic moderation on 92.1 MHz. Again it took me a while before realizing that this was another 2 x Es catch, this time from Cairo! And the first time for me geeting something from Egypt. It was already in June that I called this season insane. Well, it still is in many aspects.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

DXing has nothing to do with the content of what the stations are airing. It's just "as stupid" as fishing and throwing the fish back into the pond...

Meteor scatter DXers may be interested in this news item

There is going to be a meteor shower on 12th of August, 2017. According to astronomers this will be the brightest shower in the recorded human history. It will light up the night sky and some of these might even be visible during the day. This meteor shower is being considered as once in a lifetime opportunity as the next meteor shower of such kind will be after 96 years.

The Perseid meteor shower, one of the brighter meteor showers of the year, occurs every year between July 17 and August 24
https://www.timeanddate.com/astronomy/meteor-shower/perseid.html.

Edward Baker (G1MXP)

Bet it's a bust :)

These forecast intense showers usually are.

Of course, the Perseids is one of the most active showers anyway, time
will tell if this year's is far more active than usual.

The best shower I ever saw was the exceptionally active Leonids in 1998.
Rather unexpected as it wasn't "due" till 1999.

Thanks for the tip Edward.

Had this been an article in the Daily Express then I would have
completely ignored it. I see your link to timeanddate.com, but where did
you see this news item? Was it this one?
http://www.physics-astronomy.com/2017/07/get-ready-brightest-meteor-shower-in.html#.WXxRb4TyvRY

There is also an article here:
http://www.wral.com/august-meteor-shower-not-expected-to-be-brighter-than-usual-despite-facebook-claims/16846472/

If it is going to be something spectacular, then we might have an
inkling of this a few days before if we see a promising increase in
meteor scatter. I don't think meteor showers are /that/ predictable.

Coincidentally, I recorded five hours of FM yesterday morning, looking
for meteor scatter. There were some reasonable bursts. I will post my
log shortly.

Good DX!

John

** Personal First

With meteor scatter being lively recently I decided to record the band
between 0400 and 0900 this morning. Several Swedish stations couldn't be
logged due to the old multiple transmitter syndrome, but there was a
reasonable amount of activity, plus a few personal firsts.

Good DX!

Hi All,

Some Es this evening, after a quiet day. The MUF was well into Band II, with a fair video carrier on 93.25 MHz. No FM stations heard though.
May this have been a pre-warning for a great DX day tomorrow.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

From: davebunyan@...
Topic: 41491 Message: 41491

I'm gradually clearing my recorded files - and found a small batch on 66-74 MHZ from 19 July I hadn't listened to. This is what I found on 67.04 MHz

https://app.box.com/s/ujnok1xyjh61tmeyhvmcf0r3faxznctt
https://app.box.com/s/ujnok1xyjh61tmeyhvmcf0r3faxznctt

The dominant station is UKR Kultura - but coming and going is another station which sounds vaguely arabic. There are a few patches where the Ukraine station fades right out and hopefully someone can identify the language - but given that the Ukraine was coming on a bearing of 83 - 86 deg - the station from Turkmenistan is the strong candidate at 4896 km on a bearing of 86 deg.

There also appear to be a couple of Russian stations present during the period - which can only be double hop - but I need to do a bit more checking.

David

From: davebunyan@...
Topic: 41491 Message: 41495

Thanks for the suggestions - I think R Rossii GKTR Dagestan is the most likely answer - with local programming (unless someone definitely identified the Turkmenistan language). Distance 3439 km / Azi 85 degrees.

I also have a weak station on 66.77 which must be Russian and an identical station on 69.53 - GTRK Stavropolye transmits on both frequencies - the distances are are 3120 km / 87 deg and 3084 km / 87 deg - so fits in with the propagation path at the time. They are quite weak but I'll record them later and post a link if the recordings sound usable.

I'll analyse the rest of the files further on another day and there are other weak signals to check out.

David

41496. Band II Sporadic E Loggings for 30 July 2017

41497. More double hop on 19 July 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-30 22:46:24 UTC
From: davebunyan@...
Topic: 41497 Message: 41497

Trawling through the recordings from 19 July 2017 is producing more double hop stations.

I have a very clear id on 66.20 MHz for Radio Rossii at 0929 - the distinctive music and YL announcing "Radio Rossii". Marginal (but good enough to confirm) signals on 68.36 and 68.51 have the same programming. These three frequencies are all used by GTRK Kuban so the transmitters would be:

66.20 - Tblisskya 17 kw 2939 km / 87 deg
68.36 - Kanevskaya - 17 kw 2831 km / 87 deg
68.51 - Armavir 17 kw 3038 km / 87 deg

Next:
66.77 - Ipatova 17 kw 3085 km / 87 deg GKTR Stavropolye
69.53 - Stavropolye 17 kw 3084 kw / 87 deg GKTR Stavropolye - 0930 a snatch of R Rossii's tune and the deep male voice "...Rossii"

The latter two are very marginal and are pushing the limits of SDR demodulation - it took a lot of tweaking to get the "Rossii" bit clear enough on 69.53 to be sure. But the general pattern is a very weak bunch of signals on a bearing of 87 deg and at 2800 - 3100 km.

In the past I've had better reception and on the hour the full id sequence includes the YL id a minute before the hour and the male voice id on the hour with the pips. This time the reception was too marginal to say whether there was a complete sequence or not.

Further up the band on 70.30 I found this weak signal - needing a 60 kHz bandwidth to bring it up. Once again it is a "turkish/arabic" suggesting a "stan". It is not the same programme as the clip I posted 67.04 MHz - which at this time had ululating singing.

https://app.box.com/s/eb1bul9rqncfqjknvwfhoeb3qgrp2ruw

The signals come and go but both signals on 67.04 and 70.30 do not have a voice id at 0929 (YL) or at 0930 (OM) - the programmes are unbroken. Is this typical of regional programming in Russia that some will have an id at 30 minutes past the hour and others do not. Victor via the other forum has said 67.04 is from the Dagestan region - i.e. the Kochubey tx at 3439 km / 85 deg

And to slip one more in - which I would suggest is an unlisted transmitter from somewhere -

https://app.box.com/s/ymgmvlp7cd36fk36x9k672z6bb7wkjlr

So once again if anyone has any ideas .... thanks

David

Jurgens thanks for the info re R Rossi. Victor - it is what I suspected - but had to ask. And thanks to Victor for identifying the station on 70.3(1) as coming from Cherkessk. At a distance of 3142 km / 88 deg it matches the other reception. I've checked 72.11 which should be R Mayak from the same site and found a weak carrier which peaked for a second or so to give a snatch of music - but too poor to consier logging.

All together an interesting set of recordings - and I can't remember why I decided to record that particular time period - as the paperlog book is totally blank. I must have seen the MUF chart - checked the band and set up recording at a time when I couln't be present to DX. When recording the OIRT band I try to get the periods on the hour and half hour as being most likely to give identification. This reception was a lot weaker than the opening I had on 29 May 2016.

Wikiepedia entries for the Russian regions makes interesting reading - it makes you realise just how diverse the Russian Federation is - even in regions the size of an English County. For UK members - imagine if Kent had 14 official languages!

41502. Unidentified relay of Extra Radio, Germany on 89.2

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-07-31 09:39:55 UTC
From: John Faulkner
Topic: 41502 Message: 41502

During a period of short Es to the Bavarian region of Germany, I received a station on 88.0 with the PI code DA1A. This was Extra Radio from Hof, a new one for me. Then I noticed a station on 89.2 with the same programme. Do our German DXers know who this could be? My suspicion was initially Radio Eins from Coburg since this is the only listed station I can see from Bavaria, but their programme schedule does not mention relaying Extra Radio. The time of reception was 19:07. Perhaps this is a new outlet for Extra Radio?

Thank you.

John.

Well, still going through my recordings and I have found another outlet
of Extra Radio on 92.1. Listed on the frequency is another Radio Eins,
this time from Neustadt bei Coburg. It's beginning to make sense now -
it's probably Extra Radio which is relaying Radio Eins. Can somebody
throw any light on this please?

Thank you.

John.

41506. Unid in Portuguese 90.7

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-01 20:47:05 UTC
From: Mauricio Molano Sánchez
Topic: 41506 Message: 41506
Attachments: 1 described; binary payloads are missing from this source WARC

Hi friends,
I have here a mistery station. On June 10th during one of the intense openings to the Canary Islands I was receiving on 90.7 Holland FM (Playa del Inglés, Gran Canaria) with good signal. At 09'45 H-FM was quickly supplanted by another station in Portuguese. It sounds to me like one of the usual Brazilian preachers. Reception lasted for around 1'30", then Holland FM dominated the frequency again.
The problem is that there is no Portuguese station on 90.7 nor from the continent nor from the islands (AZR, MDR)... nor on FMLIST, nor in the ANACOM site. A longer shot to Cabo Verde offers a station on this freq.: Rádio Morabeza. But programing has nothing to do with what I received.
Some idea?...

https://app.box.com/s/dq99nzvbs768pzv56uifs1ocdqf2ku3i
Thanks!

Very intriguing Mauricio.

Could it actually be from Brazil? A real stab in the dark but there is a religious station on 90.7 in Fortaleza on the NE coast of Brazil, Feliz FM. Looking at Google Maps it is inline with both the Canaries and Cape Verde from your location.

I expect it'll turn out to be something much less exotic but, well, who knows?

I hope you can get an ID on it.

Good DX.

Considering your location and the reception of CNR at the same time this must have been Brazil ! Typical excited program content which I previously heard on medium wave, shortwave and tropical bands over many years. Congrats !

The problem is that there is no Portuguese station on 90.7
nor from the continent nor from the islands (AZR, MDR)... nor
on FMLIST, nor in the ANACOM site. A longer shot to Cabo Verde
offers a station on this freq.: Rádio Morabeza. But programing
has nothing to do with what I received.
Some idea?...

https://app.box.com/s/dq99nzvbs768pzv56uifs1ocdqf2ku3i

Thanks!

Thanks Nick and Marc for yor comments.
I thought myself of Brazil but more like a dream than a real posibility. I have followed Feliz FM at the same time of my reception and the kind of programming fits but, well, I would expect less signal and much more fading after a 5809 km trip!. 73!

Hi Jurgen,
thanks for the info.
Paul Logan has in his web some recordings of TA FM DX.
His 2009 recordings of NA stations sounds as I would expect,
as I myself have heard from Nigerian stations or Russians on
the OIRT band (catched from Tarragona coast)... lots of quick
fading. But his 2010 recording of WRTU (San Juan, PTR) sounds
pretty similar to my enigmatic station.

The slower fading might be explainable if much of the path was tropo, e.g. tropo duct from NE Brazil to the Canaries, and then a Sporadic-E hop to Salamanca.

I wonder what the tropo map was showing on June 10th? There is often intense long-distance ducting in the Atlantic.

Good DX.

Hi friends,
Rocco Cotroneo has replied me in RealDX:

Rocco Cotroneo
Hoy a las 17:14

Mauricio
even if the preacher has for sure a NE Brazilian accent, at 1:10 the man talks about a "Centro de Ajuda" which turned out to be a branch of the Igreja Universal do Reino de Deus in Portugal.
Here is the link

https://centrodeajuda.pt

So, I'd say Continental Portugal os islands. Sorry!
Rocco

My reply:

Thanks Rocco for this valuable info.
The problem with Portugal (mainland or islands) is that there are no stations on 90.7 MHz. Researching about the IURD Centro de Ajuda I have found that this people have a branch in Praia, Cabo Verde.This local C-d-A produces programing for Radio Crioula (88.5/94.9)... Maybe also on weekends on Radio Morabeza??... or only a "commercial" in Morabeza?. Cabo Verde stations have been heard via tropo in the Canary Is. I need to investigate some more!

Thanks!

The Cabo Verde option is open again for me

41515. Sporadic E Loggings for 3 August 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-03 19:36:35 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41515

Hi All,

A very big Sporadic E day today, especially given the fact it is already August. Many hours with DX resulted in eleven countries being received off an almost stationary Es cloud. Most remarkable was the DX from Greece. Again I should say, this season has featured five very big openings towards Greece.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

From: Luís Carvalho
Topic: 41506 Message: 41516

Hello all,

I can confirm that there are currently no txs in Portugal on 90.7. If the logged station was broadcasting some kind of religious px on the mentioned frequency, I am 99.99% sure it wasn't from Portugal.

Regards & good DX,
Luís Carvalho

41519. Radio Svitle Emmanuyil on 72.9 ?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-04 09:03:10 UTC
From: franco289@...
Topic: 41519 Message: 41519

Hello everybody,

yesterday, during a strong opening in the OIRT band from Central Italy into Ukraine, I heard a clear ID "Radio Emmanuyil" on about 72.9 Mhz at 10 Utc.
The frequency could be a little bit different because I am used to listen with a modified Sangean ATS 909, and I also had to avoid some "images" on 72.8 Mhz.
Unfortunately I don't have any recording

That frequency is not listed in Fmlist among the ones used by Radio Svitle Emmanuyil and doesn't appears into svitle.org website.

So, what?

41520. 65,90 Radio Rossii tx Veselovka (KA)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-04 09:41:22 UTC
From: glorenz@fmlist.org
Topic: 41520 Message: 41520

FMLIST has received this notification on 02 Jul 2017:
"This tx is out of order for half a year now. seems nobody has recognized as it was "logged" a dozen times ??? that was certainly the Moscow tx operating on the same frequency. check radiomap.eu Kaliningrad for detaills. there are actually only 2 Oirt Frequencys remaining in KAL oblast after Feb 2017 when this was shut down"
Indeed, our logbook is full with recent logs for this transmitter. The alternative is the Chekhov site just south of Moscow.

The FMLIST RUS editors have not yet processed this notification. Is the information not correct?
With this great FMLIST that we all have, how come that people have to point us to another site which seems to know more?

73,
Günter

41521. Re: 65,90 Radio Rossii tx Veselovka (KA)

From: Janpeter van Dijk
Topic: 41520 Message: 41521

Hi Günter,

Unless this tx has recently (i.e. the last couple of weeks) been switched off, this information is not correct. Also the statement "that was certainly the Moscow tx operating on the same frequency" puzzles me, as I am not aware of any Moscow tx on 65.90 MHz.

I have been one of the DX-ers that received Veselovka this season. Unless this has been a Radio Rossii from multiple hops away, in case there are any from far away on this QRG (I haven't checked this). My reception was in conjunction with several txs from Western Belarus, so it must have been Veselovka.

41523. UNID with talk on 87.6 - Balkans?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-04 17:27:45 UTC
From: nickgilly@...
Topic: 41523 Message: 41523

This was recorded yesterday evening during very patchy E-skip to the Balkans on 87.6:

https://app.box.com/s/jp73lu4z51bv4n46aehnszgx8bwgwni6
https://app.box.com/s/jp73lu4z51bv4n46aehnszgx8bwgwni6

It's the station with OM talk. Is this a Balkan language? A couple of minutes previous to this recording I logged Antena M from Podgorica in Montenegro so it could be that.

Any help much appreciated.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

Hi Nick,

Congratulations for just another Middle East catch! Unmistakenly Hebrew language.

I was carefully watching the propagation maps yesterday and saw that again there were two openings. One from Northwest Europe into the greater Balkan area and one from Central Europe into Israel and surrounding countries. Exactly the conditions that existed when I got Israel a little while ago. Not yesterday though, but good to see it made its way into the UK.

European DX-ers have been gettig an unprecedented amount of 2xEs this season.

Thanks Janpeter. It didn't click with me at the time that the language was Hebrew. There's some nice symmetry going on though. At 1820 UTC I received Antena M from Podgorica at 1840km/114 deg, IDed from the PI code of 30FE. Two minutes later, at 1822 UTC was when Israel appeared, presumably from Jerusalem at 3667 km/112 deg, almost exactly twice the distance of Podgorica.

More of this please!

Good DX.

Nick, Whitchurch, Hampshire.

Sorry about this spam folks,

JUST AN HOUR AGO or so, there was this rather hefty Es opening, with the cloud hanging steady over western Sweden, central Norway, carrying Iceland to me steadily for more than one hour.

This is the Rikisutvarpid newsreader, on 87.7 MHz [2150 km] at 22:01z Friday the 4th, and one can almost see in his eyes how she gets mixed up with the printouts. Ummm...
https://app.box.com/s/cb5lv4rklotebbnkg9pqkj9ob1o2ce84
.

NOW ALRIGHT, TO to my posting there are a couple of possibly reasonable aspects, too.

There are quite some languages in the world, sounding rather distinctive and being spoken rather locally. In northern Europe, Icelandic and Finnish are two of these globally quite unique languages.

Take Danish and Norwegian. If one understands let alone speaks Swedish, one can understand also Danish and Norwegian, to quite a degree. But take Icelandic or Finnish. One understands these languages, no way, spoke one fluently English, German, Spanish, Swedish... On the other hand, to the DXer this is quite handy, too.

Just like Hebrew, one [almost] instantly knows the country, the broadcast is coming from. But only almost, as there are inserts, too, and many countries also broadcast in so called foreign languages. Like Poland has news bulletins in German, and Finland has news bulletins in foreign languages. Sweden has news broadcasts in Arabic, and so on.

Anyways, I do not understand a word Icelandic, even though the Nordic countries kind of are tied to each other. To me, Icelandic sounds as impossible to comprehend as does Albanian, or Urdu.
.

ANOTHER ASPECT. Just recently, there was discussion on this possible, huge 3-hop catch from Brazil.

I guess, Es conditions above the oceans just might work on a slightly different mechanism, than does Es above continental areas. Or could they. Anyways, for me half the path, even more, from Iceland lies above ocean. The openings usually are rather predictable, and the openings usually behave in a rather civilized manner. The signals are steady and of long duration, much like still not exactly like those in the OIRT band. And quite unlike them hastily behaving signals to

me, from the continental Europe.
.

AS TO THEM MULTIHOP catches, then.

What I believe to have noticed over the decades, multihops quite often preceed them regular, single hop Es conditions. And one should keep an eye on the 6m, 50MHz map. Conditions on these frequencies rather well indicate the propability for multihops on the CCIR band.

Rises the MUF and the dense Es conditions on the CCIR band gets triggered, the propability for 2-hops quite vanishes. But that's just what I believe to have noticed, having been an active FM listener since the '70s.

In conclusion, what would I know. Anyways, Es conditions this summer have been very interesting, very interesting. And a refreshing exception to quite a many last few years.

73, ilkka

41531. Jumping Spectrum issue in Elad

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-05 10:44:31 UTC
From: Guido Schotmans
Topic: 41531 Message: 41531

Since a longer time I am struggling with a strange phenomenon. At random times the spectrum starts to jump up and down. Last week, I have checked all connection and replaced my FM logPer antenna with another one I had laying around. It is however exactly the same type. This phenomenon comes and goes without any action. It is however very strange that it happens only in the FM-band. In next video you can clearly see that the noise floor stops jumping outside of the FM-band.

https://youtu.be/Z0HiQd3mNH8

And in this video you see the phenomenon starting. So it isn't interference that is added, but the existing signals are suppressed in an pulsing way.
https://youtu.be/-8ls7YYWE54

I am wondering if this can have to do with static build up on the antenna or coax. Has anybody else ever seen this phenomenon and is it common on LogPer antennas ?

73,

Guido.

Hi All,

A wild and at times intense Sporadic E opening this morning / early afternoon. The skip area and distance was bouncing around at the start, even producing some short skip.
The fun was over rather quick.

41536. Mystery PI A407

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-10 15:33:51 UTC
From: John Faulkner
Topic: 41536 Message: 41536

This station appeared on several frequencies this afternoon, but only
one frequency had a signal strong enough to produce the PI code A407. 90.6.

The station was also heard on 87.6, 87.9 and 93.2. Time 12:36 GMT.

Does anybody know who this is? The PI code is unlisted.

Thanks.

John.

** Personal First

Not a bad day for Es! ;O) Not just one opening, but several. One or two
of which mixed together.

The surprise catch was a likely Armenian station on 87.5, but I had to
log this as tentative. Here's what happened. I first noticed a station
in an unidentified language on 87.5. It didn't sound like anything I'd
heard before and was quite unusual. A woman was talking with a fairly
deep and distinctive voice. The next thing I did was to check all the
available web audio streams of stations in Turkey, Cyprus, Lebanon, etc.
and, thanks to the thoroughness of the FM List editors who keep those
streams up-to-date, I was able to check *all* the streams I needed. Only
one of those streams had a woman talking in such a voice. I'm 99%
certain it was the same voice I was hearing on 87.5. The only problem
was that my 87.5 had just faded a few moments before I began to listen
to the audio stream of Armenian station Hayastani Azgain Radio 1.
Naturally, I have to log this as tentative as I just got there too late.

Two mysteries today were the appearance of BBC sounding stations on 89.8
and 97.3 when the band was open to the Balkans, then to Italy.

Good DX!

Their web site gives Wipptal/Brenner as the service area. This is not from Italy, but from Austria.

41539. Perseids peak

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-11 07:13:34 UTC
From: pe1etr@...
Topic: 41539 Message: 41539

The peak is due tomorrow Saturday 12th August at 19:00 UTC

The radiant is circumpolar in the Northern Hemisphere and therefore does not set. There should be good MS activity for about 2-3 days.

Attachments: 1 described; binary payloads are missing from this source WARC

Hi folks,

AS THEM PERSEIDS pre-maximum this year, to me
seem to act equally cheap as did last year, I
might as well dabble with this issue. Them
shortest catches via MS, possibly possible.

I must apologize, especially to David, I am only
now referring to this very thread as this thread
over the issue took the least time to dig up.
.

I HAVE DONE MORE or less active MS monitoring
starting from early '80s, that is when began to
realise the potential of MS. Somewhere in late
'80s and early '90s I haunted MS quite actively,
and after a long break I dug into MS again, some 5 years ago.

Recall I right, most if not even all of the
shortest range MS reported in Finland, is in the
range of 370 to 390 km. I may recall wrong, of
course. Anyways, I personally cannot remember
having caught MS from closer than 370 km away.
All reflections coming from closer, I have
interpreted having been formed by aircrafts.

In last few years, ever since I got aware of
these plane tracking sites, I have been doing
quite some - if I may say so - diy monitoring and
research with aircraft scatter, aircraft
reflections. In recent years, every time I spot
an exceptionally short distance meteor-like
scatter or ping I check for them plane tracking
sites, for possible proof whether it was MS or
aircraft. Every time there was a ping or scatter
from a transmitter closer than 350 km away, there
was an aircraft rather obviously being the reflection source.

These ultra-short range pings are rather easy to
recognize by the ear, I believe.

I have never experienced ultra-short range MS via
backscatter. Maybe I will, some day. Or, maybe I
just cannot read these ultra-short range reflections right.
.

ANYWAYS, HERE IS a sample of the closest MS, I
have been noticing upon this current Perseids.
https://app.box.com/s/562bu0trv8pabycpayalm0sn3woiai7j
The 1 kW transmitter stands 367 km away in my 320
degrees, while my 8-ele horizontal was pointing
in some 210 degrees. The rapidly pulsating
doppler is imminent, thus being easy to tell it
is MS, not manmade. By them tracking sites, there
absolutely was no aircraft around, airborn. One
may realise, over continental Finland the air
traffic is very distinct, as our major
international airport is located in Helsinki, southernmost Finland.

On the other hand, just in these last few days I
have experienced MS-like say 0,5 sec. pings from
beyond 500 km, fool proofly having been
backscatter, possibly even just fuselage
reflections by *jumbojets* traveling beyond the very transmitter.

Just for an enclosure, a random aircraft scatter
feature I recently photographed. She's a
Lufthansa Airbus A340, in 36.000 ft, bound Münich from Tokyo.

Generous Perseids to all!

73, ilkka

No question about that - very clearly meteor scatter.

Nothing wrong with your English Ilkka. :-)

I recorded for MS this morning between 0400-0900 but I won't be able to check the files for a few hours. I can't say that activity has been great so far. Plenty of pings and one or two longer bursts, but all quite weak. Hopefully it will pick up tomorrow. I still need to catch some MS on 98.3 then I have the full set.

Good DX!

John.

Disappointingly low numbers of meteor bursts during the hours of dawn.
Once again, it's hard to believe we are in the midst of a major meteor
shower.

** Personal First

Today's log was a 'luck of the draw' kind of log. I had to go out and leave my FDM-S2 recording by itself. This resulted in a lot of files. Obviously I hadn't planned to go through all them, so I used SDR Console's File Analyser to see which files contained DX. On checking a few it seemed to be mostly the same Polish stations coming through, and not too many of them at that, so I deleted the majority of files and left around 20 or so which looked like they were the most productive.

Whether you would call it luck that I managed to save a file which contained Turkish DX from Izmir, or whether you would call it bad luck that I didn't inspect the files more closely to see if there were more Turkish stations, well, you decide. Personally, I would call it luck that I accidentally hit on these as they were all first timers for me.

This was only a bonus since I was out at the time and, had I not been able to record the DX, etc. Other Turkish stations were also around at this time, all on listed Izmir frequencies, but I couldn't ID them in the few seconds they were available. Videos can be found on my YouTube channel here:

89.0 Radio 35, Izmir 1935 17-06-17 (2618 km)

From: davebunyan@...
Topic: 40660 Message: 41548

Ilkka raiess a very good point about aircraft reflections - it would explain the regular sudden enhancements on 89.7/91.9/94.1 from the Talconeston site in the UK. I must try and check out the airrcraft relection programmes to confirm they fit. Unlike M-S the signals do not show a high strength that then fades away - but quickly fade in and then out. No other signals are enhanced at the time.

On other occasions I have a multi frequency meteor burst which is un-mistakable and in among the reflections are very short range signals.

On 12/08/2017 I received this signal
https://app.box.com/s/9jb1x6j9ka8g06kgwthdii26qp0vemrm
https://app.box.com/s/9jb1x6j9ka8g06kgwthdii26qp0vemrm

The English sounds like it has a soft Irish accent which would make it RTE 2 FM. On a direct bearing it was 738 km and 307 degrees -

On this same burst I received the following stations mostly on a bearing of 101-103 degrees. So if it is RTE 2 it must be back scatter [think of the game of squash - bouncing the ball back off a wall] from a meteor trail that was 500-600 km away over central Europe

As my 5 ele aerial is only 5.5 m above the ground it has a high angle lobe at 25-30 deg and a low angle lobe at 5-15 degrees - so it would catch short range signals from the high lobe. It also means that any Sp-E signals I receive greater than 2250 km away are likely to be double hop - or very strong.as at a receiving angle of less than 2 degrees the radiation pattern shows very poor pick up. At my aerial height a reflection at 120 km from 2250 km would be received at an angle of one degree.

At 13 m above ground my aerial would have a strong low angle lobe at 2 - 6 degrees and and higher angle lobes at 12 degrees and 20 degrees.

Hi All,

Are all these stations carrying the same program? When looking at the language as per FMLIST, the program seems to differ from country to country.

Hit radio Portugal broadcasts local programmes, including Portuguese & international hip-hop music, but also newscasts & other contents required by law, all, of course, in Portuguese. Needless to say that carrying programmes in Arabic on the tx for Lisbon (106.4 Sobral de Monte Agraço) would be almost useless...

Best regards,
Luís Carvalho

Is this Arabic or something else? To my ears it also seems to have a slight Balkan intonation too.

As you can hear, the modulation is extremely low. Conditions at the time were pointing strongly towards Serbia and Bosnia.

Thanks.

The Cabo Verde option seems to vanish. I have followed the web streams of R. Crioula and Morabeza stations on saturday and found Crioula with exactly the same program I heard at the very same time. The problem is that there is no relay station of Crioula on 90.7 MHz. They have confirmed this via FB and sent the actual list of freqs. and sites used (differs a bit from those on FMLIST):

Island TX Frec. kW
Santiago Monte Tchota 88.5 3
Santiago Praia 94.9 1
Fogo Monte Barro 89.6 1
Sal Morro Curral 98.9 2
S.Vicente Mindelo 89.6 0,5

No Portugal, no Cabo Verde...

Hi friends,
I have here a mistery station. On June 10th during one of the intense openings to the Canary Islands I was receiving on 90.7 Holland FM (Playa del Inglés, Gran Canaria) with good signal. At 09'45 H-FM was quickly supplanted by another station in Portuguese. It sounds to me like one of the usual Brazilian preachers. Reception lasted for around 1'30", then Holland FM dominated the frequency again.
The problem is that there is no Portuguese station on 90.7 nor from the continent nor from the islands (AZR, MDR)... nor on FMLIST, nor in the ANACOM site. A longer shot to Cabo Verde offers a station on this freq.: Rádio Morabeza. But programing has nothing to do with what I received.
Some idea?...

ok, ok... the Cabo Verde path is open again!
There is only one station on 90.7 on the Islands: Rádio Morabeza.
I have followed their web stream on saturdays at the same time I received the DX station and I have only heard a musical program. I re-questioned Crioula FM if they know if Morabeza broadcast some programing from this "Centro de Ajuda" (C-d-A is a branch of Brazilian IURD, owners of TV Record and Record is the owner of Crioula FM). They have just replied positively. They have told me that Morabeza broadcast that same program at the same time I have heard the DX station and that programing from the C-d-A is on other CPV islands stations also. The question is why I have not heard this program in the web stream... Maybe they sent music to internet while the C-d-A program is sent to the FM station?... I have asked Morabeza also but no reply until now.

Hi,

One always cannot rely on these web streams. Take
for instance, I have had these couple of network
streams from Russia, I have not been able to
figure out. I have compared streams provided by
FMLIST sources and listenlive.eu, yet the
programming aired was quite else than the web
stream, even considering the delay possible say 2
to even 3 minutes, and considering them local breaks.

Interesting, Hannu.

My gut feeling was that this was Bosnia, due mainly to the propagation,
but I guess this one will remain a mystery. Thank you for your help anyway.

Best wishes.

John.

41569. Double Hop reception in 2017 (so far)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-21 20:24:40 UTC
From: davebunyan@...
Topic: 41569 Message: 41569
Attachments: 1 described; binary payloads are missing from this source WARC

Attached is a list of all my reception this year that is greater than 2500 km.

Countries involved are Israel, Lebanon, Jordan, Syria, Turkey, Russia, Libyan, and Morocco.

Reception occurred on nine separate days - and last at most ten minutes - more typically 1-2 minutes. I've still go a number of I/Q files to go through - so maybe something more is to be found. You will also note that they were all picked up after the event - either from recorded I/Q files or from scanning the band using SDR# with FMSuite and RDSSpy to log the RDS.

David

Very nice logs Dave. This certainly shows the advantages of using an SDR to play back files at one's leisure. I have had double-hop from Turkey, Israel, Lebanon and Cyprus this season. I'll have to see if I can collate a log.
One thing regarding the Libyan on 87.5: the tx for this station is apparently Misratah, not Benghazi. This is 2483 km from here, and is probably a long single hop. Good DX.

Nick, Whitchurch, Hampshire.

Topic: 41569 Message: 41575

Hi Nick, David,

What can one say. This past summer, as for douple-hops to me was sort of absurd. I still dabble with my Yamaha TX-530 of the year 1989, and I received arabic language broadcasts i.e. from beyond 3.000 km, on more days than for many years. Yet identifying them was painful, as them webplayers usually either did not exist or would not work. I have the SDRplay I bought for more than two years ago, but... I prefer DXing live. Besides, I could not get them softwares working, to me so much for the SDRplay.

What has been bothering me is, Spain has been very silent to me, for several years now. Them transmitters in Spain all are more than 2800 km away. Especially in the '90s it used to be a rule, every summer there was many days with excellent conditions from Spain, I even had this 93.5 MHz stored just for Spain conditions, while my tuner scanning the memory bank. Same goes for Greece, too: no more these booming-in GRC conditions, there used to be in the '80s and '90s. I suppose, this must have something to do with the climate changing, and them jet streams traveling different paths.

Mine, those very few identified beyond 3000km, this past summer:

02.06.17 1735z...88.30 ALG Radio El Tarf Oum Ali 36 3066km 2.5kW // web
14.06.17 0906z...91.90MHz LBN Iza'at al-Nour Baalbek 3066km // vocal ID
02.06.17 1712z...88.80MHz ALG Radio Annaba M'cid 3103km 50kW // web
02.07.17 0934z...91.80MHz ISR Galgalatz, Jerusalem/Eitanim 3299km 40kW // vocal ID
27.06.17 0722z...87.70MHz ARS Saudia Radio, Makkah 4496km 10kW // vocal ID

The 4496km ARS Makkah-tx is the 3rd furthest away QSO in current statistics, in Finland. She was easy to resolve, as the station IDed. During the same opening, I received this presumably ARS 4686km transmitter, yet I had no web stream to confirm.

Anyways, congrats to everyone, on their double-hops.

73, ilkka

Hi Nick and Ilkka

The info in the logsheet I posted came from FMList at the time of reception. I've gone back and checked and - as you pointed out - 87.5 in now saying "Misratah" 2406 km from here. The station on 102.3 - Radio ML is now showing as being in Sultan on FMlist (2760 km) but on Mike Fallon's database - as Benghazi. Mike's darabase also says "Misratah" for 87.5

David

41577. Bayern 1 or Bayern 3 ??

41582. Band II Sporadic E Alert!

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-25 12:22:24 UTC
From: chris.thatcher123@...
Topic: 41582 Message: 41582

Spain and Algeria being received at RDS levels here in Lincoln, UK.

Chris.

41583. Band II Sporadic E Loggings for 25 August 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-25 20:48:28 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41583

Hi All,

A very intense, top of Band II Sporadic E opening brought no less than 4 hours with excellent DX. The opening was wide spread at times, with in the first hours simultaneous reception of
ALG, MRC, E, I and GRC. The result is one of the best openings of the season towards Algeria and towards Spain, with many low power transmitters coming through. In total my logbook for
today is one of the largest for this year. Is it really almost September?

There are a few UNID’s, any help with these will be much appreciated.

I will be sending the loggings with two separate e-mails.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41589. UNID PI 5019 on 87.9 MHz

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-27 09:11:08 UTC
From: Guido Schotmans
Topic: 41589 Message: 41589

Hello,

On 25/8, I had a station popping up again and again between 1200 and 1230 on 87.9 MHz. PI was 5019, Partly PS was _??DA?? and RT was Onda.

Has anybody an idea who this is ?

73,

Guido.

41595. 94.3 UNID Belarus? mixing Poland - help please

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-08-28 09:29:05 UTC
From: nickgilly@...
Topic: 41595 Message: 41595

Hi all.

Just going through some recordings from June and discovered on 94.3 a station mixing with the main RMF FM signal on this recording:

https://app.box.com/s/loyyb7j91pngsmg63tyfc08ju2q0lp82
https://app.box.com/s/loyyb7j91pngsmg63tyfc08ju2q0lp82

It has a news/partial ID? at 1 min 30. I presume this is Belarus, and if so, would it be Lider FM?

Any help with this will be much appreciated.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

I listened to this station back in May 2017. PI Code was absolutely that of Modena 90 (584C) but I don't think the ID match. Hope you can help me. I have heard Radio Punto several times on 88.2. Tried to find an email address to Modena 90 withiut success.

The jingle id is the same as that which you can hear on the live feed from http://www.modena90.it/

To my ears it sounds like “Punto radio informe ancore punto radio.com solo la musica italiana”

info@...

is the email of this station, they seem to have lots of different promos/jingles as listened them over an hour. This jingle came after six or seven others, same style..

100% "Tanta radio e cuore.." and so on continues the jingle (no mention in it of Modena nor 90 but that it is..)

Hi Gert,

the jingle really says "Dalla radio al cuore, al cuore, Modena 90 solo musica italiana"
That means "From radio to hart, to hart, Modena 90, just Italan music".

Alessandro
Trieste, Italy

From: gertdx@... [SkywavesDX]

Subject: [SkywavesDX] Italian on 88.2 MHz

I listened to this station back in May 2017. PI Code was absolutely that of Modena 90 (584C) but I don't think the ID match. Hope you can help me. I have heard Radio Punto several times on 88.2. Tried to find an email address to Modena 90 withiut success.

Gert

Thank you Dario.

I have checked their home page and found their telephne number and street address but I am looking for an email address. They have an inactive account on Facebook, not used since 2013.

No, just the address you find in their website:
Via Nuova Ponente, 28
41012 Carpi (MO)

BUT in the same building
https://www.google.it/maps/place/Multiradio+Srl/@44.7820392,10.863648,3a,75y,20.01h,107.87t/data=!3m7!1e1!3m5!1srOUo0StZH4fnJNo2y7yWuA!2e0!6s%2F%2Fgeo2.ggpht.com%2Fcbk%3Fpanoid%3DrOUo0StZH4fnJNo2y7yWuA%26output%3Dthumbnail%26cb_client%3Dsearch.TACTILE.gps%26thumb%3D2%26w%3D86%26h%3D86%26yaw%3D17.27676%26pitch%3D0%26thumbfov%3D100!7i13312!8i6656!4m13!1m7!3m6!1s0x477f8cd53dcd7cd9:0x7b0166ce734098f1!2sVia+Nuova+Ponente,+28,+41012+Carpi+MO!3b1!8m2!3d44.7823476!4d10.8637533!3m4!1s0x0:0xfb8207a5dd8c2b92!8m2!3d44.7822601!4d10.8637498?hl=it
you have the main offices of Radio Bruno and Multiradio (advs company), you can try pubblicita@...

Alessandro

PS: of course I had to write "heart", not "hart" !

Hi All,

A big surprise to find an intense OIRT Es opening so late in the evening, so late in the season. The season has still not ended.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41610. Re:: UNID Arabic(?) 107.0

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-09-01 19:49:48 UTC
From: boskoigic@...
Topic: 41558 Message: 41610

It's someone reading a citation from Quran, first in Arabic and then in Bosnian. There are 2 stations from Bosnia on 107 - Velkaton and Radio Zos, although I don't know whether these stations air Islamic religious programming.

41611. Re: [SkywavesDX] Re:: UNID Arabic(?) 107.0

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-09-01 20:00:47 UTC
From: John Faulkner
Topic: 41558 Message: 41611

Thank you very much Bosko.

I couldn't progress any further with this station. It does seem likely
that it is Bosnian.

Best regards.

John.

Yes, it's Lider FM. I've just listened to their stream and I've heard the same jingle as in the recording.

41613. Sporadic E Loggings for 1 September 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-09-01 20:25:36 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41613

Hi All,

Today saw another HUGE Sporadic E opening, making it to the top of Band II and beyond. Together with a weaker evening opening this resulted in 5 hours with DX fun and 25 first time catches.
I have never seen anything like this in the month of September. If in June, this would still have been a very good day.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41614. 01 Sep 2017 double hop reception

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-09-01 21:36:03 UTC
From: davebunyan@...
Topic: 41614 Message: 41614

Once again as the opening faded out some double hop reception was logged. At 1200 UTC a few transmitters from R. Rossii were still present on 66-74 MHz, three of which had an echo on the signal - not only evident from the doubling of the pips on the hour, but also on the programme itself.

This is the clearest example - https://app.box.com/s/9nsxfxcj8o9jtmdo17nf120052clvkjt https://app.box.com/s/9nsxfxcj8o9jtmdo17nf120052clvkjt

The primary station is Kozlovtsy/RTPS 2202 km / 61 degrees. Transmitters received on other frequencies at 1200 UTC ranged from 53 - 63 degrees and 1900 - 2300 km approx.

So my gut feeling is that the weak echo is from Radio Rossii, Kuybyshev/RTPS (NS) at 4890 km / 53 deg rather than Aleksandrov Gay/RTPS (SR) at 3306 km / 74 deg. Either way a double hop signal - and even if it is the closer one it would be almost on the Kazakhstan border.

The FMList log is here - http://www.fmlist.org/fm_logmap.php?dat ... &omid=2414 http://www.fmlist.org/fm_logmap.php?datum=2017-09-01&omid=2414 - and you can the other double hop signals logged as well. Both possibilities are on there for the time being. Half an hour earlier Band II yielded a few signals from Lithuania and Finland in the same general direction - once I've fully checked the logs I will know if any other single hop stations on a bearing around 75 deg were present.

If anyone has any thoughts - that would be great.

David

41617. Re:: Re: [SkywavesDX] 01 Sep 2017 double hop reception

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-09-02 09:39:51 UTC
From: davebunyan@...
Topic: 41614 Message: 41617

Thanks for comment Jurgen,

When you say "locally generated" do mean at the transmitter? I went back ro 1129-1134 - another segment I recorded and the echo was there as well - at a constant level.

Another clue that the echo could be locally generated is that the program in the cack ground at 1129UTC is exactly the same. Russia was coming in on quite a few frequencies and on the run up to the hour there were at leas tthree different programmes and variations on Radio Rossii ids jingles - all coming together on the hour with pips and the deep male voice announcing "Radio Rossii".

In the meantime I've taken the entries oof FMList for this frequency

David

41618. Re:: 94.3 UNID Belarus? mixing Poland - help please

** Personal First

What a day! I was hoping there might have been some double hop in here,
but nothing noted. However, it was a stunning opening for low power
Austrian transmitters. In fact most of the opening probably focused on
areas I have not received before. No wonder there are so many personal
firsts in the log ... 167 in total!

There were also record hauls from Bosnia, Croatia, Poland and Slovenia.

As an experiment during the Scandinavian opening, I switched the antenna
to vertical. This brought in a lot of low power Swedish transmitters.
But low powers were the order of the day. Just look at those Austrian
gems! Powers down to 30 watts were received with good signals!

Signals were strong and plentiful throughout the whole opening,
resulting in a taste of Balkan soup in the evening.

Good DX!

Hi All,

A bit of a tropospheric lift today. Tropo? Yes tropo, I had almost forgotten about this propagation mode. A very poor year so far.
The closing of Fresh FM has cleaned up a small portion of the band, 95.5 – 96.0 MHz, which is interesting.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

From: Mauno Ritola
Topic: 41631 Message: 41631

TVLIST section of FMLIST doesn't have much info on VHF III band DVB-T usage worldwide. Does anyone have general picture or good source for it? And of course info from each one's individual country would be most welcome. Italy uses it and also here in Finland there is one operator (DNA TV). This is for a small usage research project.

Thanks and 73,

Mauno

Hi Folks,

Looks fantastic, everything a DXer wants, FM stereo, with RDS, AM and DRM including ability to connect external antennas. All that's missing is DAB/DAB+.

I wonder how much it will cost. (Just shown as xx).

I have seen a quote of $300 ($200 + $100 shipping). Presumably there will be customs charges on top of that, so it's looking quite expensive.
The screenshot showing various FM parameters looks interesting; it shows the current bandwidth as 262 kHz, which makes me wonder, can the IF bandwidth be adjusted? If it can, then it could be an excellent FM DXer. There's a similar screen for AM reception. Good DX.

Nick, Whitchurch, Hampshire.

Another product from the same company that plugs into a USB port (designed for car stereos but thought it will work with a computer)
Not sure where the interest for DRM came from on ths group. I don't think these products are SDRs.

Could somebody help me with this station, received during the Es of June 16th this year. It sounds like an ID at the beginning, but I do not understand it. I am guessing the language is Swedish, in which case it may be a local station from the Örnsköldsvik transmitter, going by the propagation path at the time.

Thank you.

John.

Hi!

That’s Radio Nyhem, a program on Radio Mullsjö. Radio Mullsjö is a small LP community radio in Mullsjö not so far from Jönköping in Sweden.

The dialect is from western/southern parts of Sweden.

Do you have the frequency, John?

Thank you for your speedy reply Chris.

The frequency was 89.8. There is no entry for this station in FM List.

I am extremely pleased with this catch!

Good DX!

John.

Hi!

89,8 at that time was community radio in Örnsköldsvik.

Radio Örnsköldsvik 500W ERP

68•18’09N 18•39’39E

Thank you for your speedy reply Chris.

The frequency was 89.8. There is no entry for this station in FM List.

I am extremely pleased with this catch!

Good DX!

John.

Could somebody help me with this station, received during the Es of June 16th this year. It sounds like an ID at the beginning, but I do not

understand it. I am guessing the language is Swedish, in which case it may be a local station from the Örnsköldsvik transmitter, going by the propagation path at the time.

Thank you.

Hi John,

”Radio Nyhem” a religious station that was active in June in the Jönköping area.

They might use different local transmitters/frequencies in the area.

You can search google with – Radio Nyhem

http://radiomullsjo.se/

41649. Tropo, random thoughts

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-09-30 21:47:53 UTC
From: ilkka suni
Topic: 41649 Message: 41649

Hi folks,

SOME OF YOU PROPABLY noticed, this past week there was rather heavy tropospheric conditions over Finland. I cannot recall similarly strong and long lasting lift for at least four to five years back.

Some listeners in Latvia and Poland reported huge distances. Was it 1759 km, this listener in Warsaw, Poland, logged the distance to the YLE Rovaniemi transmitter. Also, this listener in Latvia reported his furthest ever tropo catch from Finland, close to 1200 km. I would not know whether they read this forum, anyway, my sincere congratulations to them upon their catches.

The most dense high pressure concentration kept inconveniently close to me, so my band was rather blurred by them locals. The only one worth mentioning I got, was this Sveriges Radio 300-watt transmitter in North-Western Sweden, 760 km away, was it roughly +110 dBm, rising from the supposedly -83 dBm level, up to s5.

Strange enough, Finland only by now experienced her "summer". All summer there was no strong high pressure over Finland, and not until now did the summerish high pressure arrive, originating from the Middle-East. In Finland, this past summer was the coldest - and shortest - for the last 40 years or so. Of course, to us listeners them July fantastic Es conditions to some degree compensated the early summer chilly as heck.
.

RECENTLY, I HAVE been back to the OIRT band, as I have been having up to my lost hair enough of the FM band, overcrowded with locals and partly by russian stations, too, as I live just some 10-15 km from the border with Russia. I have not been actively monitoring the OIRT band for 30 years, and I find the sort of silence on the band rather refreshingly relaxing.

During last week's conditions I noticed, my 8-element horizontal works sufficiently enough for the OIRT band, too. The 8-ele yagi for instance brought in these 10 and 17 kW transmitters from 790...800 km away, in Minsk and Moscow. On CCIR-FM, while practically duct, this 10 kW vertical from Moscow on 92.4 MHz, to my horizontal yagi boomed in for hours. Since late '90s and the storm damage to my 8-element vertical, I only have this 8-element horizontal, been too lazy about getting a new, proper vertical antenna. Then again, the band nowadays is so stuffed with locals, pretty much nothing interesting is likely to push through as vertical.

As I have experienced also earlier, duct often strangely carries just a single frequency from the very transmitter.
.

THE WAYS DUCT DIES. This 92.4 MHz Radio Dacha, 10 kW vertical from Moscow, blasted in for hours. And then, the duct died. In just 20 seconds or so, the signal faded away from level s8 down to see-you-later, some day.

I can recall even more drastic fade-outs by duct. Take for instance this 95.7 MHz PR1 Gdansk, Poland, three years ago. The 120 kW transmitter from 960 km away blasted in at level s9, for couple of hours. In the end, for almost 5 minutes, the signal kept jumping up and down, from level s9 to s0, as if a switch was keeping turned on and off, until the signal finally was totally out. I already suspected there was something wrong with my tuner, or the antenna cable possibly was damaged, or contact issues with the balun. But it was just duct, acting its ways. Later on I felt stupid and sorry, I had not taped the incident, this rather exemplary duct fade-out.

Anyways, Good DX!

73, ilkka

Good evening illka , you can watch the data recorded by the radio probes. In oservbant the inversions of temperature between 0 and 300m of altitude. Taking a survey station near you and close to the dx you made. for example I see that on the station located in Joikioinen there are for the readings of 30 September? 00h UTC of the multiple inversions of temperature (3 counts).

Hi Ced,

Thanks a lot, for your referring to a most interesting site. Must admit, I have to put my thumb in my mouth for a while, with this data and site I am not familiar with. Some years ago, a fellow listener who had been working at the Jokionen base, tipped me of a similar database, but it was not this one.

Of them radiosondes, an anedcote. It was in the '60s, in a nearby field I discovered this odd metallic box, with literally strings attached to it. Also, some sort of rubberish remains to them strings. I wondered whether the object had fallen from the sky, and what on earth it could be. I quickly ran to my friend's, "Come, have a look what I've found". The gadget roughly was the size of... say one third to half of a cassette tape deck, with some sort of antennas or whatever, sticking out of it. Me and my friend felt excited, as this almost appeared an object from outer space, yet we could not figure out what to do with it.

The shiny box in versal letters announced "VAISALA", and there was also writing in smaller letters, if I recall right it was in English. We took the from-outer-space-gadget to my parents, who interpreted the writing, asking the finder to return the gadget to a certain postal adress. Recall I right, the sticker on the gadget promised a reward to whoever sends the gadget back to the Vaisala Group. My parents sent the gadget back, and the reward, 30 finnish marks was a huge amount of money to me and my friend, in today's currency it stands for just 6 euros, but back then it was big money for kids of 6.

I have not seen a similar radiosonde landed, ever since. Many of us propably know, this Finland-based Waisala since has been and even nowadays is one of world's leading [hardware] providers for meteorological institutions and such. Back in the '60s, I never could have imagined these radiosondes in the future might provide relevant information, in my FM-DX hobby.
https://www.vaisala.com/en/corporate/organization/vaisalaworldwide/Pages/default.aspx

So much for the Vaisala Group, and radiosondes. Must do some digging into the site you delivered, Ced. Thank you!

41659. More interesting Swedish DX from 19-06-17

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-02 10:22:49 UTC
From: John Faulkner
Topic: 41659 Message: 41659

Two interesting catches from June 19th, both identified this time.

https://vimeo.com/236340832
<https://www.google.com/url?q=https%3A%2F%2Fvimeo.com%2F236340832&sa=D&sntz=1&usg=AFQjCNFwIn0ffwvNavGQLRL_Ojc123jHhQ>A
30 watt outlet of SR P3 on 93.4. This was the only SR P3 on the
frequency, so no ambiguity regarding the site on this occasion.

https://vimeo.com/236339988
<https://www.google.com/url?q=https%3A%2F%2Fvimeo.com%2F236339988&sa=D&sntz=1&usg=AFQjCNGd61Z038ksudGQ7SPyn5-u4GSqFw>This
is Pite FM from Piteå on 92.8. What was unusual about this was the odd
PI code, 0F9E. I assumed this was a spurious guess by RDS Spy due to the
weak signal, but it was in fact correct! This is different from the
listed E037 PI code. The PS name gradually revealed itself in full via
the Group Analyzer, but it took several minutes, longer than this short
video will show.

A few more files remain from June 19th, so hopefully there will be more
catches like these.

Good DX!

John.

41660. Ukraine on 95.4 MHz

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-03 06:26:44 UTC
From: gertdx@...
Topic: 41660 Message: 41660

Some time ago I heard a station announcing Serebryanyi Dozhd on 95.4. I found that it was listed on 95.4 from Ozerk Russia so I wrote them a report and received a very detailed reply. Among other things it says:

.....

2. The recorded passage is an ad unit. Unfortunately to establish on which radio station it went out is impossible

3. It really mentions the name of our radio station, but as an advertising clip of a lecture, which was supposed to be read by a person who used to work on our radio station (that's why our brand is mentioned there)

4. Radio station, which you managed to catch, quite accurately broadcasts in the city of Odessa (Ukraine)

....
I can't find any station in Odessa or Ukraine listed on 95.4 MHz so it puzzles me. Any clue someone? Perhaps a station in nearby Moldova/Tiraspol?

Hi,

On 95.4 MHz Pershe radio FM1 is broadcasted from Izmayil, which is in the Odesa province. This tx should be added to FMLIST UKR.

Some very nice logs there Paul.

Here it was almost all France yesterday, right down as far as Perpignan on the Mediterranean coast. Hornisgrinde was the only German tx logged.

From memory this is the haul of the more interesting txes heard:

Pic du Midi
Ussel-Meymac
Lyon
Millau
Le-Puy-en-Velay
Clermont-Ferrand
Nantes
Guéret
Carcassonne
Angers
Bourges
Aurillac
Tours
Parthenay
Troyes
Orléans
Niort
Hornisgrinde
Perpignan
Argenton-sur-Creuse
Bergerac (didn't get to record this one)
Saint-Lô
Paris

Lots of recordings to upload now which will probably get done over the weekend.

Good DX.

Nick, Whitchurch, Hampshire.

Virtually all France during this tropo, with Hornisgrinde being the only German tx logged. The duct at best extended all the way down to the Perpignan/Pic Neulos transmitter right by the French/Spanish border.

41670. Interference from neighbours flourescent strip light - RFI question.

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-12 20:27:10 UTC
From: Paul Logan
Topic: 41670 Message: 41670

Hi all,
over the last while I have been getting a lot of interference at MF and HF but a few nights ago it's level went through the roof.
I have located the problem as being in a neighbour's home, the culprit being some fluorescent strip lights.
There are two 48 inch strip bulbs in the installation and one seems to have been nearing the end of it's life and packed up the other day.
Since then the interference has been awful.
The neighbour has kindly agreed to work with me to resolve the problem, so my question is, are there any kind of strip lights which are unlikely to cause any interference to the radio spectrum?. The guy is happy enough to change the lighting.
I'd be happiest if he got rid of the lights altogether but could live with him replacing the dead bulb and that solving the problem. Although at this point I have no idea if that will cure things. Not sure if it has been a problem with a bulb breaking down or something in the actual body of the fixture.

If anyone can make any suggestions as to what we might install to stop the possibility of a repeat - or offer some explanation of what has gone on - that would be most helpful.
thanks in advance,

Paul Logan, Lisnaskea, N. Ireland

hello Paul, it's possible to use a battery instead of the power supply.
I had the same problem and it was the poor quality power supply that was
the source of the problem.

You can check connectors also.

Good luck

41674. Band II Tropospheric Loggings for 15 October 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-15 21:25:04 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41674

Hi All,

Band II tropospheric conditions today were similar to yesterday. Yet with greater intensity and more widespread. A nice DX day, with the band being open around the clock.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Sunday 15 October 2017

41675. Re: [SkywavesDX] Band II Tropospheric Loggings for 15 October 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-15 21:53:34 UTC
From: John Faulkner
Topic: 38927 Message: 41675

It's not over yet. Sweden now coming in here. 97.0 Horby.

Good DX!

John.

41676. Band II Sporadic E Loggings for 16 October 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-16 20:25:51 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41676

Hi All,

Today in the early afternoon I wanted to check Band II for some tropospheric DX. Very surprised to find a few weak Italian language stations at the bottom of the band. This appeared to be the start of a BIG Band II sporadic E opening, lasting four hours with the MUF occasionally making it well beyond 108 MHz.
All this was happening while the temperature outside was no less than 25 °C. It can’t possibly be October….

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41677. Band II Tropospheric Loggings for 17 October 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-18 06:47:45 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41677

Hi All,

Some very nice Band II tropospheric ducting developed yesterday evening. A surprise, since the forecast did not show a lot to be expected.
Maybe the pollution drifting in from Southern Europe had something to do with this. The sky produced a very unusual display during daylight.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

Hi all.

I'm going through my recordings from last weekend and have an UNID received on 87.5 via a teasing bit of E-skip. I thought it was Italian but playing it back now I'm not so sure:

https://app.box.com/s/00j4ntznfz6tvdy070suxvedrdrg30px
https://app.box.com/s/00j4ntznfz6tvdy070suxvedrdrg30px

Can anyone ID the language being spoken please?

Thanks and good DX.

Nick, Whitchurch, Hampshire.

Moi Nick;) typical post that nothing mentioned where condx were directed to, any other stations around that time around? pureItalians would not ever be that kind of sloppy talk, more like Maghreb counties, or bit of Turkish. Definitely not ITA. I'd say arab, then turkey.

while in between watching the English Open snooker and this morning NFL game
cheers Nick,
Hannu

Thanks Hannu. There was nothing else around as far as I know. From what I remember the maps were showing an Es cloud to the SE over the Mediterranean. Maybe it was the Libyan, although it doesn't sound like the Quranic programming that they have had in the past when I have heard them.

Too bad a burst of static interrupts about half way through.

Good DX.

Nick, Whitchurch, Hampshire.

Topic: 41687 Message: 41687

Hi folks,

Just to remind, the Orionids meteor shower is peaking this weekend. Not a major shower, yet to me the Orionids has often served some very nice slides.

The radio maximum to us in Finland just might be starting, right as I am typing this. I am not sure of the radio max, though, as I was not monitoring yesterday.

Go, get'em rocks, folks!

Hi Nick,

Listened to your clip, over the headphones, and it doesn't sound Arabic to me. The audio is not so crisp, there also is some sort of "processed digitally" effect to the audio. Is this by Sony XDR, or an SDR gadget?

You might load the FMLIST 87.5 MHz base, sorted by language, and start ruling out languages the clip definately is not. Take a listen to streams from Kyrgysztan, hi. This would make a double-hop, though. Honestly, I cannot make the language out of it, having listened to the clip twice. Alessandro is very skilled with this sort of languages, hopefully he can resolve the quiz.

Always when DXing live, it is most useful to check for the current DXmaps situation on 50 MHz.

Thanks Hannu.

This was using the RBRX Encore receiver which uses DSP and adaptive noise reduction like the XDR. The settings were optimal for making the most of very weak signals.

It's a bit of a mystery so far. Hopefully someone else will recognise the language.

Good DX.

Nick, Whitchurch, Hampshire.

Thank you Ilkka.

I recorded overnight.

Just running File Analyser and I can see frequent bursts, but as you say, there's nothing major about this shower.

Hopefully some new catches in here today.

Good DX!

John.

Spanish has been suggested and I think this is the most likely possibility, perhaps with a regional accent. Certainly several words do sound like Spanish after careful listening. Good DX.

Hi Nick,

I think Mauricio could confirm it’s not Spanish or other local languages (Catalan is very similar to Friulano spoken in my region).
I hear just “historia” sounding like a Spanish or Italian word, at the beginning of you rec.

Date: 2017-10-24 23:21:42 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41705

Hi All,

Band II tropo developing this evening, with some solid signals from France. Let’s see if tomorrow has some surprises.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

An excellent piece Jurgen. My first TVDX was from Australia in 1966: ATV0, Nunawading, Melbourne. Later ABC Channels 2 in Sydney and Hobart were regulars. The other channel 0 that was a regular was the ABC from Wagga Wagga, New South Wales.

FWIW... straight from the owner of the http://www.hobbyradio.se/en/drm/gospell_en.html page. Which means we are most likely to end up with the fixed bandwidth of 262kHz on FM, and 4;6kHz on MW/SW (in AM mode)...

On Wed, Oct 25, 2017 at 10:44 AM, “Terje” wrote:

Hi Leo,

Unfortunately, the answer is no.
The chipset in my GR-216 is from NXP. I have not read all the details of what is possible to change in the settings.
When listening to short wave (or AM in general) there is no problems with adjacent channels (except for China who seems to use ±6 kHz bandwidth in general.

Best regards,
Terje

41711. Unidentified Swedish Local Station Via Orionids

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-26 09:19:43 UTC
From: John Faulkner
Topic: 41711 Message: 41711

https://youtu.be/uzWfPnIIqAc

This PI appeared repeatedly on 107.0 during the Orionids. I thought it
was a rogue to begin with, but it was so consistent that I assume it
must be genuine. Both PI detectors agree too. Does anybody know who this is?

Thanks.

John.

41712. Unidentified Catholic or Radio Maryja Relay Via Meteor Scatter

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-26 09:22:36 UTC
From: John Faulkner
Topic: 41712 Message: 41712

I have what *could* be an unidentified relay of Radio Maryja on 103.1,
but I suspect it is more likely to be somebody else, like Radio
Katolickie Rodzina. My questions is, does Radio Katolickie Rodzina relay
Radio Maryja? This was heard at 0518 on Sunday 22-10-17.

If it's not a relay, I can say that the same prayers were heard on 103.1
and 107.2 (which had RDS: 3232 etc.) so maybe both stations were just
carrying the same church service, as opposed to 103.1 being a direct relay.

Thanks.

John.

Hi John.

I can’t find the PI code but if I analyze the music I’d say NRJ Sweden.

Either Hudiksvall, Umeå or Kalmar/Emmaboda.

/Christian

Thank you Christian.

So maybe NRJ.

I can't rule out this being a rogue PI code. Sometimes rogues have a habit of being VERY persistent, but when they appear over and over again, you assume they must be correct.

We have to keep an open mind about rogue PIs.Take Spain as an example. So many incorrect PI codes that we have to check them to be sure. Some don't seem to follow any logic at all. I know Sweden are very good at keeping the codes in order. I remember there was one which seemed incorrect though. I wish I could remember which it was.

Thanks again and good DX!

John.

Hi John,

Could you maybe type the PI code. Somehow the resolution of the video is such that the PI code isn't readible.

73

Janpeter

Aan: skywavesDX@...
Onderwerp: [SkywavesDX] Unidentified Swedish Local Station Via Orionids

https://youtu.be/uzWfPnIIqAc

This PI appeared repeatedly on 107.0 during the Orionids. I thought it
was a rogue to begin with, but it was so consistent that I assume it
must be genuine. Both PI detectors agree too. Does anybody know who this is?

Thanks.

John.

Not Fm but...
anyone have difficulty getting SDR Console (V3) to run with the Perseus SDR?
Any help or direction would be great.

Paul Logan, Lisnaskea, N. Ireland

41724. Radio User-March 2015 Article on FM DXing

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-29 01:01:25 UTC
From: Les Rayburn
Topic: 41724 Message: 41724

Trying to order a back-issue of Radio User magazine from March 2015. Hoping specifically to obtain a copy of an article by Mark Richards about “FM DXing-Starting from Scratch.”

Any chance that someone has an old copy they’d be willing to sell, or perhaps a PDF scan of the article?

41725. Band II Tropospheric Loggings for 31 October 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-10-31 22:16:26 UTC
From: Janpeter van Dijk
Topic: 38927 Message: 41725

Hi All,

The tropospheric Band II DX that developed today in the afternoon, became much more intense than what I expected based on the forecast maps. More remarkable was the rain during the first two hours of this session. Not some light drizzle, but a steady moderate rain. While the DX signals became stronger and stronger. Very odd.

Best regards,
Janpeter van Dijk, Zoetermeer, The Netherlands

41727. INOVANTENNA 8 Element FM Beam …Need Info plea se…..

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-11-02 14:30:59 UTC
From: Robert Ross
Topic: 41727 Message: 41727

Hi Guys:

Is anyone here on the list using the INNOVANTENNA 8 Element FM Beam made in the UK???

If so, any comments on Performance, Durability, or any info would be most welcome.

I need something relatively Small and this antenna looks to be just about perfect size wise, and looks to be quite well built!

I am located in CANADA, so I believe it would have to be shipped here from the UK, as I don't think there are any distributors here in CANADA or the USA??? Is that correct??

Thanks for any insight anyone can offer regarding this FM Beam!!

Regards……..ROB VA3SW

41729. UNIDs from Spain

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-11-03 11:37:05 UTC
From: Arvid Frøsland
Topic: 11945 Message: 41729

Hi all

This Es season had several good openings to Spain, especially at the beginning of June, and at the end of July.

I would appreciate if anyone might be able to help me with a couple of unidentified stations:

1) On 107.3 MHz I have an ID of Aragon Radio. But they don☐t use this frequency! Also, the station gave a PI as A222. It might be a ☐fake☐ PI, but both my detectors came up with it. ZFM from Zaragoza is listed as inactive in FM-LIST, but they announce 107.3 as their frequency on their web radio. So they must be on air again. Any comments? Here is the recording: https://app.box.com/s/qfyp3kj91o6hhl0vimjvpwk0bmgkvjjd The date is June 4th, and 1005 UTC.

2) On 107.9 MHz a Spanish station came up with PI=E401. This happed twice during the opening on 2nd of June. I got no ID, unfortunately. Any ideas?

3) PI=E4EE was found on 107.5 MHz. This PI is used by Onda Cero, but I can☐t find any station listed.

4) A German speaking station with religious program was heard on 107.0 MHz on the 4th of June. Does Radio Adventista from Ibiza have programs in German?

Thanks a lot for your help.

1. It is Aragon Radio. There is a clear ID and mentions of Alberto Guardiola who is a presenter.

Topic: 41727 Message: 41733

Hi Robert

I don't have that antenna but I am also thinking of getting the same antenna from innov and would like to know if you find out anything. I recently bought' and had shipped, a 14m vertical for HF use, also from innovantenna.
It's quite a good radiator; no traps; well made, and sturdy. It stayed up in the recent hurricane Ophelia a few weeks ago; with winds about 100 mph. It flexed a fair bit; but still standing and didn't get bent or break. My site is about 100m ASL. So as for the HF side of things, innov antenna appears just fine. Let me know if you go for the 8 element for band II. It would be interesting to find out more about these antennas. I'm thinking of purchasing an H-frame and putting up four

41734. Tropo loggings/recordings from 31 Oct/1 Nov 2017

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-11-04 15:02:24 UTC
From: nickgilly@...
Topic: 41734 Message: 41734

This was the best tropo of the year so far here. What was most remarkable about it was the strength of some of the signals, with Caen, Le Mans, Lille and Dudelange all reaching > 50 dBµV! To put that into context my signal from the big Rowridge tx is around 60-63 dBµV.

Recordings from this tropo here:

https://app.box.com/s/tz4cvoeemkphuhyrdy3zborfvb4ng30z

Thank you, Stuart, Pedro and Juan Antonio!

It was pretty obvious that the Aragon Radio program was relayed by another station. I was a bit in doubt whether it could be ZFM, as it was the only Aragon station listed. As you, Juan Antonio, also provided the documentation for the cooperation between Aragon Radio and Onda Local Gallur, this must be the one! Thanks a lot. This would probably mean that Onda Local Gallur has the PI code A222?

Regards

Arvid

Interesting log!

I think your station is Onda Local Gallur, from Gallur, Province of Zaragoza relaying Aragon Radio.

I enclose a link that shows the collaboration agreement between both stations:

http://www.elperiodicodearagon.com/noticias/la-cronica-de-ribera-alta-del-ebro/onda-local-gallur-red-radios-locales-aragon-radio_589286.html

Congratulations!

---

1) On 107.3 MHz I have an ID of Aragon Radio. But they don’t use this frequency! Also, the station gave a PI as A222. It might be a “fake” PI, but both my detectors came up with it. ZFM from Zaragoza is listed as inactive in FM-LIST, but they announce 107.3 as their frequency on their web radio. So they must be on air again. Any comments? Here is the recording: <https://app.box.com/s/qfyp3kj91o6hhl0vimjvpwk0bmgkvjjd> https://app.box.com/s/qfyp3kj91o6hhl0vimjvpwk0bmgkvjjd The date is June 4th, and 1005 UTC.

Hi Arvid,

Upon checking about one zillion PIRA files I found that on the trip from Vitoria to Zaragoza, as made by Fabrizio Carnevalini on October 6th, 2017, at 13:02 the PI A222 was caught on 107.3 MHz, with the partial PS code of GALLUR__

So this confirms that you indeed received Onda Local Gallur. And this proves once more that Fabrizio's dedication (he drove thousands of kms in Spain, France and Italy to catch RDS codes) pays off for all of us DX-ers.

73,

Janpeter

Hi Janpeter

Thanks you very much for your help and the effort in checking the PIRA files! That settles it, Onda Local Gallur has the PI code of A222.

A special thank you goes of course to Fabrizio Carnevalini. Without his journey, my logging would have been unidentified.

I suppose the editors of the Spanish section of FM-List will add/correct the entry.

Thanks again,

73

Arvid

Hello!

My Sony XDR-F1HD is broken.

XDR-F1HD’s display is always dimmed.

One year ago had the same problem and was a broken n-mosfet transistor BS170.

I've removed all the XDR-I2C modification and XDR-F1HD's display is dimmed.

There is anything in the display (Time or "wait")

Do you have any idea?

Thank you

Miquel

** Personal First

A great morning of Spanish Es! Spain has always been one of my least favourite countries to DX as I always seem to receive the same transmitters. This time, I was determined to hear something different and so I rotated my antenna into the vertical plane. What a difference it made!

127 personal firsts today too!

Good DX!

Hi John,

A very impressive logbook. Sometimes (not always) v-pol works better than h-pol with Es. I don't know why.

For me not an option, with everything local being vertical polarised.

Do you have the PI for this one?

Hello Janpeter.

I don't have the PI for La Maxiradio. I obviously overlooked the empty PI field when I logged this. But I have discovered something else, thanks to your post. I checked the RDS Spy Log to find the PI code, knowing that it should have stored automatically, but it seems that the RDS Spy logging mechanism (Meteor Scatter mode) had been disabled, so no RDS data has been logged for ages. Grrr! I have re-activated this but it still won't work. Not sure why.

Regards.

John.

41750. Partial sign off of analogic FM (South Tirol/Suedtirol/Alto Adige)

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-11-15 14:43:58 UTC
From: franco289@...
Topic: 41750 Message: 41750

Hello everybody,

yesterday, the board of the government of Autonomous Province of Bolzano/Bozen has approved the two-year plan for signin off some FM outlets (owned by R.A.S., the public body for radio and television in that province who relays Oe1, Oe2 Radio Tirol and Hitardio Oe3 in Band 2 for German speaking people in that territory) for the rest of this year and for year 2018.

An amount of 41 frequencies from 13 different outlets is concerned by this resolution, in the areas of that province where DAB+ can serve the whole population with a firm signal.

Here is the official announcement in RAS website (in German language: https://www.ras.bz.it/de/digitalradio-weiter-ausgebaut-ukw-abschaltplan-der-ras-von-der-landesregierung-genehmigt/ https://www.ras.bz.it/de/digitalradio-weiter-ausgebaut-ukw-abschaltplan-der-ras-von-der-landesregierung-genehmigt/ in Italian: https://www.ras.bz.it/it/copertura-capillare-dab-spenti-i-primi-impianti-radio-fm/ https://www.ras.bz.it/it/copertura-capillare-dab-spenti-i-primi-impianti-radio-fm/).
You can also find there a map of the outlets that are going to be shut down after this resolution.

73's
Franco

41753. [MS] Silence of the Leonids

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-11-16 21:58:24 UTC
From: ilkka suni
Topic: 41753 Message: 41753

Hi folks,

The Leonids will be peaking early this weekend. Started monitoring
the Leonid meteor shower just a couple of days ago, and all I can say
is, rather quiet so far. The shower also has been predicted not to be
that active, this year.

I quite can't figure why, MS in all has been rather disappointing
this autumn. Then again, I have not been monitoring MS too actively, this year.

In Northern Finland, there was an exceptionally bright and long
lasting meteor incident reported this evening, with a series of
banging sounds. Wish I witnessed one, some day. I never saw a meteor
big and close enough to blast into pieces, with a bang. I can recall
having twice [in 1998 and 2014] seen a bolide
https://en.wikipedia.org/wiki/Bolide
though, a big fireball, yet they made no sound. Those took place in
the summer time, both.

Anyways, folks, have it on the rocks!

73, ilkka

Hello Ilkka.

East some liver and fava beans, washing it down with a nice Chianti. It helps! (Makes strange sucking noises!)

Leonid activity might have just taken off. Speaking to Andrew Webster in Wigan this evening, he told me there was a fair amount of MS activity this morning. So, I just recorded an hour of the bottom of the FM band and can report some fairly spectacular bursts. So it might have begun. The burst at 22:57:24 was strong and lasted for almost five minutes!

I will be recording this coming morning around sunrise. As usual, I will be recording vertically and towards the north-east.

I have seen a few bolides here over the last few years. The most recent one was about this time last year when the clouds sky lit up brightly mid-evening while out walking the dogs. You could see that it was a fireball, trailing slowly across the sky, fluctuating a little in brightness. No sound and lasting three or four seconds.

So maybe we could be in for something good this year. Predicting showers and storms is never that reliable and major peaks in these things can come unexpectedly. We have a VERY clear sky this evening with a slight frost.

Good DX and clear skies!

John.

Oh don't bother. YouTube has blocked the video due to a copyright claim
from a certain Mr Sibelius.

Christ on a flipping bike!

John.

I beiieve, the Mr Sibelius you refer to, is this one:
https://en.wikipedia.org/wiki/Jean_Sibelius

Then again, I wonder who in the Google//Youtube staff that snappy recognised the very composition. Furthermore, I suppose copyrights are well past.

Box.com
https://www.box.com/
for instance, is a handy way to present audio demos. Comes to Yotube, I cannot figure how come one should wiev... whatever, when it is about an audio clip.

73, ilkka

The very same Mr Sibelius! I used to enjoy listening to his music when I was much younger ... until I discovered rock music.

As we know, YouTube is a law unto itself, as are all these large corporations. Box is good and I have been using it for years. But I tend to prefer using YT and Vimeo for my DX videos these days. As I have probably said before, I see these videos as a kind of QSL. The video would have also demonstrated just how intense that meteor burst was. I couldn't use Vimeo for this video as the file size was too large. Box has a a 25 MB limit too (if that's what it still is).

I just looked into *trying* to file a dispute against this YT copyright claim. The question is, do I want to waste my entire day trying to do so? (As I did yesterday with an Ebay issue - they thought they could decide the selling price for me!) The end result will be one of failure. I have complained to YT before on a few occasions, but you only ever receive a standardised reply. Their dispute process seems impossibly complicated now. Today, I was re-directed to page after page, only to end up somewhere irrelevant.

At least I discovered that I do not have any 'Copyright Strikes' against me. That in itself is odd as YT told me only recently that I have TWO such strikes. I guess they lost them. This just further confirms just how flaky YT's system is. It's a free service though and should we complain? YES! Unquestionably. But we have to balance the time taken messing around doing this against the getting on with our lives in the real world.

Anyway, I now have five one hour files recorded this morning and I will be starting the process of checking the bursts immediately. Have to day, the first hour 0400-0500 was unproductive. Maybe the Leonids are an evening shower.

Good DX!

John.

This morning's commute was to Sibelius 5th Symphony.

The drive home was to Never Mind The Bollocks, Here's the Sex Pistols.

I still enjoy both!

I guess the only violent bit in the former is the six hammer blows at
the end....

At 23:58 16.11.2017, I wrote:
><<<<<In Northern Finland, there was an exceptionally bright and long
>lasting meteor incident reported this evening, with a series of
>banging sounds...>>>>

IT APPEARS, THE METEOR - or a small asteroid
rather - on Thursday evening, truly was an
exceptional one. URSA, the astronomical
association of Finland, after having viewed video
clips on the incident claimed, this bright and
powerful bolides only occur maybe once in 10...15
years over Finland. They estimate, the object
presumably was about one meter in diameter, and
tens or possibly even 100 kilograms of rocky
remains made it to the ground. Check out these videos:
http://www.maaseuduntulevaisuus.fi/ympäristö/artikkeli-1.213857
https://www.is.fi/kotimaa/art-2000005454497.html

Luckily, the debris got scattered in the wilds.
Was it last year, in Mexico there was an
incident, a man traveling in a bus got killed, as
a meteorite smashed through the window, hitting the unfortunate guy.

This Leonids, not much to mention, on my radio.
Still, the [HOL] Sublime FM 0.83 kW vertical
transmitter on 88.8 MHz was a nice surprise, this morning.

Sky News just referred to the incident, with a video. They stated,
the bolide lighted up the sky, like a full-moon a hundred times. This, I doubt.

There are several videos of this on the internet. I found an interesting amateur mini-documentary about this this morning
https://www.youtube.com/watch?v=de12EvbaUf0

It's not the only large meteor reported over Finland recently.

Overall, radio-related meteor activity was poor. My logs can be found here:

http://skywavesdx.org/viewtopic.php?f=72&t=4165

http://skywavesdx.org/viewtopic.php?f=72&t=4164

Good DX!

John.

Onderwerp: Re: [ICDX-TVFM] Record Es: Philippines FM received in Numeralla today

Hi folks,

The video of this reception, now confirmed as 92.3 MHz DXWT Davao City:

https://www.youtube.com/watch?v=ROTRvb7n06o&t=13s
[https://i.ytimg.com/vi/ROTRvb7n06o/hqdefault.jpg]<https://www.youtube.com/watch?v=ROTRvb7n06o&t=13s>

92.3Mhz Philippines on FM! DXWT Davao City<https://www.youtube.com/watch?v=ROTRvb7n06o&t=13s>
www.youtube.com
Wow - an amazing 5,435km from Numeralla to Davao City Philippines. I was receiving ChA5 (77.25) at S4 strength when I started checking FM & this 92.3 popped ...

Regards,

Will.

It's a record Es distance on Band 2 for Australia, but Mike Fallon's reception of the Dominican Republic on 88.7 is the world record distance at 4302 miles/6924 km.

It's certainly amazing FM DX!

Good DX.

Hello Miquel,

i have a suggestion for you; unfortunately it doesn't seem a Es reception.

In the short recording you've done, you can hear "c'è più gusto ad essere italiani" (something like "Being Italian is more enjoayble").
After a small research in the web, I have found that this is the claim of Radio Venere 2 (broadcasting on 100.2 from Sassari/Monte Oro).

http://radiovenere.webs.com/radiovenere2.htm http://radiovenere.webs.com/radiovenere2.htm

Many 73's,

Franco

Geminids meteor shower from parent object 3200 Phaethon asteroid peaked on December 13 during
the 1530 UTC with a ZHR rate of 97. The prediction was 120.

The majority of analog FM radio stations received via MS was from south-eastern or south-central
Ontario, Canada region. No digital HD Radio in-band on-channel (IBOC) using OFDM modulation was
decoded.

No digital ATSC television stations were detected via MS on any of the three bands.

41791. Airspy HF+ SDR Reciever

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-12-24 17:16:26 UTC
From: Jim Smith G0OFE
Topic: 41791 Message: 41791

For the past few months, there has been much talk about the Airspy HF+ SDR reciever, covering 0-30Mhz and 60-260Mhz approx.
http;//www.airspy.com

My Airspy HF+ arrived on Friday.

Time to experiment has been somewhat limited, but have had a bit of time today.

First impressions:

It is certainly more sensitive than the Elad S2 barefoot, and just a touch more sensitive than the S2 and the Fringe preamp I use with it - but without the overload. The Elad overloads slightly especially at the bottom end when I beam towards Rowridge - that is a bind during the Es season.
It is also just as sensitive as the Perseus FM+, but that overloads here with some very strong artifacts on some frequencies.

The Airspy HF+ has the sensitivity, only without a hint of overload anywhere on Band 2.

As we already know, the max bandwidth is a little over 600khz, small compared with up to 10mhz for other SDRs, but to get this kind of performance with several Mhz of bandwidth.. the cost would be prohibitive for now at least.

A valuable addition to the arsenal here.

The HF + sounds great for the money, I guess then we are all waiting to see how the Elad S3 performs l find it strange that you can pre order the S3 but there is no technical specification being mentioned for the unit,other than covering the whole of band 2.

Still l believe not everyone wants to capture the whole bandwidth, there many DXers who like to DX on the fly.

Anyway it's great to hear reports of new bits of kit
And it's good to read a real world opinion on FM reception of the HF +

Damien

41797. UNID tx of Cadena COPE 87.5?

Yahoo group: SkywavesDX (2016 — 2017)
Date: 2017-12-27 22:34:25 UTC
From: nickgilly@...
Topic: 41797 Message: 41797

Hi all.

During a good winter Es opening this afternoon I received an unlisted tx of Cadena COPE on 87.5, as confirmed by the PI code and PS name. Around the same time I also received Radio Águeda on 107.9 from El Bodón in western Spain, so maybe somewhere in the region of Extremadura or near Salamanca?

Any help with this much appreciated.

Thanks and good DX.

Nick, Whitchurch, Hampshire.

On Thursday, December 28, 2017 from 3:30 - 4:30 pm EST (2030 - 2130 UTC)
ZBM 89.1 FM "Ocean 89" in Hamilton, Bermuda was received in Easton, Pennsylvania,
USA via short-range Es for over one hour.

Signal quality is mainly spotty, weak with occasional moderate level fade-ups.

Broadcast was verified three times; two times with the male announcers station branding,
once with online 'Tune-In' audio stream programming match.

ZBM [15kW] overpowered the 200 watt semi-local 89.1 WBYH 'Word-FM' Christian

Contemporary Radio station near Hawley, Pennsylvania, fifty-one miles [82 km] to
the north.

Distance of 819 miles [1318 km]. True azimuth southeast 131 degrees.

Here is the interesting part, the folded-dipole antenna is only 31 inches [79 cm] off the
ground with it's main beams towards the north/south.

Ni Nick. Sorry for bumping this one up. It's certainly Radio Maryja. You have two options:

87.9v R.Maryja from Kwidzyn PI:3232 0.10kW
87.9h R.Maryja from Lódz PI:3232 10.00kW

Happy DX and all the best in 2018!

Thanks very much Zach. I'm guessing it was the latter site.

Good DX.

Nick, Whitchurch, Hampshire.
